The Consequences of Chaos

Creation and access to green spaces promotes individual human health, especially in
therapeutic contexts among those suffering traumatic events. But what of the role of access to
green space and the act of creating and caring for such places in promoting social health and

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

well-being? Greening in the Red Zone asserts that creation and access to green spaces confers resilience and recovery in systems disrupted by violent conflict or disaster. This edited volume provides evidence for this assertion through cases and examples. The contributors to this volume use a variety of research and policy frameworks to explore how creation and access to green spaces in extreme situations might contribute to resistance, recovery, and resilience of social-ecological systems.

The Wild Trees

Terrorism! Refugees Crises! Civil Wars! Political extremism, dysfunction, and corruption! What if the growing chaos around the world today is far more significant than we are being led to believe? In this one of a kind in-depth analysis of current events, JB Shreve explains that we are witnessing a turning point in the history of the world. We are witnessing the end of the world! This is not a doomsday prediction. It is a simple accounting of facts. By analyzing basic elements of our global system such as food, water, and population distribution, this book details how it is impossible for the world to continue on its current trajectory for another 50 years. We have already passed the threshold and the growing chaos we are experiencing today is the unfolding story of our world coming undone. Things are not going to get better. They are going to get much, much worse.

The Upswing

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

The massive dimensions of Syria's refugee crisis—and the search for solutions The civil war in Syria has forced some 10 million people—more than half the country's population—from their homes and communities, creating one of the largest human displacements since the end of World War II. Daily headlines testify to their plight, both within Syria and in the countries to which they have fled. The Consequences of Chaos looks beyond the ever-increasing numbers of Syria's uprooted to consider the long-term economic, political, and social implications of this massive movement of people. Neighboring countries hosting thousands or even millions of refugees, Western governments called upon to provide financial assistance and even new homes for the refugees, regional and international organizations struggling to cope with the demands for food and shelter—all have found the Syria crisis to be overwhelming in its challenges. And the challenges of finding solutions for those displaced by the conflict are likely to continue for years, perhaps even for decades. The Syrian displacement crisis raises fundamental questions about the relationship between action to resolve conflicts and humanitarian aid to assist the victims and demonstrates the limits of humanitarian response, even on a massive scale, to resolve political crises. The increasingly protracted nature of the crisis also raises the need for the international community to think beyond just relief assistance and adopt developmental policies to help refugees become productive members of their host communities.

“The ultimate truffle true crime tale”*: A thrilling journey through the hidden underworld of the

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

world's most prized luxury ingredient. *Bianca Bosker, New York Times bestselling author of *Cork Dork* Beneath the gloss of star chefs and crystal-laden tables, the truffle supply chain is touched by theft, secrecy, sabotage, and fraud. Farmers patrol their fields with rifles and fear losing trade secrets to spies. Hunters plant poisoned meatballs to eliminate rival truffle-hunting dogs. Naive buyers and even knowledgeable experts are duped by liars and counterfeits. Deeply reported and elegantly written, this page-turning exposé documents the dark, sometimes deadly crimes at each level of the truffle's path from ground to plate, making sense of an industry that traffics in scarcity, seduction, and cash. Through it all, a question lingers: What, other than money, draws people to these dirt-covered jewels? Advance praise for *The Truffle Underground* "In elegant, mesmerizing prose, Ryan Jacobs has delivered a forest-to-table page-turner from the outer limits of our foodie culture, a place where colorful farmers, serial dog murderers and famous chefs grapple over a crudely foraged fungus that's traded in parking lots and bars, like heroin. *The Truffle Underground* is an eye-opener for anyone who's picked up a fork."—Steve Fainaru, New York Times bestselling author of *League of Denial* and Pulitzer Prize-winning investigative reporter "The *Truffle Underground* is a fascinating, genre-blending romp. It's a business book, a mystery, a science lesson, and a love story that's as seductive as the buttery fungus at the heart of it all."—Derek Thompson, national bestselling author of *Hit Makers* and staff writer at *The Atlantic* "Investigative journalist and first-time author Jacobs does a remarkable job reporting from the front lines of the truffle industry, bringing to vivid life French black-truffle farmers, Italian white-truffle foragers, and their marvelously well-trained dogs."—Booklist (starred review) "[A] fascinating work . . . This deeply researched and eye-opening account of the lengths people will go for wealth, gratification, and

a taste of the prized fungus will captivate readers."—Publishers Weekly

Hillbilly Elegy

An award-winning genetic researcher and a tenacious journalist examine each phase of the Ebola epidemic in West Africa, the largest and deadliest of its kind. Their postmortem identifies factors that kept key information from reaching doctors, complicated the government's response to the crisis, and left responders unprepared for the next outbreak.

The Hot Zone :Crisis in the Red Zone

"A frightening and fascinating masterpiece of science reporting that reads like a detective story." —Walter Isaacson In 1976 a deadly virus emerged from the Congo forest. As swiftly as it came, it disappeared, leaving no trace. Over the four decades since, Ebola has emerged sporadically, each time to devastating effect. It can kill up to 90 percent of its victims. In between these outbreaks, it is untraceable, hiding deep in the jungle. The search is on to find Ebola's elusive host animal. And until we find it, Ebola will continue to strike. Acclaimed science writer and explorer David Quammen first came near the virus while he was traveling in the jungles of Gabon, accompanied by local men whose village had been devastated by a recent outbreak. Here he tells the story of Ebola—its past, present, and its unknowable future. Extracted from *Spillover* by David Quammen, updated and with additional material.

Everything Below the Waist

THE #1 NEW YORK TIMES BESTSELLER IS NOW A MAJOR-MOTION PICTURE DIRECTED BY RON HOWARD AND STARRING AMY ADAMS, GLENN CLOSE, AND GABRIEL BASSO "You will not read a more important book about America this year."—The Economist "A riveting book."—The Wall Street Journal "Essential reading."—David Brooks, New York Times Hillbilly Elegy is a passionate and personal analysis of a culture in crisis—that of white working-class Americans. The disintegration of this group, a process that has been slowly occurring now for more than forty years, has been reported with growing frequency and alarm, but has never before been written about as searingly from the inside. J. D. Vance tells the true story of what a social, regional, and class decline feels like when you were born with it hung around your neck. The Vance family story begins hopefully in postwar America. J. D.'s grandparents were "dirt poor and in love," and moved north from Kentucky's Appalachia region to Ohio in the hopes of escaping the dreadful poverty around them. They raised a middle-class family, and eventually one of their grandchildren would graduate from Yale Law School, a conventional marker of success in achieving generational upward mobility. But as the family saga of Hillbilly Elegy plays out, we learn that J.D.'s grandparents, aunt, uncle, sister, and, most of all, his mother struggled profoundly with the demands of their new middle-class life, never fully escaping the legacy of abuse, alcoholism, poverty, and trauma so characteristic of their part of America. With piercing honesty, Vance shows how he himself still carries around the demons of his chaotic family history. A deeply moving memoir, with its share of humor and vividly colorful figures, Hillbilly Elegy is the story of how upward mobility

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

really feels. And it is an urgent and troubling meditation on the loss of the American dream for a large segment of this country.

The Truffle Underground

The Cobra Event is set in motion one spring morning in New York City, when a seventeen-year-old student wakes up feeling vaguely ill. Hours later she is having violent seizures, blood is pouring out of her nose, and she has begun a hideous process of self-cannibalization. Soon, other gruesome deaths of a similar nature have been discovered, and the Centers for Disease Control sends a forensic pathologist to investigate. What she finds precipitates a federal crisis. The details of this story are fictional, but they are based on a scrupulously thorough inquiry into the history of biological weapons and their use by civilian and military terrorists. Richard Preston's sources include members of the FBI and the United States military, public health officials, intelligence officers in foreign governments, and scientists who have been involved in the testing of strategic bioweapons. The accounts of what they have seen and what they expect to happen are chilling. The Cobra Event is a dramatic, heart-stopping account of a very real threat, told with the skill and authority that made Preston's *The Hot Zone* an internationally acclaimed bestseller.

Greening in the Red Zone

A chronicle of the efforts of America's ninth largest steel company to build a new steel plant in the Midwest's Rust Belt presents true-life characters and suspense in its exploration of the American steel industry

Outbreak Culture

The bestselling landmark account of the first emergence of the Ebola virus. Now a mini-series drama starring Julianna Margulies, Topher Grace, Liam Cunningham, James D'Arcy, and Noah Emmerich on National Geographic. A highly infectious, deadly virus from the central African rain forest suddenly appears in the suburbs of Washington, D.C. There is no cure. In a few days 90 percent of its victims are dead. A secret military SWAT team of soldiers and scientists is mobilized to stop the outbreak of this exotic "hot" virus. The Hot Zone tells this dramatic story, giving a hair-raising account of the appearance of rare and lethal viruses and their "crashes" into the human race. Shocking, frightening, and impossible to ignore, The Hot Zone proves that truth really is scarier than fiction.

Recounting the Anthrax Attacks

“Like All the Light We Cannot See, The Paris Hours explores the brutality of war and its lingering effects with cinematic intensity. The ending will leave you breathless.” —Christina Baker Kline, author of Orphan Train and A Piece of the World One day in the City of Light. One night in search of lost time. Paris between the wars teems with artists, writers, and musicians, a glittering crucible of genius. But amidst the dazzling creativity of the city’s most famous citizens, four regular people are each searching for something they’ve lost. Camille was the maid of Marcel Proust, and she has a secret: when she was asked to burn her employer’s notebooks, she saved one for herself. Now she is desperate to find it before her betrayal is revealed. Souren, an Armenian refugee, performs puppet shows for children that are nothing like the fairy tales they expect. Lovesick artist Guillaume is down on his luck and running from a debt he cannot repay—but when Gertrude Stein walks into his studio, he wonders if this is the day everything could change. And Jean-Paul is a journalist who tells other people’s stories, because his own is too painful to tell. When the quartet’s paths finally cross in an unforgettable climax, each discovers if they will find what they are looking for. Told over the course of a single day in 1927, The Paris Hours takes four ordinary people whose stories, told together, are as extraordinary as the glorious city they inhabit.

Survival Migration

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

International treaties, conventions, and organizations to protect refugees were established in the aftermath of World War II to protect people escaping targeted persecution by their own governments. However, the nature of cross-border displacement has transformed dramatically since then. Such threats as environmental change, food insecurity, and generalized violence force massive numbers of people to flee states that are unable or unwilling to ensure their basic rights, as do conditions in failed and fragile states that make possible human rights deprivations. Because these reasons do not meet the legal understanding of persecution, the victims of these circumstances are not usually recognized as “refugees,” preventing current institutions from ensuring their protection. In this book, Alexander Betts develops the concept of “survival migration” to highlight the crisis in which these people find themselves. Examining flight from three of the most fragile states in Africa—Zimbabwe, the Democratic Republic of Congo, and Somalia—Betts explains variation in institutional responses across the neighboring host states. There is massive inconsistency. Some survival migrants are offered asylum as refugees; others are rounded up, detained, and deported, often in brutal conditions. The inadequacies of the current refugee regime are a disaster for human rights and gravely threaten international security. In *Survival Migration*, Betts outlines these failings, illustrates the enormous human suffering that results, and argues strongly for an expansion of protected categories.

The Plague

* Instant WSJ bestseller * Translated into 18 languages * #1 Most Recommended Book of the

year (Bloomberg annual survey of CEOs and entrepreneurs) * An Amazon, Bloomberg, Financial Times, Forbes, Inc., Newsweek, Strategy + Business, Tech Crunch, Washington Post Best Business Book of the year * Recommended by Bill Gates, Daniel Kahneman, Malcolm Gladwell, Dan Pink, Adam Grant, Susan Cain, Sid Mukherjee, Tim Ferriss Why do good teams kill great ideas? Loonshots reveals a surprising new way of thinking about the mysteries of group behavior that challenges everything we thought we knew about nurturing radical breakthroughs. Bahcall, a physicist and entrepreneur, shows why teams, companies, or any group with a mission will suddenly change from embracing new ideas to rejecting them, just as flowing water will suddenly change into brittle ice. Mountains of print have been written about culture. Loonshots identifies the small shifts in structure that control this transition, the same way that temperature controls the change from water to ice. Using examples that range from the spread of fires in forests to the hunt for terrorists online, and stories of thieves and geniuses and kings, Bahcall shows how a new kind of science can help us become the initiators, rather than the victims, of innovative surprise. Over the past decade, researchers have been applying the tools and techniques of this new science—the science of phase transitions—to understand how birds flock, fish swim, brains work, people vote, diseases erupt, and ecosystems collapse. Loonshots is the first to apply this science to the spread of breakthrough ideas. Bahcall distills these insights into practical lessons creatives, entrepreneurs, and visionaries can use to change our world. Along the way, readers will learn how chickens saved millions of lives, what James Bond and Lipitor have in common, what the movie Imitation Game got wrong about WWII, and what really killed Pan Am, Polaroid, and the Qing Dynasty. “If The Da Vinci Code and Freakonomics had a child together, it would be

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

called Loonshots.” —Senator Bob Kerrey

Facing the Crisis

Elle's 30 BEST BOOKS OF THE SUMMER "A jaw-dropping investigation into the women's health industry." —Shelf-Awareness "A fascinating examination of the past and present of women's healthcare" —Delfina V Barbiero, USA TODAY "A must-read for women, especially any woman who might ever need to see a doctor. " —The Washington Post American women visit more doctors, have more surgery, and fill more prescriptions than men. In *Everything Below the Waist*, Jennifer Block asks: Why is the life expectancy of women today declining relative to women in other high-income countries, and even relative to the generation before them? Block examines several staples of modern women's health care, from fertility technology to contraception to pelvic surgery to miscarriage treatment, and finds that while overdiagnosis and overtreatment persist in medicine writ large, they are particularly acute for women. One third of mothers give birth by major surgery; roughly half of women lose their uterus to hysterectomy. Feminism turned the world upside down, yet to a large extent the doctors' office has remained stuck in time. Block returns to the 1970s women's health movement to understand how in today's supposed age of empowerment, women's bodies are still so vulnerable to medical control—particularly their sex organs, and as result, their sex lives. In this urgent book, Block tells the stories of patients, clinicians, and reformers, uncovering history and science that could revolutionize the standard of care, and change the way women think about their health. *Everything Below the Waist* challenges all people to take back control of

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

their bodies.

Epidemic

Now in paperback--the timely and terrifying investigation into the dark underworld of biological weapons from the #1 "New York Times" bestselling author of "The Hot Zone."

Inherited Hemoglobin Disorders

INSTANT NEW YORK TIMES BESTSELLER! Now being developed as a television series with Eva Longoria and ABC! "Rarely have I read a book that challenged me to see myself in an entirely new light, and was at the same time laugh-out-loud funny and utterly absorbing."—Katie Couric "This is a daring, delightful, and transformative book."—Arianna Huffington, Founder, Huffington Post and Founder & CEO, Thrive Global "Wise, warm, smart, and funny. You must read this book."—Susan Cain, New York Times best-selling author of Quiet From a New York Times best-selling author, psychotherapist, and national advice columnist, a hilarious, thought-provoking, and surprising new book that takes us behind the scenes of a therapist's world—where her patients are looking for answers (and so is she). One day, Lori Gottlieb is a therapist who helps patients in her Los Angeles practice. The next, a crisis causes her world to come crashing down. Enter Wendell, the quirky but seasoned therapist in whose office she suddenly lands. With his balding head, cardigan, and khakis, he seems to have come straight

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

from Therapist Central Casting. Yet he will turn out to be anything but. As Gottlieb explores the inner chambers of her patients' lives — a self-absorbed Hollywood producer, a young newlywed diagnosed with a terminal illness, a senior citizen threatening to end her life on her birthday if nothing gets better, and a twenty-something who can't stop hooking up with the wrong guys — she finds that the questions they are struggling with are the very ones she is now bringing to Wendell. With startling wisdom and humor, Gottlieb invites us into her world as both clinician and patient, examining the truths and fictions we tell ourselves and others as we teeter on the tightrope between love and desire, meaning and mortality, guilt and redemption, terror and courage, hope and change. *Maybe You Should Talk to Someone* is revolutionary in its candor, offering a deeply personal yet universal tour of our hearts and minds and providing the rarest of gifts: a boldly revealing portrait of what it means to be human, and a disarmingly funny and illuminating account of our own mysterious lives and our power to transform them.

Superbugs

A global health catastrophe narrowly averted. A world unprepared for the next great threat. In December 2013, a young boy in a tiny West African village contracted the deadly Ebola virus. The virus spread to his relatives, then to neighboring communities, then across international borders. The world's first urban Ebola outbreak quickly overwhelmed the global health system and threatened to kill millions. In an increasingly interconnected world in which everyone is one or two flights away from New York or London or Beijing, even a localized epidemic can become a pandemic. Ebola's spread through West Africa to Nigeria, the United Kingdom and

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

the United States sounded global alarms that the next killer outbreak is right around the corner—and that the world is woefully unprepared to combat a new deadly disease. From the poorest villages of rural West Africa to the Oval Office itself, this book tells the story of a deadly virus that spun wildly out of control—and reveals the truth about how close the world came to a catastrophic global pandemic.

The Hot Zone

International Bestseller "An amazing, informative book that changes our perspective on medicine, microbes and our future." --Siddhartha Mukherjee, MD, New York Times bestselling author of *The Emperor of All Maladies* A New York Times bestselling author shares this exhilarating story of cutting-edge science and the race against the clock to find new treatments in the fight against the antibiotic-resistant bacteria known as superbugs. Physician, researcher, and ethics professor Matt McCarthy is on the front lines of a groundbreaking clinical trial testing a new antibiotic to fight lethal superbugs, bacteria that have built up resistance to the life-saving drugs in our rapidly dwindling arsenal. This trial serves as the backdrop for the compulsively readable *Superbugs*, and the results will impact nothing less than the future of humanity. Dr. McCarthy explores the history of bacteria and antibiotics, from Alexander Fleming's discovery of penicillin, to obscure sources of innovative new medicines (often found in soil samples), to the cutting-edge DNA manipulation known as CRISPR, bringing to light how we arrived at this juncture of both incredible breakthrough and extreme vulnerability. We also meet the patients whose lives are hanging in the balance, from Remy, a teenager with a

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

dangerous and rare infection, to Donny, a retired New York City firefighter with a compromised immune system, and many more. The proverbial ticking clock will keep readers on the edge of their seats. Can Dr. McCarthy save the lives of his patients infected with the deadly bacteria, who have otherwise lost all hope?

Code Red

Imagine a killer with the infectiousness of the common cold and power of the Black Death. Imagine something so deadly that it wipes out 90% of those it touches. Imagine an organism against which there is no defence. But you don't need to imagine. Such a killer exists: it is a virus and its name is Ebola. The Hot Zone tells what happens when the unthinkable becomes reality: when a deadly virus, from the rain forests of Africa, crosses continents and infects a monkey house ten miles from the White House. Ebola is that reality. It has the power to decimate the world's population. Try not to panic. It will be back. There is nothing you can do

Red Meat Republic

When the SARS virus broke out in China in January 2003, Karl Taro Greenfeld was the editor of Time Asia in Hong Kong, just a few miles from the epicenter of the outbreak. After vague, initial reports of terrified Chinese boiling vinegar to "purify" the air, Greenfeld and his staff soon found themselves immersed in the story of a lifetime. Deftly tracking a mysterious viral killer

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

from the bedside of one of the first victims to China's overwhelmed hospital wards—from cutting-edge labs where researchers struggle to identify the virus to the war rooms at the World Health Organization headquarters in Geneva—China Syndrome takes readers on a gripping ride that blows through the Chinese government's effort to cover up the disease . . . and sounds a clarion call warning of a catastrophe to come: a great viral storm potentially more deadly than any respiratory disease since the influenza of 1918.

Surviving Autocracy

An eminent political scientist's brilliant analysis of economic, social, and political trends over the past century demonstrating how we have gone from an individualistic "I" society to a more communitarian "We" society and then back again, and how we can learn from that experience to become a stronger, more unified nation—from the author of *Bowling Alone* and *Our Kids*. Deep and accelerating inequality; unprecedented political polarization; vitriolic public discourse; a fraying social fabric; public and private narcissism—Americans today seem to agree on only one thing: This is the worst of times. But we've been here before. During the Gilded Age of the late 1800s, America was highly individualistic, starkly unequal, fiercely polarized, and deeply fragmented, just as it is today. However as the twentieth century opened, America became—slowly, unevenly, but steadily—more egalitarian, more cooperative, more generous; a society on the upswing, more focused on our responsibilities to one another and less focused on our narrower self-interest. Sometime during the 1960s, however, these trends reversed, leaving us in today's disarray. In a sweeping overview of more than a century of

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

history, drawing on his inimitable combination of statistical analysis and storytelling, Robert Putnam analyzes a remarkable confluence of trends that brought us from an “I” society to a “We” society and then back again. He draws inspiring lessons for our time from an earlier era, when a dedicated group of reformers righted the ship, putting us on a path to becoming a society once again based on community. Engaging, revelatory, and timely, this is Putnam’s most ambitious work yet, a fitting capstone to a brilliant career.

The Zones of Regulation

Following the untimely death's of their parents, Matthew and Jason must put their differences aside and overcome the challenges thrown at them from the new plague, which turns the once living into bloodthirsty monsters after becoming infected. As they continue to fight for survival, Matthew and Jason quickly realize that the scariest monsters aren't the ones that we run from, but the ones we become.

Identity and Experience at the India-Bangladesh Border

Among the founding nations of the European Union, no nation has experienced a more devastating affect from the 2008 economic crisis than Italy. Although its recovery has recently begun, Italy has fallen even further behind EU economic leaders and the EU average. Looking at how and why this happened, Facing the Crisis brings together ethnographic material from

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

anthropological research projects carried out in various Italian industrial locations. With its wide breadth of locations and industries, the volume looks at all corners of the diverse Italian manufacturing system.

War Doctor

The #1 internationally bestselling, gripping true story of a frontline trauma surgeon operating in the world's most dangerous war zones For more than 25 years, surgeon David Nott has volunteered in some of the world's most dangerous conflict zones. From Sarajevo under siege in 1993 to clandestine hospitals in rebel-held eastern Aleppo, he has carried out lifesaving operations in the most challenging conditions, and with none of the resources of a major metropolitan hospital. He is now widely acknowledged as the most experienced trauma surgeon in the world. War Doctor is his extraordinary story, encompassing his surgeries in nearly every major conflict zone since the end of the Cold War, as well as his struggles to return to a "normal" life and routine after each trip. Culminating in his recent trips to war-torn Syria—and the untold story of his efforts to help secure a humanitarian corridor out of besieged Aleppo to evacuate some 50,000 people—War Doctor is a heart-stopping and moving blend of medical memoir, personal journey, and nonfiction thriller that provides unforgettable, at times raw, insight into the human toll of war.

Fevers, Feuds, and Diamonds

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

A National Bestseller! "The perfect pick-me-up on a hot summer day." --Washington Post "[A] charmer of a tale. . . Warm, witty and--like any good craft beer--complex, the saga delivers a subtly feminist and wholly life-affirming message." --People Magazine A novel of family, Midwestern values, hard work, fate and the secrets of making a world-class beer, from the bestselling author of Kitchens of the Great Midwest Two sisters, one farm. A family is split when their father leaves their shared inheritance entirely to Helen, his younger daughter. Despite baking award-winning pies at the local nursing home, her older sister, Edith, struggles to make what most people would call a living. So she can't help wondering what her life would have been like with even a portion of the farm money her sister kept for herself. With the proceeds from the farm, Helen builds one of the most successful light breweries in the country, and makes their company motto ubiquitous: "Drink lots. It's Blotz." Where Edith has a heart as big as Minnesota, Helen's is as rigid as a steel keg. Yet one day, Helen will find she needs some help herself, and she could find a potential savior close to home. . . if it's not too late. Meanwhile, Edith's granddaughter, Diana, grows up knowing that the real world requires a tougher constitution than her grandmother possesses. She earns a shot at learning the IPA business from the ground up--will that change their fortunes forever, and perhaps reunite her splintered family? Here we meet a cast of lovable, funny, quintessentially American characters eager to make their mark in a world that's often stacked against them. In this deeply affecting family saga, resolution can take generations, but when it finally comes, we're surprised, moved, and delighted.

Maybe You Should Talk to Someone

Page 20/31

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

"An exquisitely timed book Code Red is a worthwhile exploration of the shared goals (and shared enemies) that unite moderates and progressives. But more than that, it is a sharp reminder that the common ground on which Dionne built his career has been badly eroded, with little prospect that it will soon be restored." —The New York Times Book Review New York Times bestselling author and Washington Post columnist E. J. Dionne, Jr. sounds the alarm in Code Red, calling for an alliance between progressives and moderates to seize the moment and restore hope to America's future for the 2020 presidential election. Will progressives and moderates feud while America burns? Or will these natural allies take advantage of the greatest opportunity since the New Deal Era to strengthen American democracy, foster social justice, and turn back the threats of the Trump Era? The United States stands at a crossroads. Broad and principled opposition to Donald Trump's presidency has drawn millions of previously disengaged citizens to the public square and to the ballot boxes. This inspired and growing activism for social and political change hasn't been seen since the days of Franklin Roosevelt's New Deal policies and the Progressive and Civil Rights movements. But if progressives and moderates are unable—and unwilling—to overcome their differences, they could not only enable Trump to prevail again but also squander an occasion for launching a new era of reform. In Code Red, award-winning journalist E. J. Dionne, Jr., calls for a shared commitment to decency and a politics focused on freedom, fairness, and the future, encouraging progressives and moderates to explore common ground and expand the unity that brought about Democrat victories in the 2018 elections. He offers a unifying model for furthering progress with a Politics of Remedy, Dignity, and More: one that solves problems,

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

resolve disputes, and moves forward; that sits at the heart of the demands for justice by both long-marginalized and recently-displaced groups; and that posits a positive future for Americans with more covered by health insurance, more with decent wages, more with good schools, more security from gun violence, more action to roll back climate change. Breaking through the partisan noise and cutting against conventional wisdom to provide a realistic look at political possibilities, Dionne offers a strategy for progressives and moderates to think more clearly and accept the responsibilities that history now imposes on them. Because at this point in our national story, change can't wait.

Planting in a Post-Wild World

The effects of the partition of India in 1947 have been more far-reaching and complex than the existing partition narratives of violence and separation reveal. The immediacy of the movement of refugees between India and the newly-formed state of Pakistan overshadowed the actual effect of the drawing of the border between the two states. The book is an empirical study of border narratives across the India-Bangladesh border, specifically the West Bengal part of India's border with Bangladesh. It tries to move away from the perpetrator state-victim civilian framework usually used in the studies of marginal people, and looks at the kind of agencies that the border people avail themselves of. Instead of looking at the border as the periphery, the book looks at it as the line of convergence and negotiations—the 'centre of the people' who survive it every day. It shows that various social, political and economic identities converge at the borderland and is modified in unique ways by the spatial specificity of the

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

border—thus, forming a ‘border identity’ and a ‘border consciousness’. Common sense of the civilians and the state machinery (embodied in the border guards) collide, cooperate and effect each other at the borderlands to form this unique spatial consciousness. It is the everyday survival strategies of the border people which aptly reflects this consciousness rather than any universal border theory or state-centric discourses about the borders. A bottom-up approach is of utmost importance in order to understand how a spatially unique area binds diverse other identities into a larger spatial identity of a ‘border people’. The book’s relevance lies in its attempt to explore such everyday narratives across the Bengal border, while avoiding any major theorising project so as not to choke the potential of such experience-centred insights into the lives of a unique community of people. In that, it contributes towards a study of borders globally, providing potential approaches to understand border people worldwide. Based on detailed field research, this book brings a fresh approach to the study of this border. It will be of interest to researchers in the field of South Asian studies, citizenship, development, governance and border studies.

The Hot Zone

Personal account of the author's work in the ultra high-tech "hot zone" lab that he created at the Centers for Disease Control headquarters in Atlanta battling such viruses as Ebola, Lassa fever, Crimean Congo Hemorrhagic Fever, and AIDS and searching for weapons with which to combat them.

Loonshots

"An analysis of the destruction the Trump administration has waged on our institutions, the cultural norms we hoped would save us, and our very sense of identity"--

The Paris Hours

This book documents and reveals new information about the anthrax attacks of 2001. Decker provides first-hand perspective detailing the new science, microbial forensics, and parts of the investigation unknown to the public.

Preaching in the Purple Zone

“As practical as it is poetic. . . . an optimistic call to action.” —Chicago Tribune Over time, with industrialization and urban sprawl, we have driven nature out of our neighborhoods and cities. But we can invite it back by designing landscapes that look and function more like they do in the wild: robust, diverse, and visually harmonious. *Planting in a Post-Wild World* by Thomas Rainer and Claudia West is an inspiring call to action dedicated to the idea of a new nature—a hybrid of both the wild and the cultivated—that can flourish in our cities and suburbs. This is both a post-wild manifesto and practical guide that describes how to incorporate and layer plants into plant communities to create an environment that is reflective of natural systems and

thrives within our built world.

Ebola: The Natural and Human History of a Deadly Virus

NEW YORK TIMES BESTSELLER * An urgent wake-up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us, told through the story of the deadly 2013-2014 Ebola epidemic "Crisis in the Red Zone reads like a thriller. That the story it tells is all true makes it all more terrifying."--Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction* From the #1 bestselling author of *The Hot Zone*, now a National Geographic original miniseries . . . This time, Ebola started with a two-year-old child who likely had contact with a wild creature and whose entire family quickly fell ill and died. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. By the end--as the virus mutated into its deadliest form, and spread farther and faster than ever before--30,000 people would be infected, and the dead would be spread across eight countries on three continents. In this taut and suspenseful medical drama, Richard Preston deeply chronicles the outbreak, in which we saw for the first time the specter of Ebola jumping continents, crossing the Atlantic, and infecting people in America. Rich in characters and conflict--physical, emotional, and ethical--*Crisis in the Red Zone* is an immersion in one of the great public health calamities of our time. Preston writes of doctors and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He

also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster. *Crisis in the Red Zone* makes clear that the outbreak of 2013-2014 is a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined--in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. *Crisis in the Red Zone* is an exquisitely timely book, a stark warning of viral outbreaks to come.

And The Band Played on

An examination of the AIDS crisis exposes the federal government for its inaction, health authorities for their greed, and scientists for their desire for prestige in the face of the AIDS pandemic.

The Cobra Event

Takes a close-up look at the world's tallest trees, the coast redwoods that grow only in the coastal regions of California, and at the previously unknown ecosystem that the trees form high in the air in the forest canopy.

The Demon in the Freezer

The book, *Inherited Hemoglobin Disorders*, describes the genetic defects of hemoglobins, disease complications, and therapeutic strategies. This book has two distinct sections. The first theme includes seven chapters devoted to the types of hemoglobinopathies, mutation spectrum, diagnostic methods, and disease complications, and the second theme includes three chapters focusing on various treatment strategies. The content of the chapters presented in the book is guided by the knowledge and experience of the contributing authors. This book serves as an important resource and review to the researchers in the field of hemoglobinopathies.

How the World Ends

Level 4: Virus Hunters of the CDC

" a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a

zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

The Lager Queen of Minnesota

In 2014, Sierra Leone, Liberia, and Guinea suffered the worst epidemic of Ebola in history. The brutal virus spread rapidly through a clinical desert where basic health-care facilities were few and far between. Causing severe loss of life and economic disruption, the Ebola crisis was a major tragedy of modern medicine. But why did it happen, and what can we learn from it? Paul Farmer, the internationally renowned doctor and anthropologist, experienced the Ebola outbreak firsthand—Partners in Health, the organization he founded, was among the international responders. In *Fevers, Feuds, and Diamonds*, he offers the first substantive

Read Book Crisis In The Red Zone The Story Of The Deadliest Ebola Outbreak In History And Of The Viruses To Come

account of this frightening, fast-moving episode and its implications. In vibrant prose, Farmer tells the harrowing stories of Ebola victims while showing why the medical response was slow and insufficient. Rebutting misleading claims about the origins of Ebola and why it spread so rapidly, he traces West Africa's chronic health failures back to centuries of exploitation and injustice. Under formal colonial rule, disease containment was a priority but care was not – and the region's health care woes worsened, with devastating consequences that Farmer traces up to the present. This thorough and hopeful narrative is a definitive work of reportage, history, and advocacy, and a crucial intervention in public-health discussions around the world.

Crisis in the Red Zone

"By the late nineteenth century, Americans rich and poor had come to expect high-quality fresh beef with almost every meal. Beef production in the United States had gone from small-scale, localized operations to a highly centralized industry spanning the country, with cattle bred on ranches in the rural West, slaughtered in Chicago, and consumed in the nation's rapidly growing cities. Red Meat Republic tells the remarkable story of the violent conflict over who would reap the benefits of this new industry and who would bear its heavy costs"--
