Instant National Bestseller After suffering for years with unexplainable health issues, Dr. Ben Lynch discovered the root cause—“dirty” genes. Genes can be “born dirty” or merely “act dirty” in response to your environment, diet, or lifestyle—causing lifelong, life-threatening, and chronic health problems, including cardiovascular disease, autoimmune disorders, anxiety, depression, digestive issues, obesity, cancer, and diabetes. Based on his own experience and successfully helping thousands of clients, Dr. Lynch shows you how to identify and optimize both types of dirty genes by cleaning them up with targeted and personalized plans, including healthy eating, good sleep, stress relief, environmental detox, and other holistic and natural means. Many of us believe our genes doom us to the disorders that run in our families. But Dr. Lynch reveals that with the right plan in place, you can eliminate symptoms, and

optimize your physical and mental health—and ultimately rewrite your genetic destiny.

The immunity code presents an immune centric approach to aging and health, and how to slow it dramatically in easy, practical steps. The Immunity Code is simply a new paradigm and an entirely new way think about caring for the body. The new goal is learning to control key aspects of immunity, specifically immune cells called macrophages, to control health and aging. Using new science based techniques,, hacks if you will, to steer immunity to slow and reverse aging and drive peak health, you will gain a power everyone seeks and so few find.

The Mood Cure

In his mid-twenties, Dave Asprey was a successful Silicon Valley multimillionaire. He also weighed 300 pounds, despite the fact that he was doing what doctors recommended: eating 1,800 calories a day and working out 90 minutes a day, six times a week. When his excess fat started causing brain fog and food cravings sapped his energy and willpower, Asprey turned to the same hacking techniques that made his fortune to "hack" his own biology, investing more than \$300,000 and 15 years to uncover what was hindering his energy, performance, appearance, and happiness. From private brain EEG facilities to remote monasteries in Tibet, through radioactive brain scans, blood chemistry work, nervous system testing, and more, he explored traditional and alternative technologies to reach his physical and mental prime. The result? The Bulletproof Diet, an anti-inflammatory program for hunger-free, rapid weight loss and peak performance. The Bulletproof Diet will challenge—and change—the way you think about weight loss and wellness. You will skip breakfast, stop counting calories, eat high levels of healthy saturated fat, work out and sleep less, and add smart supplements. In doing so, you'll gain

energy, build lean muscle, and watch the pounds melt off. By ditching traditional "diet" thinking, Asprey went from being overweight and sick in his twenties to maintaining a 100-pound weight loss, increasing his IQ, and feeling better than ever in his forties. The Bulletproof Diet is your blueprint to a better life.

The Longevity Code

A veteran research scientist who has spent decades establishing biochemical treatment protocols for patients with ADHD, Alzheimer's disease and various mental disorders challenges popular opinions about psychiatric drugs to make recommendations for drug-free nutrient therapies that normalize the brain without producing serious side effects. 15,000 first printing.

Get-Fit Guy's Guide to Achieving Your Ideal Body

Foundation

A NEW YORK TIMES BESTSELLER A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time's most influential people. It's a seemingly undeniable truth that aging is inevitable. But what if everything we've been taught to believe about aging is wrong? What if we could choose our lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: "Aging is a disease, and that disease is treatable." This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair's own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, Lifespan will forever change the way we think about why we age and what we can do about it.

Mitochondria and the Future of Medicine

Draws on new research to answer questions about the effects of specific drugs and foods on the brain, in an updated edition that discusses the role of biorhythms and how drugs interact with the body's biochemistry. --Publisher's description.

Deskbound

Radical in its simplicity, Dr. Eric Goodman's visionary approach to mindful movement corrects the complacent adaptations that lead to back and joint pain, and teaches us to harness the body's natural movement patterns into daily activities to make us fit, healthy, and pain free. Our sedentary lifestyle has led to an epidemic of chronic pain. By adapting to posture and movement that have us out of balance—including sitting all day at a keyboard, tilting our heads forward to look at our phones—we consistently compromise our joints, give our organs less room to function, and weaken our muscles. How we hold and live in our bodies is fundamental to our overall health, and the good news is that we all hold the key to a healthier body. Dr. Goodman has spent years studying human physiology and movement. He has trained world-class athletes for better performance, and has healed people of all ages and occupations of lifelong debilitating pain. His theory of self-healing is now available to everyone. His practical program trains the posterior muscle chain—shoulders, back, butt, and legs—shifting the burden of support away from joints and putting it back where it belongs: into large muscle groups. Filled with helpful diagrams and sixty color photographs, *True to Form* shows readers how to successfully integrate these powerful movements into everyday life—from playing with the kids to washing dishes to long hours in the office—transforming ordinary physical actions into active and mindful movements that help to eliminate pain, up your game, or simply feel more energetic. *True to Form* shows you how to move better, breathe better, and get back to using your body the way nature intended.

True to Form

The world is facing the greatest healthcare crisis it has ever seen. Chronic disease is shortening our lifespan, destroying our quality of life, bankrupting governments, and threatening the health of future generations. Sadly, conventional medicine, with its focus on managing symptoms, has failed to address this challenge. The result is burned-out physicians, a sicker population, and a broken healthcare system. In *Unconventional Medicine*, Chris Kresser presents a plan to reverse this dangerous trend. He shows how the combination of a genetically aligned diet and lifestyle, functional medicine, and a lean, collaborative practice model can create a system that better serves the needs of both patients and practitioners. The epidemic of chronic illness can be stopped, if patients and practitioners can adapt.

Natural Health, Natural Medicine

With information for patients and practitioners on optimizing mitochondrial function for greater health and longevity Why do we age? Why does cancer develop? What's the connection between heart failure and Alzheimer's disease, or infertility and hearing loss? Can we extend lifespan, and if so, how? What is the Exercise Paradox? Why do antioxidant supplements sometimes do more harm than good? Many will be amazed to learn that all these questions, and many more, can be answered by a single point of discussion: mitochondria and bioenergetics. In *Mitochondria and the Future of Medicine*, Naturopathic

Doctor Lee Know tells the epic story of mitochondria, the widely misunderstood and often-overlooked powerhouses of our cells. The legendary saga began over two billion years ago, when one bacterium entered another without being digested, which would evolve to create the first mitochondrion. Since then, for life to exist beyond single-celled bacteria, it's the mitochondria that have been responsible for this life-giving energy. By understanding how our mitochondria work, in fact, it is possible to add years to our lives, and life to our years. Current research, however, has revealed a dark side: many seemingly disconnected degenerative diseases have tangled roots in dysfunctional mitochondria. However, modern research has also endowed us with the knowledge on how to optimize its function, which is of critical importance to our health and longevity. Lee Know offers cutting-edge information on supplementation and lifestyle changes for mitochondrial optimization, such as CoQ10, D-Ribose, cannabinoids, and ketogenic dietary therapy, and how to implement their use successfully. Mitochondria and the Future of Medicine is an invaluable resource for practitioners interested in mitochondrial medicine and the true roots of chronic illness and disease, as well as anyone interested in optimizing their health.

Lifespan

"Only recently has it been discovered that the brain produces new brain cells throughout our entire lives, a process called neurogenesis. The rate at which we form new brain cells has a profound influence upon every aspect of our life. When the rate of neurogenesis is low, we see cognitive deficits and memory problems, anxiety and stress, depression, and lowered immunity. Life is difficult. With high rates of neurogenesis we see the opposite: enhanced cognitive abilities, rapid learning, emotional resilience, protection from anxiety, stress and depression, heightened immunity and robust health. We flourish. Life is wonderful. Given the neurotoxic norms of society, it's almost universally true that your brain is working far below its capacity. It is deteriorating much faster than it needs to. What good is living longer if your brain can't go the distance? Recent discoveries in the emerging field of neurogenesis reveal the secrets to radically improve your brain's health. You can operate at a higher level than you ever dreamed possible--at any age!" --

Shape21

In the first quarter of 2016, Americans bought 19.7 million fitness wearables, an increase of 67 percent over the previous year. By 2020, the global market for fitness-focused apps and devices is expected to grow to \$30 billion. This means that more than ever, we're looking at our wrists not only to check the time, but also to see how much we've moved, monitor our heart rate, and see how we're stacking up against yesterday's tallies. As a result of our fitness tech addiction, we've lost awareness of what we're doing, how we're feeling, and what's going on around us. This is bad enough in the gym, but when we get outside, the constant checking of a tiny screen truly wreaks havoc, downgrading what should be a rich experience into yet another task we need to complete to meet our daily goals. And if we fall short, we feel inadequate. There's also the issue of data inaccuracy, with many device makers now admitting that their gadgets provide only estimates. So why do we continue to obsess over data and treat it as gospel truth? It's time to stop, take a breath, and hit the reset button in a big way. Unplugged provides a blueprint for using technology to meet your health and performance goals in a much smarter way, while reconnecting to your instincts and the natural world. In addition to sharing the performance expertise of Brian Mackenzie and the scientific insight of Dr. Andy Galpin, Unplugged features exclusive stories and advice from elite athletes and world-renowned experts like Laird Hamilton, Tim Ferriss, Kai Lenny, Kelly Starrett, Steven Kotler, Erin Cafaro, Lenny Wiersma, Dr. Frank Merritt, and Brandon Rager. Reading Unplugged will enable you to:

- Understand both the value and the limitations of technology in athletic performance, fitness, health, and lifestyle situations
- Know how and when to

utilize physical activity technologies in your everyday life—and when not to • Avoid the common mistakes that most people make with wearables and tracking apps • Understand which technologies and tests are most effective and which are a waste of money • End your addiction to fitness technology and start utilizing it as a tool for cueing, learning, and sensing instead of as a taskmaster that stresses you out • Improve self-awareness and increase self-reliance • Re-engage with nature by spending less time indoors and more time outside • Rediscover the value of coaches' expertise, curation, and intuition, which technology can't replace • Take back control of your health, fitness, and performance with the Unplugged training protocol

Body by Science

Allow your mind to function better and become a happier human being. Did you realize that a lot of emotions we experience are influenced by levels of oxytocin, serotonin, dopamine, and endorphins? If you could get more of those “happiness hormones,” it certainly would improve your temper and solidify the health of your brain, wouldn't it? Then don't wait and get this book so you can experience more joy in life by: Creating more happiness hormones. Relieving stress. Releasing more cuddly feelings. Increasing your energy. Improving your mood. Decreasing your chances of a depression. Having more rewarding feelings in what you do. Connecting to other people more intimately.

Christian Gratitude Journal

An award-winning entrepreneur and business coach outlines an easy-to-follow formula that helps you own your unique value, make more money, have more impact, and get more out of life--all without being pushy or sales-y. Meant for More is a How to Win Friends and Influence People for the modern age. It shows you how to stand out in an increasingly noisy world by simply offering your unique skills and talents and helping others do the same. It offers tangible skills to use in all areas of your life, including work, to increase your success and do good while you're at it. It speaks to people looking to leave the 9-to-5 for more freedom and fulfillment; stay-at-home moms going back to work; young Boomers worried they're too senior (and expensive) to find new jobs; idealistic Gen Xers and Millennials unwilling to toe the company line; and experts in any field who want to cash in on their expertise while making a difference. In Meant for More, an award-winning entrepreneur and business coach outlines the formula for getting the "more" you've been longing for: a proven system to sell yourself and your one-of-a-kind gifts to the people you were meant to help and reap the rewards that come when you stop giving away your gifts for free. The Meant for More Formula helps you upgrade your mind-set, unwrap your unique gifts, claim your value, and make irresistible offers so you can get what you're worth and make the difference you're here to make--in a way that isn't remotely pushy or sales-y. We all long for more: More impact. More success. More fulfillment. More abundance. More freedom. More joy. But it's not necessarily easy to fulfill this longing. We all know someone who clearly has so much to offer the world but who holds back out of fear--fear of failure, or of success; fear of putting herself "out there"; fear of being perceived as pushy or full of himself. Maybe that person is you.

The Immunity Code

Your fat is not your fault. Are you eating all the right things—low-fat yogurt, egg-white omelets, whole-grain bread, even tofu—but still can't lose the weight?

Your favorite "diet" foods may be to blame. In this groundbreaking program, nutrition and fitness expert JJ Virgin reveals the real secret behind weight gain—food intolerance. A negative reaction to certain foods like dairy or gluten can sabotage your health by triggering inflammation and causing a host of nasty symptoms like bloating, breakouts, headaches, achy joints and—worst of all—stubborn weight gain. On The Virgin Diet, you'll eat plenty of anti-inflammatory, healing foods to reclaim your health and reset your metabolism, while avoiding the 7 foods that are most likely to cause food intolerance. You'll never feel hungry or deprived, and in just one week, you'll drop up to 7 pounds, lose belly bloat, gain energy, clear up inflammation and look and feel years younger. And that's just the beginning!

Wisdom 2.0

Slow down the aging process and live well for longer Do you know exactly how and why you age? And what you can do— whatever your current age—to slow that process and have a longer, healthier life? In *The Longevity Code*, medical doctor Kris Verburgh illuminates the biological mechanisms that make our bodies susceptible to heart attacks, dementia, diabetes, and other aging-related diseases. With the facts laid out, he provides the tools we need to slow down the aging process. His scientifically backed Longevity Staircase outlines a simple yet innovative step-by-step method offering better health and a longer life span— especially the crucial role of proper nutrition and exercise. But diet and exercise might not be the only way to crack the “longevity code”: With each passing day, advances in biotechnology that were once the stuff of science fiction are emerging. Dr. Verburgh discusses how new types of vaccines, mitochondrial DNA, CRISPR proteins, and stem cells may help us slow and even reverse aging—now and in the future—and when paired with the right lifestyle, lead to longer, healthier lives than we’ve ever imagined.
