Tulipomania

The aftershocks of the 2008 financial crisis still reverberate throughout the globe. Markets are down, unemployment is up, and nations from Greece to Ireland find their very infrastructure on the brink of collapse. There is also a crisis in the management of global affairs, with the institutions of global governance challenged as never before, accompanied by conflicts ranging from Syria, to Iran, to Mali. Domestically, the bases for democratic legitimacy, social

sustainability, and environmental adaptability are also changing. In this unique volume from the World Public Forum Dialogue of Civilizations and the Social Science Research Council, some of the world's greatest minds—from Nobel Prize winners to long-time activists—explore what the prolonged instability of the so-called Great Recession means for our traditional understanding of how governments can and should function. Through interviews that are sure to spark lively debate, *22 Ideas to Fix the World* presents both analysis of past geopolitical events and possible solutions and predictions for the future. The book surveys issues relevant to the U.S., Europe, Asia, Africa, and the Middle East. Speaking from a variety of perspectives, including economic, social, developmental, and political, the discussions here increase our understanding of what's wrong with the world and how to get it right. Interviewees explore topics like the Arab Spring, the influence of international financial organizations, the possibilities for the growth of democracy, the acceleration of global warming, and how to develop enforceable standards for market and social regulation. These inspiring exchanges from some of our most sophisticated thinkers on world policy are honest, brief, and easily understood, presenting thought-provoking ideas in a clear and accessible manner that cuts through the academic jargon that too often obscures more than it

at every mention of politics or religion dividing us into two hostile camps on every possible side? So are we! We're looking for others who want to change the dialogue from the rhetoric of polarizing animosity that is destroying the social fabric of our nation to a language of healing, where honest differences don't have to destroy friendships. Then we can seek a broader common ground through mutual respect and compassion. The Language of Healing will help you learn how to . . . See disagreement as an opportunity for growth and discovery. Change the temper of a hostile engagement or walk away. Share mutual respect even beyond our deepest differences. Become a peacemaker in your network of friends and family. The book is divided into three main sections: An Opportune Moment. Why is this a particularly propitious moment to elevate the conversation, at least for the vast majority of Americans who are tired of those who manipulate them through fear and anger? Five Practices of a Peacemaker. What kind of conversation can lower the heat and increase the level of communication, especially where we hold significantly different views? Operating in Shared Space. Our deeply held views do not have to be subjugated to cooperate with others; we only have to endeavor to make as much space for their views as we want for ours. The end of each chapter includes three practical suggestions readers can use to practice the language of healing in their own day-to-day interactions.

This book explores the contours of a transformational sociology which seeks to reconsider the horizons of sociological imagination. It questions accepted modernist assumptions such as the equation of society and nation-state, the dualism of individual and society and that of ontology and epistemology. Arguing that contemporary sociology suffers from what Ulrich Beck calls the Nato-like fire power of western sociology, it argues that sociology has to open itself to transcivilizational dialogues and planetary conversations about self, culture and society. The book also challenges scholars to go beyond a privileging of the post-traditional telos of modernist sociology and puts forward a foundational interrogation of modernist sociology. It underscores the limitations of established conventions of sociology and considering an alternative sociology based upon Confucian vision and practice of self-transformation. This collection offers a way to go beyond dominant structures of modern sociology and contemporary dominant ways of thinking about and doing sociology helping us cultivate a transdisciplinary sociology.

Conversations on the Plurality of Worlds

'A fascinating exploration of human greed and self-delusion and also a tribute to our ageless search for beauty' DEBORAH MOGGACH. In 1630s' Holland thousands of people, from the wealthiest merchants to the lowest street traders, were caught up in a frenzy of buying and selling. The object of the speculation was not oil or gold, but the tulip, a delicate and exotic bloom that had just arrived from the east. Over three years, rare tulip bulbs changed hands for sums that would have bought a house in Amsterdam: a single bulb could sell for more than £300,000 at today's prices. Fortunes were made overnight, but then lost when, within a year, the market collapsed. Mike Dash recreates this bizarre episode in European history, separating myth from reality. He traces the hysterical boom and devastating bust, bringing to life a colourful cast of characters, and beautifully evoking Holland's Golden Age.

How can we agree to disagree in today's pluralistic society, one in which individuals and groups are becoming increasingly polarized by fierce convictions that are often at odds with the ideas of others? *Civil Disagreement: Personal Integrity in a Pluralistic Society* shows how we can cope with diversity and be appropriately open toward opponents even while staying true to our convictions. This accessible and useful guide discusses how our conversations and arguments can respect differences and maintain personal integrity and civility even while taking stances on disputed issues. The author examines an array of illustrative cases, such as debates over slavery, gay marriage, compulsory education for the Amish, and others, providing helpful insights on how to take firm stands without denigrating opponents. The author proposes an approach called "perspective pluralism" that honors the integrity of various viewpoints while avoiding the implication

that all reasonable views are equally acceptable or true. Civil Disagreement offers a concise yet comprehensive guide for students and scholars of philosophical or religious ethics, political or social philosophy, and political science, as well as general readers who are concerned about the polarization that often seems to paralyze national and international politics.

Saturation

"The art world is white. In this volume, contributors from different disciplines and backgrounds discuss race, diversity, and inclusion through the lens of "saturation," in art and across institutions written large. The concept of saturation stems from color theory—for Isaac Newton, the centrality of the color white to his visual theory parallels an understanding of race as its periphery in Western thought. From visual saturation to oversaturation of the bodies of minorities as they have to navigate and exist within institutions, this volume employs saturation as a rubric to ask different questions and to push us to demand more from the ways institutions normatively function and how race has come to be imagined and understood. The essays and conversations are the result of a shared curiosity over why changes in representational practices (some at very early stages of

saturation and others leading to oversaturation) have not led to any substantive structural change. Much of this book contends with political economy and racial capital to help grapple with institutional critique. Because of the need to center these questions in time and space, the book is organized in two major sections: 1) The Saturation of Institutional Life: Race, Globality, and the Art Market; and 2) Methods of Racial Matter and Saturation Points. This is the fourth volume in the New Museum Critical Anthologies in Art and Culture series. It includes Sarah Haley's essay on the relationship between carceral landscapes and the gendered dimensions of racial capitalism, a conversation between philosophers Denise Ferreira da Silva and Phanael Antwi moderated by coeditor C. Riley Snorton, about modes for thinking race transnationally and in terms of structures-material, poetic, and affective. In artist Candice Lin's chapter on aesthetics of colonization, she discusses how histories of colonial violence inform her artistic practice. Sarah Schulman highlights the dynamics of navigating the publishing industry as it relates to areas considered "niche" like sexuality, race, and gender. Performance and movement theorist Jasmine Elizabeth Johnson examines the corporeal, visual, and institutional structures that delimit the legibility of the black body, and artist Byron Kim contemplates his practices and methods as they relate to formalism that simultaneously is and is not

A Discovery of New Worlds

This book is a defense of modal realism; the thesis that our world is but one of a plurality of worlds, and that the individuals that inhabit our world are only a few out of all the inhabitants of all the worlds. Lewis argues that the philosophical utility of modal realism is a good reason for believing that it is true.

In this charming and witty dialogue translated by the first professional woman writer in English, a 17th century astronomer staying at the chateau of a beautiful Marchioness accompanies her into her garden at night and introduces her to the new discoveries of astronomy Although more than 300 years old, Fontenelle's dialogues in

a garden over five nights are still a surprisingly painless way to learn about the sun, the moon, the planets, and the stars, even though new planets were later discovered and modern science has filled out many details Fontenelle could not have known. Only the confidence with which he discusses inhabitants of the planets, the moon, and even the sun is now seen as misplaced. This is no lecture, but a conversation with the cut and thrust of intelligent argument as the Marchioness challenges each of the astronomer's assertions and requires him to explain the evidence. Fontenelle's work has been through the hands of many different translators, but Aphra Behn's translation, one of the earliest, adds the feminine wit of a leading dramatist to the work, in the first modern edition of this translation.

Public service broadcasting is in the process of evolving into "public service media" as a response to the challenges of digitalization, intensive competition, and financial vulnerability. While many commentators regard public service as being in transition, a central dimension of its mission--to integrate and unify the nation while respecting and representing plurality--is being reemphasized and relegitimated in a political climate where the politics of migration and cultural diversity loom large in public debate. Violence and Islam

In this important new book, Nancy Fraser and Rahel Jaeggi take a fresh look at the big questions surrounding the peculiar social form known as “capitalism,” upending many of our commonly held assumptions about what capitalism is and how to subject it to critique. They show how, throughout its history, various regimes of capitalism have relied on a series of institutional separations between economy and polity, production and social reproduction, and human and non-human nature, periodically readjusting the boundaries between these domains in response to crises and upheavals. They consider how these “boundary struggles” offer a key to understanding capitalism’s contradictions and the multiple forms of conflict to which it gives rise. What emerges is a renewed crisis critique of capitalism which puts our present conjuncture into broader perspective, along with sharp diagnoses of the recent resurgence of right-wing populism and what would be required of a viable Left alternative. This major new book by two leading critical theorists will be of great interest to anyone concerned with the nature and future of capitalism and with the key questions of progressive politics today.

In *Goddess and God in the World*, leading theologians Carol P. Christ and Judith Plaskow debate the nature of divinity, proposing a new method called embodied theology. They agree that the transcendent, omnipotent male God of traditional theology must be reimagined. Carol proposes that Goddess is the intelligent embodied love that is in all being. Judith counters that God is an impersonal power of creativity that includes both good and evil. Rooting their views in experience and questioning each other, they offer a fruitful model of theological conversation across difference.

In this landmark volume, Blanchot sustains a dialogue with a number of thinkers whose contributions have marked turning points in the history of Western thought and have influenced virtually all the themes that inflect the contemporary literary and philosophical debate today.

Civil Disagreement

For anyone who has ever felt like they don't belong, Sigh, Gone shares an irreverent, funny, and moving tale of displacement and assimilation woven together with poignant themes from beloved works of classic literature. In 1975, during the fall of Saigon, Phuc Tran immigrates to America along with his family. By sheer chance they land in Carlisle, Pennsylvania, a small town where the Trans struggle to

assimilate into their new life. In this coming-of-age memoir told through the themes of great books such as *The Metamorphosis*, *The Scarlet Letter*, *The Iliad*, and more, Tran navigates the push and pull of finding and accepting himself despite the challenges of immigration, feelings of isolation, and teenage rebellion, all while attempting to meet the rigid expectations set by his immigrant parents. Appealing to fans of coming-of-age memoirs such as *Fresh Off the Boat*, *Running with Scissors*, or tales of assimilation like Viet Thanh Nguyen's *The Displaced* and *The Refugees*, *Sigh, Gone* explores one man's bewildering experiences of abuse, racism, and tragedy and reveals redemption and connection in books and punk rock. Against the hairspray-and-synthesizer backdrop of the '80s, he finds solace and kinship in the wisdom of classic literature, and in the subculture of punk rock, he finds affirmation and echoes of his disaffection. In his journey for self-discovery Tran ultimately finds refuge and inspiration in the art that shapes—and ultimately saves—him.

Context, Plurality, and Truth

our air, and from there, through their curiosity to see us, they angled for us like fish? Would that please you?" asks the philosopher. "Why not?" the Marquise replies. "As for me, I'd put myself into their nets of my own volition just to have the pleasure of seeing those who caught me." In this imaginary conversation of three hundred years ago, readers can share the excitement of a new, extremely daring view of the universe. *Conversations on the Plurality of Worlds* (*Entretiens sur la pluralité des mondes*), first published in 1686, is one of the best loved classics of the early French enlightenment. Through a series of informal dialogues that take place on successive evenings in the marquise's moonlit gardens, Fontenelle describes the new cosmology of the Copernican world view with matchless clarity, imagination, and wit. Moreover, he boldly makes his interlocutor a woman, inviting female participation in the almost exclusively male province of scientific discourse. The popular Fontenelle lived through an entire century, from 1657 to 1757, and wrote prolifically. H. A. Hargreaves's fresh, appealing translation brings the author's masterpiece to new generations of readers, while the introduction by Nina Rattner Gelbart clearly demonstrates the importance of the *Conversations* for the history of science, of women, of literature, and of French civilization, and for the popularization of culture.

Sigh, Gone

The world has shrunk in the processes of globalization, and the old ways of actively ignoring plurality in theology are no longer viable. Contextual differences between different Christian traditions and theologies are highly visible due to improved communications and migration. These differences also witness that this plurality has existed since the very beginning of Christianity. Religious studies demonstrate that no religion is pure and hermetically sealed from others, but they all are syncretistic in the sense of giving and taking. In the world of religions, where boundaries are porous and the internal plurality of Christianity is vast, there is a temptation either to reject the plurality in a fideistic manner or succumb to relativism. The first solution is intellectually hard to defend, and relativism is often seen as detrimental to Christian identity. This book proposes a way of recognizing the contextual and syncretistic dimensions of pluralism while not surrendering to relativism. Christian identity and tradition can be affirmed while staying open to the challenges of pluralism.

Adonis' influence on Arabic literature has been likened to that of T. S. Eliot in the English-speaking world. Yet alongside this spearheading of a modernist literary revolution, the secular Syrian-born poet is also renowned for his persistent and staunch attacks on despotism across the Arab world. In these conversations with the psychoanalyst Houria Abdelouahed, Adonis brings into sharp relief the latest wave of violence and war to engulf Arabic countries, tracing the cause of ongoing tensions back to the beginnings of Islam itself. Since the death of the prophet Muhammad, Islam has been used as a

political and economic weapon, exploiting and reinforcing tribal divisions to aid the pursuit of power. Adonis argues that recent events in the Middle East - from the failures of the Arab Spring to the rise of ISIS and the bloody war in his native Syria - attest to the destructive effects of an Islamic worldview that prohibits any notion of plurality and breeds violence. If there is to be any hope of peace or progress in the Arab world, it is therefore imperative that these mentalities are overcome. In their place, Adonis urges a new spirit of enquiry, embodied in the freedoms to interrogate the past and to question cultural norms. Adonis' penetrating analysis comes at a critical time, offering an alternative path to the cycle of violence that plagues the Arab world today.

such setting in northern Michigan. Berghoef contends that for too long the church has insisted on setting the terms for how one can find and encounter God. Yet what if God is to be found in places we haven't been looking at all: in a coworker who doesn't believe in God, in a Buddhist neighbor, in a friend who prefers a yoga studio to a sanctuary? This book will move readers to shift toward a more chastened, humble, and inviting faith. A faith that seeks not to teach, but to learn; not to speak, but to listen. A faith that will have a seat at the table in the important religious conversations our world is having. Real-life stories gleaned from conversations and encounters during pub theology gatherings, combined with the author's own experience in grappling with these issues, make for an intriguing and enlightening read. So what are you waiting for? Pull up a chair and join the conversation!
