The Union Version, China's preeminent and most widely used translation of the Bible, had achieved the status of a sacred Chinese classic within the Chinese Church not long after its publication in 1919. Jost Zetzsche's monograph on this remarkable translation traces the historical and linguistic background that led to the decision to translate the Union Version, with detailed analyses of the translation efforts that preceded it. Special attention is given to the cooperation and confrontation among Protestant denominations as well as the rising prominence of the Chinese translators as these groups attempted to form a cohesive translation of the Bible. This is set against the background of the development of the Chinese language during the 30-year translation process, both in the perception of the translators and in the country at large.

Ulrich's Update

A Treatise on Navigation, and Nautical Astronomy Fifth edition, etc

Ulrich's International Periodicals Directory

In just thirteen brief, accessible chapters, this engaging little book takes "absolute beginners" from the most basic questions about the language (e.g., what does a classical Chinese character look like?) to reading and understanding selections from classical Chinese philosophical texts and Tang dynasty poetry. "An outstanding introduction to reading classical Chinese. Van Norden does a wonderful job of clearly explaining the basics of classical Chinese, and he carefully takes the reader through beautifully chosen examples from the textual tradition. An invaluable work." —Michael Puett, Harvard University

This book is a quick and easy way to learn the second 100 basic Chinese traditional characters. The major struggle facing all beginning Chinese language students is to learn to recognize, read and write hundreds of Chinese characters. A working knowledge of characters is essential for any student wishing

to learn Chinese. The Second 100 Chinese Characters adopts a structural approach that helps students to overcome this initial difficulty and quickly master the basic Chinese characters that are fundamental to this language. Intended for beginning students, this book contains characters that have been carefully selected and sequenced for rapid and effective learning. For effective learning, memorization and practice, each Chinese character is shown separately on a single page, together with its English definitions, hanyu pinyin romanization, alternate form (if any), a stroke order guide and ample space for writing practice. Printed in gray lines, the stroke order guides introduce the student to the standard stroke sequence used in writing the characters, by tracing over them. After learning the correct stroke order, the student can then practice writing the character on their own, thus reinforcing recognition and memorization. Large boxes with grid lines for correct proportions are provided. Related compounds and phrases containing each character are also included to assist in vocabulary building. Three indexes (alphabetically by the English meanings and the pinyin romanization, and by radicals) are provided at the back of the book for quick and easy reference, along with extra sheets of blank boxes for writing practice. This book features The second 100 most frequently-used Chinese characters. Foundation characters for the HSK A level language proficiency test. Standard hanyu pinyin romanizations. Step-by-step stroke order guides and ample space for writing practice. Over 500 words and phrases containing the basic characters. Concise English definitions.

Antarctic Bibliography

The functions of Chinese numerals are in the main identical with those of English numerals. However, as Chinese numerals are closely associated with classifiers with which to form numeral-classifier compounds, they can only be fully understood when they are studied together with Chinese classifiers. Chinese classifiers are a very difficult problem for foreign learners to tackle, though it is not difficult to translate them into English. The fact that Chinese classifiers are difficult to master is because it concerns the usage peculiar to Chinese, but it doesn't prevent foreign learners from understanding the meaning of the Chinese classifiers. What is difficult for them is how to use them correctly in their translation from E to C. The aim of this book is to tell the learners how to use Chinese classifiers correctly. In order to help the foreign learners to learn Chinese classifiers more handily and correctly, Appendix I: Classification of

Chinese action classifiers and Appendix II: a detailed List of combination of Chinese classifiers and nouns, with more than 800 examples, are provided in this book.

Oxford Picture Dictionary English-Chinese Edition: Bilingual Dictionary for Chinese-speaking teenage and adult students of English

The depiction of personal and collective suffering in modern Chinese novels differs significantly from standard Communist accounts and many Eastern and Western historical narratives. Writers such as Yu Hua, Su Tong, Wang Anyi, Mo Yan, Han Shaogong, Ge Fei, Li Rui, and Zhang Wei skew and scramble common conceptions of China's modern development, deploying avant-garde narrative techniques from Latin American and Euro-American modernism to project a surprisingly "un-Chinese" dystopian vision and critical view of human culture and ethics. The epic narratives of modern Chinese fiction make rich use of magical realism, surrealism, and unusual treatments of historical time. Also featuring graphic depictions of sex and violence, as well as dark, raunchy comedy, these novels reflect China's recent history re-presenting the overthrow of the monarchy in the early twentieth century and the resulting chaos of revolution and war; the recurring miseries perpetrated by class warfare during the dictatorship of Mao Zedong; and the social dislocations caused by China's industrialization and rise as a global power. This book casts China's highbrow historical novels from the late 1980s to the first decade of the twenty-first century as a distinctively Chinese contribution to the form of the global dystopian novel and, consequently, to global thinking about the interrelations of utopia and dystopia.
