Caring for Souls in a Neoliberal Age

What To Do When Machines Do Everything

Leading pastoral theologians explore a wide variety of themes related to pastoral practice. Pastoral Theology and Care: Critical Trajectories in Theory and Practice offers a collection of essays by leading pastoral theologians that represent emerging trajectories in the fields of pastoral theology and care. The topics explored include: qualitative research and ethnography, advances in neuroscience, care across pluralities and intersections in religion and spiritualities, the influence of neoliberal economics in socio-economic vulnerabilities, postcolonial theory and its implications, the intersections of race and religion in caring for black women, and the usefulness of intersectionality for pastoral practice. Each of the essays offers a richly illustrated review of a practice of pastoral care relationally and in the public domain. The contributions to this volume engage seven critical directions emerging in the literature of pastoral theology in the United States and internationally among pastoral and practical theologians. While coverage of these topics does not exhaust important points of activity in the field, it does represent especially promising resources for theory and practice. This important work: Offers unique coverage of new directions in the field Includes contributions from an exceptional group of experts who are noted leaders in their areas of study Introduces the newest perspectives on pastoral care and offers constructive proposals Filled with case illustrations that make chapters pedagogically useful, Pastoral Theology and Care is essential reading for faculty, seminarians and students in advanced degree programs, and pastors.

This volume offers a detailed analysis of how the current phase of capitalism is eating away at social, interpersonal, and psychological health. Drawing upon an interdisciplinary body of research, Bruce Rogers-Vaughn describes an emerging form of human distress—what he calls “third order suffering”—that is rapidly becoming normative. Moreover, this new paradigm of affliction is increasingly entangled with already-existing genres of misery, such as sexism, racism, and class struggle, mutating their appearances and mystifying their intersections. Along the way, Rogers-Vaughn presents stimulating reflections on how widespread views regarding secularization and postmodernity may divert attention from contemporary capitalism as the material origin of these developments. Finally, he explores his own clinical practice, which yields clues for addressing the double unconsciousness of third order suffering and outlining a vision for caring for souls in these troubling times.

The 16th and 17th centuries were the most fruitful periods for Spanish literature. The Golden Age of Spanish drama extends from the close of the 15th century to the death of Calderon in 1681. During that time, Spanish playwrights looked to Italy for inspiration, but from the beginning they sought to avoid slavish imitation of classical and Italian drama. Instead, these playwrights attempted to give Spanish drama its own identity. This reference includes alphabetically arranged essays for 19 of the most important Spanish dramatists of the Golden Age. Each essay provides extensive biographical information, a critical discussion of the playwright's dramatic production, a critical analysis of one major play, and a bibliography of primary and secondary sources. The volume closes with a selected general bibliography on the most important drama of this period.

In 1948, the world-renowned book designer Bruce Rogers wrote a brief text that documented and illustrated his creation of the Centaur typeface several decades earlier: *The Centaur Types*. The book was privately printed by Rogers himself under the name of his design studio, October House. This limited edition of the book was transferred to the Purdue University Libraries at the time of his death along with his other papers and books. Over the years remaining stock of the original private printing has found its home in the Special Collections of the Libraries, and although known as something of a collector's item by those who are aware of the few copies in circulation, it is here available to the general market for the first time in both paperback and digital versions. *The Centaur Types* is a fascinating book for several reasons: in the designer's own words, we learn of the evolution of the typeface and of his interest in the art and craft of creating type; it demonstrates different and comparable typefaces, and gives examples of Centaur from six to seventy-two point; and it stands as a fitting example of fine bookmaking from one of the master book designers of the twentieth century.

H & H's TOEFL Preparation CD-ROM

Roughly fifteen years after Gutenberg printed the first substantial book in Mainz in 1455, Nicolas Jenson of Venice produced what has been universally recognized among the most beautiful typefaces ever created. Based on the humanistic calligraphy of the Renaissance, an even and infinitely various set of lowercase letters that had evolved from the Carolingian minuscules of the ninth century, Jenson's types were a miracle of proportion and evenness of color. In the late nineteenth century, it was imitated by Morris in his Golden Type of 1892 (far too heavy), and in the next by Cobden-Sanderson with his Doves Type, Goudy with his Deepdene, and Hunter Middleton with his Eusebius. But it was really not until Bruce Rogers, following his stint at the Riverside Press in Cambridge, Massachusetts, where he first attempted a version of the type in his Montaigne font, tackled the challenge of creating a roman equal to (and in some ways surpassing) the Jenson original. The proof of his success is that it has been used, and held in high esteem, ever since. The story behind the type, the many permutations through which it went, the myths that accrued and surrounded it (many based on Rogers's somewhat erratic and chimerical memory) are all exposed in this fully documented account of the type's genesis and development. All the variations are included, from the 16-pt. roman originally produced for the exclusive use of the Metropolitan Museum of Art, to its conversion to the Monotype machine under the supervision of Stanley Morison, a typewriter version, a short-lived film version, and its ultimate appearance as a digital face. Included as well is a discussion of the Arrighi italic, developed to accompany the roman by Frederic Warde and Stanley Morison at the Monotype Corporation. The book has been designed and set in a new digital version of Centaur, often and justly called "the noblest roman of them all," created by Jerry Kelly. The authors have unearthed, mined, and refined a trove of typographic material to create the definitive history of what many consider the most beautiful typeface created by an American in the last century and used, to immortal effect, in two of the century's greatest books, T.E. Lawrence's *Odyssey of Homer* and the Oxford Lectern Bible. Illustrated with many examples in full color, with a dust jacket printed letterpress, issued in an edition of only 1,000 copies, this is a book no certified member of the lunatic fringe of type fanatics can afford to ignore.

500 Beautiful Words You Should Know

Writing French Algeria is a groundbreaking study of the European literary discourse on French Algeria between the conquest of 1830 and the outbreak of the Algerian War in 1954. For the first time in English, this intertextual reading reveals the debate conducted within Algeria - and between colony and metropole - that aimed to forge an independent cultural identity for the European settlers. Through astute discussions of various texts, Peter Dunwoodie maps the representation of Algeria both in the dominant nineteenth-century discourse of Orientalism, via the *littérature d'escale* of writers such as Gautier or Fromentin, and in the colonial writing of Louis Bertrand, Robert Randau, and the `Algerianists' who played a critical role in the construction of the new

`Algerian'. Dunwoodie shows how this ultimate construction relied on an extremely selective process which marginalized the indigenous people of the Maghreb in order to rediscover the country's `Latin' roots. The book also focuses on the dialogism operative in the works of École d'Alger writers like Gabriel Audisio, Albert Camus, and Emmanuel Roblès, interrogating the way in which their voices countered the closure of those earlier strategies and yet still articulated the unresolvable dilemma of an inherently unstable and impermanent minority whose identity remained grounded in otherness.

From the big bang, to the origin and evolution of intelligent life in a search for the meaning of human existence, *Why are We Here?*, by author Bruce Brodie, offers a look at evolution and the future of life on the planet. Through many years of research and study, Brodie addresses a host of questions: □ How did chemistry come to life? □ How did the release of oxygen by cyanobacteria change the natural history of life? □ How did mass extinctions reset the clock and reshape the course of biological evolution? □ Why are homo sapiens so dominant? □ Why do humans build vast civilizations, while chimps, with whom we share more than 98 percent of our DNA, are confined to forests and experimental laboratories and zoos? □ How will cultural and technological evolution, which have transcended the slow pace of biological evolution, shape the future of life on the planet? □ Can we escape the many existential threats that hover over us? *Why are We Here?* offers a new perspective on how we think about the world, and our place and our purpose in the universe and the

future of humanity. It presents a lasting sense of the amazing wonder and mystery of life.
