### Between Two Worlds

Sun Ra, Brian Eno, Lee Perry, Kate Bush, Kraftwerk, Aphex Twin, Ryuichi Sakamoto and Brian Wilson are interviewed in this extraordinary work of sonic history. It travels from the rainforests of Amazonas to virtual Las Vegas; from David Lynch's dream house high in the Hollywood Hills to the megalopolis of Tokyo. Ocean of Sound begins in 1889 at the Paris exposition

when Debussy first heard Javanese music performed. An ethereal culture developed in response to the intangibility of 20th century communications. Author of Rap Attack 3 and Exotica, David Toop has in Ocean of Sound written an exhilarating, path-breaking account of ambient sound.

It is a mighty, life-affirming work that sheds light on all the ordinary and extraordinary ways we are connected. Like she did with *Encyclopedia of an Ordinary Life*, Amy Krouse Rosenthal ingeniously adapts a standard format--a textbook, this time--to explore life's lessons and experiences into a funny, wise, and poignant work of art. Not exactly a memoir, not just a collection of observations, *Textbook* Amy Krouse Rosenthal is a beautiful exploration into the many ways we are connected on this planet and speaks to the awe, bewilderment, and poignancy of being alive. "a groundbreaking new twist on the traditional literary experience *Textbook* is a delightful collection of interesting scenarios that directly point to life lessons. Rosenthal manages to spotlight grand moments and everyday moments with equal curiosity, proving that it can be both a privilege -- and petrifying -- to peek into one's humanity."--Associated Press "Rosenthal is a marvel a talented storyteller with an experimental flair for formatting This engaging, playful, and clever glimpse into one woman's life offers lots of photographs, graphic illustrations, and diagrams, resulting in a book that will make readers smile as their notions of story delivery expand." --Booklist

## The New Yorker

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney ' s films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. We follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experience may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

## Mondrian, the Diamond Compositions

Named one of the Ten Best Books of 2016 by the New York Times, a spirited account of a major intellectual movement of the twentieth century and the revolutionary thinkers who came to shape it, by the best-selling author of *How to Live* Sarah Bakewell. Paris, 1933: three contemporaries meet over apricot cocktails at the Bec-de-Gaz bar on the rue Montparnasse. They are the young Jean-Paul Sartre, Simone de Beauvoir, and longtime friend Raymond Aron, a fellow philosopher who raves to them about a new conceptual framework from Berlin called Phenomenology. "You see," he says, "if you are a phenomenologist you can talk about this cocktail and make philosophy out of it!" It was this simple phrase that would ignite a movement, inspiring Sartre to integrate Phenomenology into his own French, humanistic sensibility, thereby creating an entirely new philosophical approach inspired by themes of radical freedom, authentic being, and political activism. This movement would sweep through the jazz clubs and cafés of the Left Bank before making its way across the world as Existentialism. Featuring not only philosophers, but also playwrights, anthropologists, convicts, and revolutionaries, *At the Existentialist Café* follows the existentialists' story, from the first rebellious spark through the Second World War, to its role in postwar liberation movements such as anti-colonialism, feminism, and gay rights. Interweaving biography and philosophy, it is the epic account of passionate encounters--fights, love affairs, mentorships, rebellions, and long partnerships--and a vital investigation into what the existentialists have to offer us today, at a moment when we are once again confronting the major questions of freedom, global responsibility, and human authenticity in a fractious and technology-driven world.

## Sketch Book

Suggesting that the contention that phonemic awareness must be taught directly and that children need explicit systematic instruction in phonics is less of a scientific "fact" than an exercise in political persuasion, this book presents the story of the political campaign that is taking place to change the minds of Americans about how young children learn to read. The book begins with a close look at the empirical research being used to support a massive shift in the national understandings about language, literacy, and learning and concludes by revealing the ways in which research studies on early reading instruction are being used by the federal and state governments to support a new methodology that has turned early reading instruction into "a massive business of unprecedented commercial worth." The chapters in the book are: (1) In Which We Are Told Training in Phonemic Awareness Is the Key to Reading Success; (2) In Which Phonemic Awareness Research Is Analyzed from an Experimental Psychological Perspective; (3) In Which Phonemic Awareness Research Is Analyzed from a Sociocultural Perspective; (4) In Which We Find Foorman's Research Does Not Support the NICHD [National Institute of Child Health and Human Development] Proposition That "Phonological Processing Is the Primary Area Where Children with Reading Difficulties Differ from Other Children"; (5) In Which Teachers Are Turned into Clerks and We Discuss Power, Privilege, Racism and Hegemony; (6) In Which Governor Bush's Business Council Holds a Pre-Summit Meeting in Texas; (7) In Which We Have an "If-They-Say-It's-So-It-Must-Be-So" Attitude toward Experimental Research; (8) In Which the Kindergarten Children in North Carolina Are No Longer Expected To Try To Read and Write; (9) In Which I Become the Documentation on Which I Build My Case; (10) In Which We Are Told That in America We Are All Equal. Are We or Aren't We?; (11) In Which We Find the Desks

and Chairs Are Broken and the Toilets Don't Work; (12) In Which We Ask: Do You Think America Likes Children?; (13) In Which We Consider If We Are Comfortable Mandating Reading Programs based on Neuroimaging Research and Genetic Studies of Reading Disabilities; (14) In Which California Politically Reinvents How Young Children Learn To Read; (15) In Which California Ends Local Control and the State Board of Education Leads the Jihad; and (16) In Which We Enter the Central Chamber of the Hegemonic Labyrinth. (Contains approximately 250 references; an appendix that offers a response to preliminary statistical analyses used to support the nationally publicized findings of the NICHD Houston reading studies, and an appendix that offers "late-breaking" news about the NICHD Houston reading studies are attached.) ## Imagine

Cormac McCarthy told an interviewer for the New York Times Magazine that "books are made out of books," but he has been famously unwilling to discuss how his own writing draws on the works of other writers. Yet his novels and plays masterfully appropriate and allude to an extensive range of literary works, demonstrating that McCarthy is well aware of literary tradition, respectful of the canon, and deliberately situating himself in a knowing relationship to precursors. The Wittliff Collection at Texas State University acquired McCarthy's literary archive in 2007. In *Books Are Made Out of Books*, Michael Lynn Crews thoroughly mines the archive to identify nearly 150 writers and thinkers that McCarthy himself references in early drafts, marginalia, notes, and correspondence. Crews organizes the references into chapters devoted to McCarthy's published works, the unpublished screenplay *Whales and Men*, and McCarthy's correspondence. For each work, Crews identifies the authors, artists, or other cultural figures that McCarthy references; gives the source of the reference in McCarthy's papers; provides context for the reference as it appears in the archives; and explains the significance of the reference to the novel or play that McCarthy was working on. This groundbreaking exploration of McCarthy's literary influences—impossible to undertake before the opening of the archive—vastly expands our understanding of how one of America's foremost authors has engaged with the ideas, images, metaphors, and language of other thinkers and made them his own.
