injection. For close to a decade and a half, Mason sits on Texas death row while Rob Gilmore, his lawyer, and others work to get him set free. At times, mason comes within hours of his death. Not until Rob is killed in a traffic accident does the lawyer's wife discover Rob's secret - a secret that will aide in releasing Mason Chase of incarceration and freeing him from the looming death sentence that crowds him like an angry shadow. Rob's wife, a lawyer for the county, also discovers her own boss' culpability in the botched conviction. She turns to the aid of a Houston law firm, who specialize in cases like Mason's. The evidence is presented to a U.S. Federal Judge who frees Mason and gets him removed from prison and away from the horror of death row. Months pass, Mason Chase decides to sue the county, its DA, lead investigator and criminal lab for damages and restitution for his wrongful conviction. Carol Gilmore, Rob's wife, now in private practice, leads the case and wins a huge multi-million dollar settlement for Mason, only to have the U.S. Supreme Court eventually rule against him. Mason is left with nothing. Again a victim. After a few months, three justices who sit on the highest bench in the land disappear. (They happen to be the three that were the lead advocates that Mason's case was without merit.) There are no leads. There is no evidence. There is nothing to go on. The FBI is baffled until a freak traffic incident on a lonely Texas highway, just north of the Mexican border leads authorities to believe that the killer of the three Supreme Court justices is residing just on the other side of the Rio Grande. A former Texas Ranger, Lucky Drake, is asked to snoop around in the desert of Northern Mexico, to see if he can "unofficially" sniff out anything like clues to the deaths of the three. He, in fact, uncovers the real killer: Jimmy McDermit, a man who has long been suspected as being the actual killer of the Chase family. But Lucky also discovers, that Jimmy seems to be taking his directions from a doctor in a small Mexican village. As he gets closer to the two, who are deep in conversation, Lucky discovers his camera lens is focused on, not a doctor, but Mason Chase. We have come full circle.

The dominant tradition in writing about U.S. – Latin American relations during the Cold War views the United States as all-powerful. That perspective, represented in the metaphor “ talons of the eagle, ” continues to influence much scholarly work down to the present day. The goal of this collection of essays is not to write the United States out of the picture but to explore the ways Latin American governments, groups, companies, organizations, and individuals promoted their own interests and perspectives. The book also challenges the tendency among scholars to see the Cold War as a simple clash of “ left ” and “ right. ” In various ways, several essays disassemble those categories and explore the complexities of the Cold War as it was experienced beneath the level of great-power relations.

While extending a strong challenge to the superstition of atheism, the principal aim of this book is to demonstrate the fact that the major scientific discoveries that have been made so far, distinctively and expressly reveal the existence of an intelligent and omnipotent Designer who has thoughtfully and intentionally instituted all universal laws with stark precision and accuracy. In this discussion I have also emphasized the incapability of science to stand alone as a final deciding instrument on matters that extend beyond the natural realm. Hence no proof of a Divine Existence can be established by reference to science alone, but through logical reasoning based on obvious and explicit facts. I have also highlighted the reality that most scientific phenomena cannot be explained without recourse to the role of a Supernatural Power. In this book I have put forward a chain of very rational arguments most of which originated in my mind at various occasions and hence would be new and interesting to the reader who would be led towards the definite conclusion that this universe could not have been the outcome of an accident or random chance, but the result of an intentional plan of a Supernatural Power. A unique feature of this book is that all the arguments presented by me here are determined upon logical conclusions based on common sense and scientifically established facts and not on sheer imaginary hypothesis. On my contemplative reasoning I am also presenting a proposition which I have named as the Theory of Irresistible Cessation of Matter and Irreversible Nature of Life as proof of the existence of a precise Divine plan. ### Beyond the Shadow

The book is the story of a young American girl living in South Africa during the early years of Apartheid (1948-1960). One of six children of a Swedenborgian minister who was sent to South Africa to establish a theological school for Africans, the author reaches back into this unique time and place in an effort to rediscover the culture that influenced her own adult attitudes. Rather than following a strictly chronological format, the story is laid out in a series of verbal snapshots, supported by photographs. Family life, experienced through the eyes of a child living in a complex environment, contrasts with the lives of those who were impacted by the institutionalized racism of apartheid. Examples of the Acts of Apartheid at the end of each chapter include news articles, interviews, and commentary. Deep childhood fears of some unnamed threat are represented by home invasions, wildfires, and the cry of a hyena in the mountains. The mountains are dangerous, they present a great barrier, but they can be conquered. After returning permanently to America as a teenager 2 through a confusing and sometimes painful process of discussion and observation 2 the author uncovers those artifacts of the past that inform her place in the world today.

### The Shadow Beyond

The enthralling true story of the greatest baseball team ever forgotten In a time when the country was divided into black and white, our soldier boys battled against the evils in Europe, and war-weary Americans gathered around green fields to forget their troubles in the joys of our national pastime, the greatest baseball dynasty you've probably never heard of electrified the game and set an unstoppable revolution in motion. So begins the fascinating and often surprising story of the Homestead Grays, the Negro League's most successful franchise, and how the fight to integrate baseball began not in Brooklyn with Jackie Robinson but in our nation's capital. During the first half of the twentieth century, Washington, D.C., was a segregated Southern town. Black and white Washingtonians lived in separate worlds--until those worlds collided at Griffith Stadium. Standing in the heart of a thriving black district, the park played host to the white Washington Senators and, when the Senators were out of town, the Homestead Grays. There, the best team in the Negro Leagues reigned victorious on the same field where one of the worst teams in the all-white majors struck out again and again. Although white fans never caught on, tens of thousands of loyal black fans flocked to watch the great Grays. On those sun-bright stadium afternoons, the wall of segregation fell away; the fans sat wherever they wanted--and, together with their number-one team and a host of heroes, they transformed our nation's capital into the front lines of the campaign to integrate major-league baseball. In this transcendent account, the author gracefully unfolds the true story behind this bold adventure, taking you back to those front lines, where intriguing characters

such as journalists Sam Lacy and Wendell Smith fought doggedly for integration; the Negro Leagues' most celebrated sluggers, Josh Gibson and Buck Leonard, gave the major-league superstars a run for their money; and club owner Clark Griffith, mired in prejudice and greed, thwarted integration at every turn. Through numerous interviews with key players (many now deceased), a treasure trove of archival material, and dozens of unpublished historical photos, the author masterfully pieces together the lost legend of how the fight to integrate baseball really began, bearing witness at last to the greatest legends of black baseball and opening the book on a forgotten chapter in American history. "This is the story of the lost era between the Babe and Jackie, of a crusading journalist named Sam Lacy, an immensely talented black ballplayer named Buck Leonard, and a stubborn major league owner named Clark Griffith. It's the story of why the fight to integrate major league baseball began in Washington and not in Brooklyn, why black Washington ultimately lost the fight, and why the Senators were not the first team to integrate. And it's the story of the greatest baseball dynasty that most people have never heard of, the Homestead Grays, whose wartime popularity at Griffith Stadium moved them beyond the shadow of the Senators." --from the Introduction So begins this powerful and passionate account of how the fight to integrate baseball really began. Moving seamlessly between the heroic exploits of the ballfield and the exploitation of the boardroom, *Beyond the Shadow of the Senators* reveals all the magic and madness that surrounded the legendary Homestead Grays and their lesser--but more recognized--stadium-mates, the Washington Senators. Drawing on extensive interviews with key players, long-lost archives, and dozens of dazzling historical photos, the author meticulously chronicles the true story behind this forgotten chapter in the annals of baseball, painting a portrait of larger-than-life characters and lazy, golden afternoons you'll wish you could remember--when the Homestead Grays dominated Griffith Stadium and gave baseball's white superstars a run for their money.

### Wolves of the Beyond #2: Shadow Wolf

The strategic environment of 2020 and beyond will look decidedly different from what planners envisioned at the start of this century. Changing priorities, varying operational environments (OE), and continuing budget constraints will each shape the United States national security policies. The Army will become smaller and leaner, yet it will need to maintain the capabilities to respond effectively and decisively to global challenges. Such a response requires strengthening inter-organizational relationships—our unified action partners—to include geographic combatant commands, functional combatant commands, our sister services, other governmental and non-governmental agencies, private industry, international governmental organizations, and multinational partners. The past 10 years have seen unparalleled change during a period of high operational tempo supporting two concurrent operations and a number of domestic and foreign humanitarian assistance/disaster relief (HA/DR) missions. At no point were operations compromised by a lack of sustainment; albeit there were issues to resolve. The Army is now at a strategic juncture and must develop a well-grounded proposal to guide the design of Sustainment 2020 (and beyond) that is optimized, integrated, and synchronized, while ensuring that it is affordable, relevant and avoids unnecessary redundancy. Sustainment must be capable of meeting the needs of the Army in the future.

### Beyond Retribution

The rumblings of war in distant countries mattered little to Danny McClain. Growing up in Chicago, his world revolved around after-school jobs, a rescued beagle, his pen pal in Holland, and the Cubs' chance to go to the World Series. Then, in December of 1941, during his first year at Northwestern University, news of the attack on Pearl Harbor hit much too close to home. After a series of unexpected events over the next couple of years, Danny found himself in the co-pilot seat of a B-17, stationed with the 390th Bomb Group in Framlingham, England. Anya Versteeg had been just a teenager when Hitler's troops invaded her homeland of Holland in May of 1940. Forced to grow up much too fast, the feisty preacher's daughter eagerly immersed herself in the Dutch Resistance and its many efforts to thwart the enemy. Certain that God had turned His back on Holland, she closed her heart and did whatever she had to do to save her country before it was too late. By 1945, the people of Occupied Holland were starving. Cut off from the outside world in retaliation for their failed attempt to oust the Germans invaders, the Dutch had no food, no electricity, no fuel, and little hope of surviving. Thousands were dying every day. Then, just days before the war ended, help came to The Netherlands like manna from heaven. Operation Chowhound held special meaning for Lieutenant Danny McClain. Somewhere below in the battered land of tulips and windmills was the girl who needed rescuing--after rescuing so many others. And he would move heaven and earth to find her.

war must find ways to live with the stultifying injustices littering their past and haunting their present – acts of discrimination and violence committed before, during and even after conflict. Confronting the vexed challenge of re-marrying peace with justice out of the morass of war ' s injustices is the complex but imperative task facing post-conflict societies and the international community today. Using current examples from conflicts around the world, ranging from Africa and Asia to Latin America and Eastern Europe, it argues for a holistic and integrated approach to justice after conflict. It proposes that we must address all three dimensions of injustice embedded in conflict – symptom, consequence and cause, and that subsequently we must rebuild all three dimensions of justice – legal, rectificatory and distributive, in the aftermath. This timely book explores the difficulties and dilemmas confronted on the ground in restoring these, and concludes with pragmatic recommendations for dealing with such challenges of rebuilding peace with justice after contemporary conflicts. This well-argued book will prove a valuable resource for students and professionals in the fields of peacebuilding, justice theory, international relations and politics.

### The 49th Mystic (Beyond the Circle Book #1)

The mind fed too long upon monotony succumbs to the insidious mental ailment which the West calls 'cabin fever.' Bud Moore, ex-cow-puncher and now owner of an auto stage that did not run in the winter, was touched with cabin fever and did not know what ailed him. His stage line ran from San Jose, California, up through Los Gatos and over the Bear Creek road across the summit of the Santa Cruz Mountains and down to the State Park, which is locally called Big Basin, the first state park of California. For something over fifty miles of wonderful scenic travel he charged six dollars, and usually his big car was loaded to the running boards. Bud was a good driver, and he had a friendly pair of eyes--dark blue and with a humorous little twinkle deep down in them somewhere--and a human little smiley quirk at the corners of his lips. He did not know it, but these things helped to fill his car.
