Eleven-year-old George has a dog, Bart, who seems to know everything about him—from when he is feeling sad to when he will arrive home from school. George's new neighbor and classmate, Lester, also has a dog, Bill Gates, and Lester thinks he is the smartest animal in the world. When their teacher assigns a school science project about animal behavior, George and Lester decide to conduct an experiment based on the world-famous Rupert Sheldrake's experiments about dogs. George even has an email exchange with Dr. Sheldrake to help him with the project—and he and Lester soon find out that, through a few simple experiments, kids can make scientific discoveries, too. This middle-grade boys and dogs story is inspired by Rupert Sheldrake's bestselling adult novel, *Dogs that Know When Their Owners Are Coming Home*.

AN INSTANT NEW YORK TIMES BESTSELLER The untold stories behind The Office, one of the most iconic television shows of the twenty-first century, told by its creators, writers, and actors When did you last hang out with Jim, Pam, Dwight, Michael, and the rest of Dunder Mifflin? It might have been back in 2013, when the series finale aired . . . or it might have been last night, when you watched three episodes in a row. But either way, long after the show first aired, it's more popular than ever, and fans have only one problem—what to watch, or read, next. Fortunately, Rolling Stone writer Andy Greene has that answer. In his brand-new oral history, *The Office: The Untold Story of the Greatest Sitcom of the 2000s*, Greene will take readers behind the scenes of their favorite moments and characters. Greene gives us the true inside story behind the entire show, from its origins on the BBC through its impressive nine-season run in America, with in-depth research and exclusive interviews. Fans will get the inside scoop on key episodes from "The Dundies" to "Threat Level Midnight" and "Goodbye, Michael," including behind-the-scenes details like the battle to keep it on the air when NBC wanted to pull the plug after just six episodes and the failed attempt to bring in James Gandolfini as the new boss after Steve Carell left, spotlighting the incredible, genre-redefining show created by the family-like team, who together took a quirky British import with dicey prospects and turned it into a primetime giant with true historical and cultural significance. Hilarious, heartwarming, and revelatory, *The Office* gives fans and pop culture buffs a front-row seat to the phenomenal sequence of events that launched *The Office* into wild popularity, changing the face of television and how we all see our office lives for

"A necessary reminder that whatever we are feeling, we are never feeling it alone." —Trista Mateer, author of Aphrodite Made Me Do It "There are defining moments in our lives that we often experience in certain places. It's in these places, that we feel particular emotions, which help shape who we become. For anyone whose emotions are tied to places, this book is for you."—Courtney Peppernell, author of Pillow Thoughts By the author of the wildly successful 2am Thoughts, comes Nineteen — titled after the poet's age when she wrote this new book. Nineteen is a collection of poetry that broaches heartbreak, love, loss, war, peace, and healing. For every place we go, there is a feeling or memory that's been painted on the walls. You can paint over it, but it will always be there. Even if you can't see it, you know. You can feel the heartbreak inside the bedroom where you lost a love. You can feel the hope at the coffee shop where a beginning happened. You can feel the healing as you sit in the driver's seat, in charge of your own life. "A journey. An exploration. A reminder to put one foot in front of the other even when it's dark because there is always a light waiting for you in the distance."—Wilder, Author of Nocturnal "In spare poems with aphoristic lines and short prose segments, the book speaks to adolescent pain and suffering."—Publishers Weekly Check out Makenzie Campbell's other hit poetry book 2am Thoughts

After twenty-five years in the Chicago police force and a bruising divorce, he just wants to build a new life in a pretty spot with a good pub where nothing much happens. But when a local kid whose brother has gone missing arm-twists him into investigating, Cal uncovers layers of darkness beneath his picturesque retreat, and starts to realize that even small towns shelter dangerous secrets. "One of the greatest crime novelists writing today" (Vox) weaves a masterful, atmospheric tale of suspense, asking what we sacrifice in our search for truth and justice, and what we risk if we don't.

Burn Book

Published in conjunction with the PEN American Center, *Burn This Book* is a powerful collection of essays that explore the meaning of censorship and the power of literature to inform the way we see the world, and ourselves. As Americans we often take our freedom of speech for granted. When we talk about censorship we talk about China, the former Soviet Union, or the Middle East. But recent political developments—including the passage of the Patriot Act—have shined a spotlight on profound acts of censorship in our own backyard. *Burn This Book* features a sterling roster of award-winning writers offering their incisive, uncensored views on this most essential topic, including such revered literary heavyweights as Toni Morrison, Salman Rushdie, Orhan Pamuk, David Grossman, and Nadine Gordimer, among others. Both provocative and timely, *Burn This Book* is certain to inspire strong opinions and ignite spirited, serious dialogue.

A journey through the attempts artists, scientists, and tinkerers have made to imagine and communicate with the otherworldly using various technologies, from cameras to radiowaves. Strange Frequencies takes readers on an extraordinary narrative and historical journey to discover how people have used technology in an effort to search for our own immortality. Bebergal builds his own ghostly gadgets to reach the other side, too, and follows the path of famous inventors, engineers, seekers, and seers who attempted to answer life's ultimate mysteries. He finds that not only are technological innovations potent metaphors keeping our spiritual explorations alive, but literal tools through which to experiment the boundaries of the physical world and our own psyches. Peter takes the reader alongside as he explores: * the legend of the golem and the strange history of automata; * a photographer who is trying to capture the physical manifestation of spirits; * a homemaker who has recorded voicemails from the dead; * a stage magician who combines magic and technology to alter his audience's consciousness; * and more.

Our brains are doing our best to help us out, but they can be real assholes sometimes. Sometimes it seems like your own brain is out to get you—melting down in the middle of the grocery store, picking fights with your date, getting you addicted to something, or shutting down completely at the worst possible moments. You already told your brain firmly that it isn't good to do these things. But your brain has a mind of its own. That's where this book comes in. With humor, patience, and lots of swearing, Dr. Faith shows you the science behind what's going on in your skull and talks you through the process of retraining your brain to respond appropriately to the non-emergencies of everyday life. If you're working to deal with old traumas, or if you just want to have a more measured and chill response to situations you face all the time, this book can help you put the pieces of the puzzle together and get your life and brain back. Here's an excerpt from the book: Knowing what's going on up in your brain is HUGE. So much of how we interact with the world around us is a completely normal response when we take into account our past experiences and how our brains work. • Freaking the fuck out • Avoiding important shit we need to take care of • Feeling pissed off all the time • Being a dick to people we care about • Putting shit in our bodies that we know isn't good for us • Doing shit we know is dumb or pointless None of these things are fucking helpful. But they all make sense. Your brain has adapted to the circumstances in your life and started doing things to protect you, bless it. It's not TRYING to fuck you over (even though it totally is, at times). As we navigate the world, nasty shit happens. The brain stores info about the nasty shit to try to avoid it in the future. Sometimes these responses are helpful. Sometimes the responses become a bigger problem than the actual problem was. It's called a trauma reaction. And even if you aren't dealing with a specific trauma? Adaptive coping strategies, bad habits, and funky behaviors all wire in similar ways. And research is showing that these issues are actually some of the easier ones to treat in therapy ... if we address what's really going on, rather than just the symptoms.

This introduction to modern geometry differs from other books in the field due to its emphasis on applications and its discussion of special relativity as a major example of a non-Euclidean geometry. Additionally, it covers the two important areas of non-Euclidean geometry, spherical geometry and projective geometry, as well as emphasising transformations, and conics and planetary orbits. Much emphasis is placed on applications throughout the book, which motivate the topics, and many additional applications are given in the exercises. It makes an excellent introduction for those who need to know how geometry is used in addition to its formal theory.
