Crossing an Ocean Under Power follows a retired software entrepreneur and his computer game designer wife, as they cross the Atlantic on their 62' trawler. Although sailors have been crossing oceans for hundreds of years, the era of couples cruising the world in small powerboats is just beginning. As the book begins, Mr. Williams frankly admits to serious doubts about his boating skills. Mr. Williams chronicles his journey across the Atlantic, as well as his personal journey from "coastal cruiser" to "ocean crosser." Along the way, we learn with him. Sans Souci, his boat, made the trip as part of the historic first Atlantic Power Boat rally (18 small power boats, averaging only 50 feet long, owned and captained mostly by retired couples.) Best described as a "Dummy's Guide to Crossing Oceans," Mr. Williams' honest, and entertaining, style will keep you turning pages as you take this important step in readying yourself for your own long-distance cruising.

★★ Buy the Paperback version of this book and get the eBook version included for FREE ★★ Owning a yacht is great fun and there are a lot of good experiences to be had. However, you want to be aware of all the financial and logistical challenges before you take a plunge into the world of yachting. Showing you what you need to know and prepare for before you can get to the fun part of yachting is what this book is all about. Owning and handling a yacht is no small feat. Yachts can vary in price from a couple of thousand dollars to millions. No matter which option you choose, even the most affordable yachts come with maintenance. The truth is that yachts will be in the water pretty much the whole time and that continuous contact with the water inevitably leaves a mark through salt and other minerals. It's not all about maintenance. Licenses and permits are additionally something you need to take into account. You also want to make sure that you have a port where you can keep your yacht. In this book you can expect to learn about: -How to buy a yacht successfully -How to lease a yacht, or even get it for free -How to make sure that you and all of the people with you are safe while on a yacht -Cool yachting events and locations to check out -And much more! Owning a yacht could be a source of great

The aim of this book is to enable novices to cruise safely and enjoyably. It will cover the preparations needed before undertaking a cruise, operating the boat under different and sometimes challenging conditions, how to cope when things go wrong, how to conform to the rules and regulations, and how to navigate. It conveys the advice and information just as the cruiser will encounter it on passage - from setting off to arriving at their destination (rather than compartmentalised into navigation/weather/engine etc). Topics include: Preparing to cruise (weather forecasts, route planning, checklists); Leaving harbour (harbour entrances, radio contact, setting courses and speeds, crew briefing, food and drink); Assessing weather and sea conditions (fine tuning plans); Watch keeping under way (visual and electronic navigation, coping with alarms); Entering harbour (planning ahead, radio channels, finding an anchorage, speeds); Cruising at night and in fog (lights, radar, shipping lanes, stopping distance); Adventurous cruising (navigating inshore, beach landing, hidden dangers); Fuel management and economy (economical speeds, boat trim, reserves); Comfort on board (cooking and sleeping at sea, security); When things go wrong (potential problems, safety equipment, coping with fire, leaks, grounding, engine problems, calling for help); Rules and regulations (collision regulations, traffic lanes, going foreign, qualifications). Aimed at owners of powerboats and motor cruisers between 25 and 65ft, the book will be entirely practical, with checklists, sidebars and box-outs and many diagrams and photos.

clear . . ." --John Vigor, author of *The Seaworthy Offshore Sailboat*
"The nautical tips and techniques presented are encyclopedic, yet the clear explanations demystify the topics . . ." -- Don Launer, contributing editor for *Good Old Boat* magazine "It is a fine piece of work and should be read by anyone contemplating coastal cruising or blue water voyages. It definitely deserves a place in the offshore yacht's library . . ." --Ted Brewer, yacht designer, author, and offshore racing and cruising sailor
Be a Better Skipper In the night, wind, rain, fog, big seas, strong currents, or congested waters, when there's no time for textbook seamanship solutions, what you need are shortcuts and techniques that work quickly and reliably every time. Distilled from the vast accumulated lore of seamanship and navigation, here are the absolute essentials--185 techniques that work without fail in the pilothouse or the exposed cockpit or flying bridge of a shorthanded sail- or powerboat. John Jamieson shows you how to: Set up a clipboard chart table for cockpit use Avoid hazards with danger bearings or a GPS grid highway Estimate current speeds with the 50-90-100 rule Track other boats in poor visibility using radar plots and bearing drift Sail home without a rudder or get your twin-screw boat home on one working engine Dock or anchor under any conditions And much, much more Even in this age of electronic navigation you need to know how to eyeball your boat through any situation. Each of the techniques in this cut-to-the-chase book has shown itself to be absolutely repeatable. It will work this time, the next time, and the time a er that, in conditions fair or foul.

Coastal Cruising Under Power is your ultimate companion for exploring the coastal waters of North America with confidence in your powerboat. This beautifully illustrated guide provides countless tips on anchoring, piloting, weather, and more, along with in-depth, step-by-step instructions on numerous specific skills and techniques.

Voyaging Under Power, 4th Edition

The official learn-to-sail manual of the American Sailing Association and the United States Coast Guard Auxiliary, with over 150 line drawings and photographs. Written by America's foremost instructional authority, the new edition of Sailing Fundamentals combines the training programs of the American Sailing Association and the United States Coast Guard Auxiliary. The official learn-to-sail manual of the American Sailing Association, it is also used in the programs of many yacht clubs, colleges, and sailing groups. Unlike most introductory sailing books, which reflect the biases and idiosyncrasies of their authors, Sailing Fundamentals has been extensively pretested by ASA professional instructors to ensure that it offers the fastest, easiest, most systematic way to learn basic sailing and basic coastal cruising. This book covers every aspect of beginning sailing—from hoisting sail to docking and anchoring—and specifically prepares the learner to qualify for sailing certification according to international standards. Widely acclaimed author Gary Jobson has won several major races, including the 1977 America's Cup victory as tactician aboard Courageous. He was head sailing coach at the US Naval Academy, and has conducted sailing clinics across the country.

The passagemaking bible updated to help you live your long-distance voyaging dreams First published in 1975, Robert Beebe's *Voyaging Under Power* revolutionized long-distance cruising, encouraging powerboaters to enjoy what was once exclusive to sailboats and their crews: crossing oceans to exotic, interesting, and beautiful places in comfort with a minimum of problems and expense. Now power-cruising couple Denis and Mary Umstot, whose interest in power voyaging was ignited by Beebe's work, have updated *Voyaging Under Power* for the twenty-first century. The much anticipated *Voyaging Under Power, Fourth Edition*, includes Beebe's original wisdom and philosophy of passagemaking, as well as his groundbreaking thoughts on vessel stability and fuel monitoring. Fourteen new chapters provide insights into a range of additional topics vital for ocean passages and passagemakers, including: Seaworthiness, stability, and other design concepts Options for stabilizing passagemakers including paravanes, active and passive fins, and antiroll tanks Selecting and understanding the critical systems for long-distance voyaging A decision process for choosing a new boat or analyzing the suitability of a used boat An examination of passagemaking models from Nordhavn, Kadey-Krogen, Seahorse, and Dashew, as well as the designs of Stephen Seaton, Michael Kasten, George Buehler, Dave Gerr, and others Highlights of successful and proven passagemakers of the past, including examples from eleven builders and designers First-hand accounts from passagemakers around the globe, including the Mediterranean, Black Sea, South America, South Pacific, Madagascar, and beyond Tips on understanding and predicting weather and waves and what to do in a storm Understanding offshore safety issues, including how to avoid trouble and cross oceans in comfort Choosing and training crew as well as communication tips for a better cruising experience Preparing for and resolving maintenance problems at sea and in distant anchorages "The list of contributors shows the quality of experience in the pages of this fourth edition. Anyone wanting to join, or at least understand the elements of, the long-distance passagemaking lifestyle will find a great deal of knowledge that is realistic, useful, and timely. You'll keep *Voyaging Under Power* on your pilothouse bookshelf (or its electronic equivalent) for years to come." -- Bill Parlatore, Founder of PassageMaker Magazine "Captain Beebe applied Navy experience, technical creativity, and an open mind to his self-appointed task of inventing the long-range power cruiser.

He embraced ideas that others discarded as readily as he rejected solutions others found indispensable. His path, like all innovators, was the uncommon one and his selfless sharing in *Voyaging Under Power* literally launched a thousand ships. This Fourth Edition of Beebe's classic draws on new ideas and the accumulated wisdom of today's yacht designers and experienced ocean voyagers to further Beebe's cause and liberate thousands more from the tyranny of dry land." -- Michael Jones, Ocean Traveler, Ship Design Collaborator, and Proud Parent of Google Earth
