Tahoe Beneath the Surface

Below the Surface by Karen Harper She surfaced from the depths of the sea and was terrifyingly, inexplicably alone Briana Devon knows her twin sister would never deliberately leave her but when she emerges from underwater, Daria and their boat have vanished. Fighting rough waves and a fast-approaching storm, Bree doesn't have time to question: if she wants to survive, she has to swim. Exhausted and terrified, Bree barely makes it to a tiny barrier island, where Cole De Roca, who has also taken shelter, revives her. Bound to Cole by the harrowing experience, she turns to him as she struggles to understand what happened to her sister. What was her twin, whom she thought she knew so well, hiding? What really transpired that terrible afternoon? And what secrets lie dormant below the surface? Originally published in 2008

A guide to the latest research on how young people can develop positive ethnic-racial identities and strong interracial relations Today's young people are growing up in an increasingly ethnically and racially diverse society. How do we help them navigate this world productively, given some of the seemingly intractable conflicts we constantly hear about? In *Below the Surface*, Deborah Rivas-Drake and Adriana Umaña-Taylor explore the latest research in ethnic and racial identity and interracial relations among diverse youth in the United States. Drawing from multiple disciplines, including developmental psychology, social psychology, education, and sociology, the authors demonstrate that young people can have a strong ethnic-racial identity and still view other groups positively, and that in fact, possessing a solid ethnic-racial identity makes it possible to have a more genuine understanding of other groups. During adolescence, teens reexamine, redefine, and consolidate their ethnic-racial identities in the context of family, schools, peers, communities, and the media. The authors explore each of these areas and the ways that ideas of ethnicity and race are implicitly and explicitly taught. They provide convincing evidence that all young people—ethnic majority and minority alike—benefit from engaging in meaningful dialogues about race and ethnicity with caring adults in their lives, which help them build a better perspective about their identity and a foundation for engaging in positive relationships with those who are different from them. Timely and accessible, *Below the Surface* is an ideal resource for parents, teachers, educators, school administrators, clergy, and all who want to help young people navigate their growth and development successfully.

For more than a century, skin lighteners have been a ubiquitous feature of global popular culture—embraced by consumers even as they were fiercely opposed by medical professionals, consumer health advocates, and antiracist thinkers and activists. In *Beneath the Surface*, Lynn M. Thomas constructs a transnational history of skin lighteners in South Africa and beyond. Analyzing a wide range of archival, popular culture, and oral history sources, Thomas traces the changing meanings of skin color from precolonial times to the postcolonial present. From indigenous skin-brightening practices and the rapid spread of lighteners in South African consumer culture during the 1940s and 1950s to the growth of a billion-dollar global lightener industry, Thomas shows how the use of skin lighteners and experiences of skin color have been shaped by slavery, colonialism, and segregation as well as by consumer capitalism, visual media, notions of beauty, and protest politics. In teasing out lighteners' layered history, Thomas theorizes skin as a site for antiracist struggle and lighteners as a technology of visibility that both challenges and entrenches racial and gender hierarchies.
