Handbook of Early Childhood Literacy

Handbook of Early Literacy Research

This white paper is part of a series that promotes knowledge about language technology and its potential. It addresses educators, journalists, politicians, language communities and others. The availability and use of language technology in Europe varies between languages. Consequently, the actions that are required to further support research and development of language technologies also differ for each language. The required actions depend on many factors, such as the complexity of a given language and the size of its community. META-NET, a Network of Excellence funded by the European Commission, has conducted an analysis of current language resources and technologies. This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe. The results of this analysis suggest that there are many significant research gaps for each language. A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks. META-NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses, government agencies, industry, research organisations, software companies, technology providers and European universities. Together, they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020.

This book on doctoral writing offers a refreshingly new approach to help Ph.D. students and their supervisors overcome the host of writing challenges that can make—or break—the dissertation process. The book’s unique contribution to the field of doctoral writing is its style of reflection on ongoing, lived practice; this is more readable than a simple how-to book, making it a welcome resource to support doctoral writing. The experiences and practices of research writing are explored through bite-sized vignettes, stories, and actionable ‘teachable’ accounts. Doctoral Writing: Practices, Processes and Pleasures has its origins in a highly successful academic blog with an international following. Inspired by the popularity of the blog (which had more than 14,800 followers as of October 2019) and a desire to make our six years’ worth of posts more accessible, this book has been authored, reworked, and curated by the three editors of the blog and reconceived as a conveniently structured book.

Cities, scripts, literature, the rule of law – all were born in Iraq. That so many see this ancient land as nothing more than a violent backwater steeped in chaos is a travesty. This is the place where, for the first 5,000 years of human history, all innovations of worth emerged. It was the cradle of civilization. In this unrivalled study, John Robertson details the greatness and grandeur of Iraq's achievements, the brutality and magnificence of its ancient empires and its extraordinary contributions to the world. The only work in the English language to explore the history of the land of two rivers in its entirety, it takes readers from the seminal advances of its Neolithic inhabitants to the aftermath of the American and British-led invasion, the rise of Islamic State and Iraq today. A fascinating and thought-provoking analysis, it is sure

to be greatly appreciated by historians, students and all those with an interest in this diverse and enigmatic country. This paperback edition features a new epilogue, bringing the work up to date and looking ahead to Iraq's future.

^This volume examines early literacy research on a global scale, and puts social, cultural and historical

analyses in the front seat, without losing sight of individual and family-level matters in the process. It is comprehensive, ground-breaking, and provocative and should help literacy researchers to think differently about the field? - Marjorie Faulstich Orellana School of Education and Social Policy, Northwestern University `No other publication that I am aware of brings together views from such diverse disciplines, contributing to a comprehensive statement about early childhood literacy. The Handbook not only reviews the current field of situated literacy but presents some important and exciting new research. It is a significant resource which promises to become a landmark text? - Eve Bearne, University of Cambridge, Faculty of Education `This Handbook brings together an astonishing array of writers who explore contemporary political, cultural and cognitive understandings of early childhood literacy. Literacy and literacy acquisition are broadly defined here to encompass not just traditional notions of reading and writing, but multimodalities, multiliteracies, and critical literacies It is rich and comprehensive, an invaluable resource for scholars, educators, and students of early childhood literacy? - Elsa Auerbach, Professor of English, University of Massachusetts, Boston `This book is unique in its broad consideration of topics and its global focus I particularly appreciate how the Editors have situated current research in an historical context. They have also included development issues, pedagogy, research, and the newest areas of interest - critical literacy and popular culture? - Diane Barone, University of Nevada, Reno `The editors and their contributors place a strong emphasis on literacy as a social practice that occurs outside school settings. This broad interpretation is a healthy counter-blast to the current political views and legislation in many developed countries and should be welcomed by practitioners. Another very welcome dimension is the 'can do' approach that celebrates young children's literacy achievements This is an informative and insightful text for researchers and students to dip into and think about for some years to come? - Marian Whithead writing in Nursery

World `An inspired and stimulating read aimed at researchers, academics, professionals and students in the fields of early years education and research and early childhood literacy. It will also be of interest to those working in other disciplines such as cultural studies and sociology. I think this collection of work by the range of authors, some of which are the most distinguished and renowned in the field, not only represents real value for money but also makes an essential, in-depth, perceptive and invaluable contribution to this relatively new and dynamic field. It offers some cutting edge, contemporary and exciting material combined with well founded wisdom and indeed, excellent sources for further reading?

- British Journal of Educational Studies In recent years there has been a virtual revolution in early childhood studies, with a mass of books and papers seeking to re-examine and reposition childhood. At the same time an equally significant area has developed within literacy studies, reflecting a growing interest in the nature of literacy as a socially situated phenomenon. There is increased interest in literacy as a multimodal concept in which symbolic meaning is a central concept, rather than more conventional and narrower notions of literacy. The Handbook of Early Childhood Literacy is central in providing access to all these different perspectives. The Handbook offers a way through the vast diversity of publications on early childhood literacy by providing comprehensive and up-to-date reviews of research and thinking in early childhood literacy. The arrangement of chapters reflects a contemporary perspective on research into early childhood literacy. Major sections include: the global world of early childhood literacy; childhood literacy and family, community and culture; the development of literacy in early childhood; pedagogy and early childhood literacy and researching early childhood literacy. Contributions by leading authorities focus on literacy as a socially situated and global experience, one that is evolving in relation to changes in contemporary culture and technological innovation.
