This manual takes both novice and experienced boatowner through minor to major repairs of electrical systems, engines, electronics, steering systems, generators, pumps, cookers, spars and rigging. When it was first published in 1990, the Boatowner's Mechanical & Electrical Manual broke new ground. It was hailed as the first truly DIY manual for boatowners and has sold in its thousands ever since. There have been significant changes in boat systems since then, particularly electrical systems, and this fourth edition has been fully updated to reflect these developments and expand its predecessor's worldwide popularity. A Rational Way of Teaching, 1689

“ Anyone who contemplates any onboard do-it-yourself work should have this book at his or her elbow. ” --Cruising World “ This book reduces a boat to its most rudimentary parts in simple drawings and clear explanations. Fascinating to read, it ’ s a perfect teaching tool. ” --Ocean Navigator Whether you ’ re a new mariner or a lifetime veteran, How Boat Things Work is a resource you can ’ t afford to be without. With intricate two-color cutaway drawings of eighty different systems and devices, as well as detailed explanations of how they ’ re assembled, how they work, and how they can go wrong, this book covers every primary component of your boat's inner workings. This guided tour “ under the hood ” of your sailboat or powerboat includes: Engines, transmissions, bearings, stuffing boxes, propellers Steering systems, autopilots, windvanes, compasses Rigging, splicing, line handling, block and tackle, sail controls Anchors and windlasses DC and AC electrical systems Pumps, toilets, seacocks, freshwater systems

No matter what anyone tells you, boat cooking IS different from cooking ashore. The space is smaller, there ’ s no grocery store 5 minutes away, you have fewer prepared foods and electric appliances, and food storage is much different. Despite cruising different oceans, we—Jan and Carolyn--both faced the same challenges: eating well while having time to enjoy all the other great aspects of cruising. We love to snorkel, swim, kayak, explore—and just sit and admire the view. We learned with the cookbooks we both had aboard, and wished for information that wasn't available--like when Jan ended up with a frozen

chicken complete with head and feet and no instructions on how to cut it up. When we couldn't get foods such as sour cream, English muffins, spaghetti sauce or yogurt, we adapted recipes to make our own. Other times, we experimented with substituting ingredients--maybe the result wasn't identical, but it was still tasty. We ended up with over 150 substitutions and dozens of "make it yourself" options. As we traded recipes and knowledge with each other, we realized we were compiling information that became *The Boat Galley Cookbook*: 800+ recipes made from readily-obtainable ingredients with hand utensils, including numerous choices to suit every taste: not just one cake but 20, 16 ways to prepare fish, 10 regional barbeque sauces, and so on. Step-by-step directions to give even "non-cooks" the confidence they can turn out tasty meals without prepared foods. Detailed instructions on unfamiliar things like making yogurt and bread, grilling virtually every food imaginable, preparing and cooking freshly-caught fish and seafood, cutting up and boning meat, cooking in a Thermos and baking on the stove top, as well as lots of tips on how to do things more easily in a tiny, moving kitchen. All this in an easy-to-navigate format including side tabs on the Contents to help you find your way and extensive cross reference lists at the end of each chapter. Quick Reference Lists provide idea starters: suggestions of included recipes for such categories as Mexican, Asian, and Potluck. *The Boat Galley Cookbook* is designed to help you every step of the way. We hope it becomes a trusted reference on your boat, and a source of many enjoyable meals.

After years of boating in the waters of the Pacific Northwest and years of frustration in trying to find a log book that met their boating needs, Milo & Terri Walker of Seattle designed their own log book. With tabbed sections for vessel information, a cruising log, maintenance & fuel logs, a radio log with May Day instructions & VHF requirements, and vessel inventories for emergency equipment, spare parts & lights, their log book became an instant success. Out of a selection of 25 log books, the Walker Common Sense Log Book is the publisher's national marine distributor's best-selling log book coast to coast. No wonder it is on its sixth printing.

For Father's Day Give Your Dad the Gift of Memories and Legacy Dad, I Want to Hear Your Story is the place for fathers to tell their tales and create a cherished legacy. Imagine reading this rich record of your father's journey, who he is, and his experiences. Imagine sitting with your children and sharing his story and one day them sharing it with their kids. Dad, I Want to Hear Your Story will guide your father with questions, assisting him in sharing the stories of his childhood, his teens, and his adult years. This will be his tale, his triumphs, his challenges. This will be the story of your hero. Bestselling author Jeffrey Mason has created a guided journal that will give your father the gift of legacy and you the gift of memories. Buy Dad, I Want to Hear Your Story and give your father a gift that will continue to give over the years. "I can't wait to read what my Dad writes about his life. There is so much I want to know." -Chris Darling "My father has always been my hero and I want to know as much as I can about who he is." -Cindy Collingsworth "This gift if for my dad and me." -Steve Syphax

Did you know that a USCG license is required in order to legally carry passengers for hire? This includes charters for: * Fishing * Sightseeing * Diving * Transportation * Teaching * Eco-Tours etc i.e. any use

which is considered a "passenger for hire" situation. Many maritime companies now require them for boat deliveries and marine transportation. These are all good reasons to maintain your own seafarers maritime log book. How much documented "service on the water time" must you have to qualify for the different types of USCG licenses? 360 days for OUPV and 720 days for Master class, both of which require at least 90 days within the last 3 years. This log book will help you document your sea time in an organized and compact form. USCG Captains' License Information OUPV INLAND (6 PAK) Operator of Uninspected Passenger Vessel * A minimum of 360 days on the water experience from age 16 years to present is required. * 90 of those 360 days must be within the most recent 3 years on a power or sail vessel over 16 feet in length. OUPV NEAR COASTAL (6 PAK) Operator of Uninspected Passenger Vessel * These requirements are the same as those for the Master Inland/OUPV Near Coastal Endorsement License. * A minimum of 360 days on the water experience from age 16 years to present is required. * 90 of those 360 days must be within the most recent 3 years on a power or sail vessel over 16 feet in length. * 90 of those 360 days must be on waters outside the boundary lines established by the US Coast Guard. MASTER INLAND (25, 50 OR 100 GROSS TONS) * A minimum of 360 days on the water experience from age 16 years to present is required. * 90 of those 360 days must be within the most recent 3 years on a power or sail vessel over 16 feet in length. MASTER INLAND (25, 50 OR 100 GROSS TON) / OUPV ENDORSEMENT * These requirements are the same as those of the OUPV Near Coastal License. * A minimum of 360 days on the water experience from age 16 years to present is required. * 90 of those 360 days must be within the most recent 3 years on a power or sail vessel over 16 feet in length. * 90 of those 360 days must be on waters outside the boundary lines established by the US Coast Guard. experience from age 16 years to present is required. * 90 of those 360 days must be within the most recent 3 years on a power or sail vessel over 16 feet in length. * 180 of those 360 days must be on waters outside the boundary lines established by the US Coast Guard. MASTER NEAR COASTAL (25, 50 OR 100 TON) * A minimum of 720 days on the water experience from age 16 to present is required. * 90 of those 720 days must be within the most recent 3 years on a similar size vessel to the license you are applying for. * 360 days of those 720 days must be on waters outside the boundary lines established by the US Coast Guard. * You will also need a TWIC Card How do I prove my time on the water to meet the US Coast Guard requirements? Most recreational boaters do not maintain log books. As such, the Sea Service forms which are included in the USCG application package must be filled out by hand. This form consists of twelve boxes, one for each month of the year. Starting with the most recent year, you fill in the number of days you can best recall being on the water and then go backward in time to the age of 16 years old, or until the sea time requirements have been met. This time is then supported by proof of ownership of the vessel, if you are claiming time on your own boat. If you claim time on someone else's boat, then they must sign your sea service form. These are all good reasons to maintain your own log book. With this log book you can show your documented time.

Dad, I Want to Hear Your Story

A logbook for recording journeys at the sea, for sailors and motorboaters. Ideal for passage making. This ship's log is designed for the modern sailor, who navigates predominantly using electronic methods. It eliminates the details of classical navigation, such as hourly deviation record, but it allows ample space to enter this information, if required. All the essential information for passage making is visible at one glance. The handy size makes it big enough to write in it comfortably, but small enough to fit on any nav table. Information you can record in the logbook: Date, Origin and destination, Crew, Distance, Time, Position, Course, Speed, Log, Wind direction and speed, Tidal information, Ample "notes" section for each log, which you can customise to fit your needs, Passage summary with total hours, sail hours, engine hours, and average speed. The cover logo is of a modern sloop design. This book is published

Although cardiac surgery has made an enormous progress during the last decades, the discipline has to cope with essential changes: Patients are increasingly cared for by cardiologists and therefore referred to the surgeon in a later stage of disease. Consequently, they are more often in an increasingly serious state or in advanced age with significant comorbidities. In order to meet the requirements of these different patient groups, cardiosurgical treatments require special protectional strategies for the heart in order to perform the planned operations safely. This book presents the latest knowledge of modern techniques of myocardial protection taking into consideration the different patient groups and current scientific strategies. Furthermore, it discusses present and future scientific approaches in myocardial protection and preservation.
