Rico and the Spanish Virgin Islands. Its 50 full color charts containing extremely accurate data are based on independent surveys personally conducted by the author, using a computer hydrographic system. In addition, it contains detailed piloting instructions, GPS waypoints, photos, approaches and routes, anchorages, services, dive sites, history, index, bibliography, and more. A Cruising Guide to Puerto Rico will greatly enhance your cruising experiences in this region by giving you valuable information based on actual experience, and local knowledge.

A Cruising Guide to Puerto Rico

This book is Street's second guide. The first was a mimeographed guide to the Virgin Islands published privately in 1964. That guide opened up the Virgin Islands to the visiting cruising yachtsman and made bare boat chartering possible. This book, Streets second guide, became "The Bible" for all yachtsmen cruising the Lesser Antilles.

Life at Sea Level

A book about sailing away as a family. This is a story about being a family in the twenty-first century. It is written from the author's perspective, that of a father - a role as ill defined and wanting today as it has ever been. Still, fathers can help shape the course their families take, so just before the second millennium, the author quit his corporate job and took his family of

four on a voyage. For two and a half years they lived and traveled on the Caribbean Sea aboard a catamaran sailboat. Their experiences on the water, good and bad, and the connections they made as a family are the reasons they sailed away. The connections made the author write this story. They are the gifts all families can share. This book might be called a "memoir" or "armchair travel" piece, but it is also a "how-to" and "can-do" story about choosing alternative family lifestyles. It is a new look at being a family in the twenty-first century. Excerpts: "Today when kids get home from school, nobody is there. Both parents are working. Chances are they're divorced. I'm not saying this explains everything, but it's somewhere near the heart of the problem." "Just how many meals was the average American family sharing these days? Two? One? None? Or, as a mother later suggested to me, perhaps the question should have been phrased: 'How many meals do parents share with their children each week, or worse, each month?'" "When it comes to your kids, it's not the quality time that counts; it's the quantity time." "[Liveaboard sailors] with character will reach into themselves and find exactly what it is they need to do. They will, in fact, gravitate toward the things they should have been doing back home all along. They might end up painting. They might write an honest book. Heck, they might even develop the unifying theory of physics or cure cancer. They might even learn how to live with and enjoy their families." "And, of course, PIRATES... "If the fellows on the boat behind us meant us harm, a skinny papa and three girls in bathing suits were not going to give them second thoughts."

Street's Guides are the result of his forty-four years of Caribbean experience— his first guide to the Virgin Islands (1964) has been expanded over the years to cover the entire eastern Caribbean. These guides give the mariner all the information needed to safely cruise the area, not only piloting information but also interesting background information on people, places and history.

Leeward Islands

Life at Sea Level is the latest work of one of America's finest travel guide authors, Stephen Pavlidis. For 20 years, Pavlidis wrote factual guide books about traveling in the Bahamas and the Caribbean. In Life at Sea Level, Pavlidis tells some of the other stories of things that happened during his island time and the people he knew or historically researched. It's a fun and thoughtful read about life in the Bahamas and Caribbean. Original.

From there, he gives you a choice of voyages: the inside route through the Intracoastal Waterway to Toms River, Barnegat Bay, Atlantic City, and Cape May, or taking the offshore passage. Then you explore the Delaware Bay and its tributaries and cruise up the Delaware River to Trenton. This revised edition contains updated information about onshore facilities, marinas, restaurants, stores, sites of interest, docking fees, bridge heights, maritime service stations, weather, navigation, and safety, as well as post-September 11 regulations in the waters around New York City. The book also includes a wealth of photographs and sea charts. Donald Launer, who holds a U.S. Coast Guard captain's license, has explored the New Jersey waters in every kind of small craft since he first sailed in Barnegat Bay at the age of eight. His articles on recreational boating have appeared in Good Old Boat Magazine, Cruising World, The Beachcomber, Offshore, and Sail. He berths his schooner, Delphinus, in Forked River, New Jersey.

This, the second edition of *A Guide to Planning and Cruising the Great Circle Route Around the Eastern USA*, documents a motor yacht "cruise of a lifetime," the 5,400-mile circumnavigation of the Eastern United States. Author Bick Remmey refers to this voyage as the longest one-way inland cruise possible in the US. Bick shares the details of his 5 years of planning and 18 weeks of journeying with his wife aboard their 36-foot aft-cabin motor yacht *Nittany Navy*. The cruise took Bick and Jeri through several of the Great Lakes, down the Mississippi, across the Gulf of Mexico, up the coast of Florida, north through the Intercoastal Waterway, up the Jersey Shore, and finally back to home port in Avalon, New Jersey. Bick's experiences provide invaluable planning and cruising information for anyone considering this voyage. "Bick's book contains considerable information for anyone planning this trip. Each leg of the cruise is detailed, along with information about facilities and attractions, and what charts are necessary." Stan Osowski, *The Trenton Times*

Long before he was one of America's leading yachting writers, Nigel Calder was a novice cruiser with ambitions grander than his experience. Nigel and his partner Terrie were young and foolish, with a home-built boat that was new and untested, one child already and another on the way - but they were determined to complete an adventurous 18-month voyage from New Orleans to Venezuela and back. It was the voyage that made Calder the yachtsman he is today, a marvellous romp through the West Indies, seeing an unspoilt Caribbean, while learning hard-won lessons from direct experience - troubleshooting engines, kedging off shoals and reefs, and most importantly navigating Nada, a yacht that quickly became very much part of the burgeoning Calder family too. An adventure story and a colourful travelogue in one, Shakedown Cruise is a must-read for all who are curious about what it takes to become a cruising sailor or create an adventurous life, as well as those who are just looking to sail along with Nigel and his family.

Frank Virgintino, author of numerous Free Cruising Guides for the Caribbean, has been working on "A Thinking Man's Guide to Voyaging South" for almost a year. Roughly 200 pages long, the Guide addresses everything North American sailors need to know to get to the Caribbean safely through a discussion of various routes from North America to the Caribbean as well as a discussion of the entire Caribbean - which the author breaks down into four quadrants. The author hopes that the Guide will allow for a clearer understanding of the entire Caribbean as well as the various routes that can be employed. Not only does it cover routes to the Caribbean from N. America and cruising routes around the Caribbean, it also looks at all

Fair winds and fine cruising is author Chris Doyle's wish for readers of this popular, newly updated guide to the 10 island nations of this enchanting Caribbean chain. Doyle's background in research makes this volume rich in practical details; yet its tone is conversational. His is also an intimate knowledge, gathered from more than 20 years of live-aboard Caribbean cruising on his Carib 41 Helos, a former charterboat. The Leewards are a cultural and topographic mix, and

Doyle addresses them by geographical grouping. The Renaissance Islands (St. Martin, St. Barts and Anguilla), an economically strong bareboating enclave, offer short cruising passages and a wide choice of anchorages. The Islands That Brush the Clouds - a volcanic chain strung between Saba and Montserrat - present cruisers with a variety of channels and terrain. Most broadly strewn are the Islands of Mountains and Mangroves, a patchwork chiefly of rugged rainforest and exotic fauna, guarded in spots by spectacular reefs. The southern Leewards in particular have cried for reliable charting. Doyle provides aid throughout, using GPS coordinates, a trove of charts and color maps. All are cross-referenced with the newly released Caribbean Yachting Charts, exactly detailed and available through Cruising Guide Publications. Spectacular photographs add a visual feast. Onshore accommodations, transportation, communications, entertainment and provisioning are also addressed throughout the guide, and in an exhaustive directory by island and service type.
