### We Are Legion (We Are Bob)

Bob Lazar is the reason Area 51 became infamous in the 1980s and his recent appearance on Joe Rogan's podcast with 7 million listeners is credited with inspiring the Storm Area 51 phenomenon. In his DREAMLAND autobiography, Lazar reveals every detail of his highly controversial story about being an insider within the world's most legendary military research base. Bob Lazar was a brilliant young physicist that found himself employed at a top secret facility in the middle of the

desert outside Las Vegas. Under the watchful eye of the government elite, he is tasked with understanding an exotic propulsion system being used by an advanced aerospace vehicle he is told came from outer space. The stressful work and long, odd hours start to wear on Bob and he becomes concerned for his safety. He tells his wife and a couple close friends about what he's doing in the desert, and his employers find out and are furious. When they station goons outside his house, Bob seeks help from wealthy UFOlogist, John Lear, who encourages Bob to take his story to award-winning investigative journalist George Knapp at KLAS-TV, a CBS affiliate. To prove he's telling the truth, Bob takes a group of people out into the desert to watch a test flight of the "flying saucer." On the way home, they are stopped by the police, who notify the base, and Bob loses his job. In a series of interviews with CBS TV, Bob Lazar then blows the lid off "Area 51," blows the whistle on the effort to conceal this craft from the American people, and blows up his career as a top physicist. Bob Lazar's reports have been the subject of intense controversy for decades. He has been interviewed numerous times and his story has been corroborated by other individuals he worked with and who were present when these events happened. But until now, Bob Lazar has never told his own story, in every detail in his own words, about those exciting days in the desert outside of Las Vegas and how the world came to learn about the experiments being conducted at Area 51.

With the acclaimed Temeraire novels, New York Times bestselling author Naomi Novik has created a fantasy series like no other, combining the high-flying appeal of Anne McCaffrey's Pern saga and the swashbuckling derring-do of Patrick O'Brian's historical seafaring adventures. Now, with League of Dragons, Novik brings the imaginative tour de force that has captivated millions to an unforgettable finish. Napoleon's invasion of Russia has been roundly thwarted. But even as Capt. William Laurence and the dragon Temeraire pursue the retreating enemy through an unforgiving winter, Napoleon is raising a new force, and he'll soon have enough men and dragons to resume the offensive. While the emperor regroups, the allies have an opportunity to strike first and defeat him once and for all—if internal struggles and petty squabbles don't tear them apart. Aware of his weakened position, Napoleon has promised the dragons of every country—and the ferals, loyal only to themselves—vast new rights and powers if they fight under his banner. It is an offer eagerly embraced from Asia to Africa—and even by England, whose dragons have long rankled at their disrespectful treatment. But Laurence and his faithful dragon soon discover that the wily Napoleon has one more gambit

at the ready—one that that may win him the war, and the world. Praise for League of Dragons “Novik has accomplished something singular with her Temeraire series. It’s long. It’s sumptuous. . . . It’s a story about friendship that transcends not only time and class, but species. . . . League of Dragons masterfully wraps up so many plot threads and loose ends that had built up throughout the previous eight books [but] Novik never forgets that, as complex as her ideas and plot may get, the very simple notions of friendship and loyalty lie at the heart of the series.”—NPR “A satisfying conclusion to a remarkable series.”—Kirkus Reviews (starred review) “Thrilling scenes of aerial combat are interspersed with detailed character work, moral complexities, and political maneuvering. Novik expertly balances a myriad of plotlines and characters and offers an extremely satisfying resolution.”—Booklist (starred review) “This thrilling installment is packed with action and excitement, drawing the series to a delightful and satisfying close with plenty of twists, misadventures, and aerial combat along the way.”—Publishers Weekly (starred review) “Novik’s fans won’t be disappointed.”—Library Journal “League of Dragons is an ending to the series, it is a definitive one, and it is a satisfying one. As Taraxippus draws nearer, new observations throw the original predictions for its trajectory into doubt, and by the time it leaves the solar system, the conditions of life across the globe will be changed forever. Praise for Perihelion Summer “Egan here doubles down on climate change with his typically rigorous exploration of a cosmic accident’s effect on Earth and all its people. His characters are sharp and funny and their courageous response to the massive challenge they face works as a spur to cause us to think—why couldn’t we do as well with our own great challenge? **Betterness: Economics for Humans** is a powerful call to arms for a post-capitalist economy. Umair Haque argues that just as positive psychology revolutionized our understanding of mental health by recasting the field as more than just treating mental illness, we need to rethink our economic paradigm. Why? Because business as we know it has reached a state of diminishing returns—though we work harder and harder, we never seem to get anywhere. This has led to a diminishing of the common wealth: wage stagnation, widening economic inequality, the depletion of the natural world, and more. To get out of this trap, we need to rethink the future of human exchange. In short, we need to get out of business and into betterness. HBR Singles provide brief yet potent business ideas, in digital form, for today's

Cook combines speculative technology with a canny and realistic portrait of men at war and the stresses they face in combat. *Passage at Arms* is one of the classic novels of military science fiction.

Bobiverse fans: a signed limited edition of all three books in a boxed set, signed by the author, is now available on Amazon. Look for The Bobiverse [Signed Limited Edition] on Amazon. Bob Johansson didn't believe in an afterlife, so waking up after being killed in a car accident was a shock. To add to the surprise, he is now a sentient computer and the controlling intelligence for a Von Neumann probe. Bob and his copies have been spreading out from Earth for 40 years now, looking for habitable planets. But that's the only part of the plan that's still in one piece. A system-wide war has killed off 99.9% of the human race; nuclear winter is slowly

making the Earth uninhabitable; a radical group wants to finish the job on the remnants of humanity; the Brazilian space probes are still out there, still trying to blow up the competition; And the Bobs have discovered a spacefaring species that sees all other life as food. Bob left Earth anticipating a life of exploration and blissful solitude. Instead he's become a sky god to a primitive native species, the only hope for getting humanity to a new home, and possibly the only thing that can prevent every living thing in the local sphere from ending up as dinner.

### **Kantovan Vault**

The legendary battle-carrier UFS Phoenix is on the run in Outer Neutral Space. Lieutenant Commander Erik Debogande and Major Trace Thakur are determined to use neutral territory to broker a peace between humanity's warring factions, away from Fleet's strong arm. But as machinations in Fleet Command send a legendary warrior from Trace's past on a sworn path to kill her, there arises in the territory of an insectoid foe an ancient enemy from the nightmares of Spiral history, bent on

Phoenix's destruction.

### **Drysine Legacy**

What if being a hero was encoded in your genes? And nobody told you? Casmir Dabrowski would laugh if someone asked him that. After all, he had to build a robot to protect himself from bullies when he was in school. Fortunately, life is a little better these days. He's an accomplished robotics engineer, a respected professor, and he almost never gets picked on in the lunchroom. But he's positive heroics are for other people. Until robot assassins stride onto campus and try to kill him. Forced to flee the work he loves and the only home he's ever known, Casmir catches the first ship into space, where he hopes to buy time to figure out who wants him dead and why. If he can't, he'll never be able to return home. But he soon finds himself entangled with bounty hunters, mercenaries, and pirates, including the most feared criminal in the Star Kingdom: Captain Tenebris Rache. Rache could snap his spine with one cybernetically enhanced finger, but he may be the only person with the answer Casmir desperately needs: What in his genes is worth killing for?

"Creating a new product and finding customers has gotten easier in the twenty-first century. This can partly be attributed to the march of technological progress. But there is another factor at play: a growing willingness to try new entrepreneurial ideas, even if they appear silly at first. the second book by Priceconomics tells the stories of people who have capitalized on these changes to make a living in the modern world. These are people who tried new things - crowdfunding instead of bank loans, food trucks instead of restaurants, public launches instead of patents. They took big risks, learned how to do things on their own, and fought through major setbacks."--Back cover.
