Bing: Antibiotic Basics For Clinicians

Common side effects of antibiotic treatment include hypersensitivity reactions, as well as nephrotoxic and hepatotoxic effects. Many antibiotics are contraindicated in certain patient groups (e.g., children, pregnant and/or breastfeeding women).

What counts as effective communication in nursing

AHRQ ' s HAI program funds work to help frontline clinicians and other health care staff prevent HAIs by improving how care is actually delivered to patients. This work is accomplished through a robust portfolio of grants and contracts that focus on applied research—or research that advances the ability of clinicians in the field to combat HAIs.

AHRQ's Healthcare-Associated Infections Program | Agency

The Comprehensive Unit-based Safety Program (CUSP) toolkit includes training tools to make care safer by improving the foundation of how your physicians, nurses, and other clinical team members work together. It builds the capacity to address safety issues by combining clinical best practices and the science of safety.

Overview of antibiotic therapy - AMBOSS

Containment complements foundational CDC strategies, including improving antibiotic use and preventing infections, and builds on existing detection and response structure. The entire package is needed to address urgent threats such as *Candida auris* and carbapenem-resistant Enterobacteriaceae (CRE), before they gain a foothold.

The CUSP Method | Agency for Healthcare Research and Quality

The perspectives of nurse educators and clinicians were obtained as reflected in their feedback to nurses on observed clinical interactions. Four major themes were considered to be important by nurse educators and clinicians in what constitutes effective nurse – patient interactions in clinical practice: approach, manner, techniques

in interaction and communication.

Containment Strategy | HAI | CDC

Clinicians conducted a 15-year prospective cohort study examining patients who had the first SARS virus, finding long-term bone and lung issues, which could very well be an issue with COVID-19, too.
