Keep Talking

The pace of modern life is accelerating. To keep up, we must keep on moving and adapting - constantly striving for greater happiness and success. Or so we are told. But the demands of life in the fast lane come at a price: stress, fatigue and depression are at an all-time

high, while our social interactions have become increasingly self-serving and opportunistic. How can we resist today's obsession with introspection and self-improvement? In this witty and bestselling book, Danish philosopher and psychologist Svend Brinkmann argues that we must not be afraid to reject the self-help mantra and 'stand firm'. The secret to a happier life lies not in finding your inner self but in coming to terms with yourself in order to coexist peacefully with others. By encouraging us to stand firm and get a foothold in life, this vibrant anti-self-help guide offers a compelling alternative to life coaching, positive thinking and the need always to say 'yes!'

Where would we be without conversation? Throughout history, conversations have allowed us to see different perspectives, build ideas, and solve problems. Conversations, particularly academic conversations push students to think and learn in lasting ways. Academic conversations are back-and-forth dialogues in which students focus on a topic and explore it by building, challenging, and negotiating relevant ideas. [The] authors have identified five core communication skills to help students hold productive academic conversations across content areas. These skills are: elaborating and clarifying, supporting ideas with evidence, building on and/or challenging ideas, paraphrasing and synthesizing. This books shows teachers how to weave the cultivation of academic conversation skills and conversations into current teaching approaches.
