History's Worst Nuclear Disasters - HISTORY

A gripping narrative of nuclear mishaps and meltdowns around the globe, all of which have proven pivotal to the advancement of nuclear science. From the moment radiation was discovered in the late nineteenth century, nuclear science has had a rich history of innovative scientific exploration and discovery, coupled with mistakes, accidents, and downright disasters.

Nuclear and radiation accidents and incidents - Wikipedia

One of the main reasons people are fearful of nuclear power is the possibility of accidents. This fear is generally fueled by three high-profile nuclear accidents: Three Mile Island, Chernobyl, and Fukushima Daiichi. Each of these accidents involved a partial or full core meltdown. A core meltdown is when the reactor's core severely overheats and cannot be sufficiently cooled down.

Atomic Accidents: A History of Nuclear Meltdowns and

First in August of 1945 and again in May of 1946, two Los Alamos, NM scientists, Harry Daghlian and Louis Slotin, were exposed to lethal doses of radiation while performing experiments to determine critical mass. These experiments, performed at the Omega Site, were commonly referred to as "Tickling

Atomic Accidents | Atomic Heritage Foundation

Mahaffey guides us through more than a century of atomic research, including misadventures with radioactive elixirs ("The radium water worked fine until his jaw came off," reads a 1932 headline) and long-forgotten accidents at enrichment plants. The compelling tales unravel like slow-motion horror stories, spiraling towards disasters we know are coming.

Atomic Accidents: A History of Nuclear Meltdowns and

The earthquake and tsunami that struck eastern Japan on March 11, 2011, caused a serious accident at the Fukushima Dai-ichi nuclear power plant on the northeastern coast of Japan. How did it happen? The earthquake cut off external power to the reactors. The tsunami, which reached levels more than twice as high as the plant was designed to withstand, disabled backup diesel generators, crippling the reactor cooling systems.
