Jigging may be an ancient technique, but it's also the hottest, newest way to fish. Thanks to advances in tackle technology and the development of new methods like speed jigging, meat jigging, and yo-yoing, today you can target everything from panfish to pelagics – with light tackle that's comfortable to use even on the biggest fish. And jigging will, at times, be far more effective than any other tactic you can apply. Are you ready to target tuna? Set your sights on stripers? Jig up giant golden tilefish? Then join well-known fishing author Lenny Rudow in this detailed examination of modern jigging techniques, equipment, lures, and lines. As usual, Rudow pulls no punches, explaining techniques with thorough instructions, naming his favorite rods, reels, and jigs by brand, and examining specific species on a case-by-case basis.

Congress has promoted fisheries science for over a century and its involvement in fisheries management took a great leap forward with passage of the Fisheries Conservation and Management Act of 1976. In the past decade, Congress has requested advice from the National Research Council (NRC) on both national issues (e.g., individual fishing quotas and community development quotas) and the assessments related to specific fisheries (Northeast groundfish). This report was produced, in part, in response to another congressional request, this time related to the assessments of the summer flounder stocks along the East Coast of the United States. Following the initial request, the NRC, National Marine Fisheries Service (NMFS), and congressional staff agreed to broaden the study into a more comprehensive review of marine fisheries data collection, management, and use.

A thorough introduction to an increasingly popular fishing sport. Did you know that kayak fishing has shot up in popularity over the past few years? Americans take more than 38 million kayak fishing trips every year. While most outdoors enthusiasts think of kayaks simply as boats, there are many great reasons to take up fishing from a kayak. A kayak is cheaper to maintain than a larger fishing boat; it can be launched from almost anywhere and piloted by almost anyone; and kayakers can access places larger boats can't, opening up new fishing spots. So join in on the fun with *The Ultimate Guide to Kayak Fishing*. Joel Spring guides readers through choosing a kayak from the various types, transporting it, and outfitting it with the absolute necessities. He covers vital safety information, from life-preservers and waterproof cell-phone cases to boat traffic and weather concerns. Finally, he offers key insights for a successful kayak fishing experience. Topics covered include: Standing to fish Casting under brush and trees Fishing in the wind Bait, casting, fly, and night fishing tips, tactics, and techniques Landing fish in a kayak And much more! Spring finally offers further advice on kayak maintenance as well as making kayak fishing a friend and family event. The tranquil beauty of a morning sunrise over the Atlantic Ocean is in direct contrast to the savage acts taking place beneath the water's surface. Powerful tails propel half-ton blue marlin at nearly 50 mph, as their bills slash at baitfish. The razor-sharp teeth of wahoo cut unsuspecting prey in half. And these predators become the hunted, when anglers venture forth in Offshore Pursuit. Experience what the ultimate sport fishing has to offer: surface eruptions on trolled baits, rods bent in half, drags screaming, and adrenaline pumping. Whether you call blue water your regular fishing grounds or want to experience the thrill for the first time, don't leave success in the hands of Lady Luck. Knowledge and

Tales of a champion surfcaster: the education of a young woman hell-bent on following her dream and learning the mysterious and profound sport, and art, of surfcasting, on the island of Martha's Vineyard. Janet Messineo knew from the get-go that she wanted to become a great fisherman. She knew she was as capable as any man of catching and landing a huge fish. It took years—and many terrifying nights along on the beach in complete darkness, in search of a huge creature to pull out of the sea—for her to prove to herself and to the male-dominated fishing community that she could make her dream real. Messineo writes of the object of her obsession: striped bass and how it can take a lifetime to become a proficient striped bass fisherman; of stripers as

nocturnal feeders, hard-fighting, clever fish that under the cover of darkness trap bait against jetties or between fields of large boulders near shorelines, or, once hooked, rub their mouths against the rocks to cut the line. She writes of growing up in Lawrence, Massachusetts, and Salem, New Hampshire, the granddaughter of textile mill workers, tagging along with her father and brother as they cast off of jetties; of going to art school, feeling from a young age the need to escape, and finding herself, one summer, on the Vineyard. She describes the series of jobs that supported her fishing—waitressing at the Black Dog, Helios, and the Home Port, among other restaurants. She writes of her education in patience and the technique to land a fish; learning the equipment—hooks, sinkers, her first squid jig; buying her first one-ounce Rebel lure. She re-created the thrill of fishing at night, of being buffeted by the island's harsh winds and torrential rains; the terror of hooking something mysterious in the darkness that might pull her into water over her head. She gives us a rich portrait of island life and writes of its history and of Chappaquiddick's (it belonged to the Wampanoags, who originally called it Cheppiaquidne—"separate island"); of the Martha's Vineyard Derby: its beginning in 1946 as a way to bring tourism to the island during the offseason, and the Derby's growing into one of the largest tournaments in the world. Messineo describes her dream of becoming a marine taxidermist, of learning the craft and perfecting the art of it. She writes of the men she's fished with and the women who forged the path for others (among them, Lorraine "Tootie" Johnson, who fished Vineyard waters for more than sixty years, and Lori VanDerlaske, who won the Derby shore division in 1995). And she writes of her life commingled with fishing—her marriage to a singer, poet, activist; their adopting a son with Asperger's; and her teaching him to fish. She writes of the transformative power of fishing that helped her to

shake off drugs and alcohol, and of her profound respect for fish as a magnificent animal. With eighteen of the author's favorite fish recipes, *Casting into the Light* is a book about following one's dreams and about the quiet reckoning with self in the long hours of darkness at the water's edge, with the sounds of the ocean, the night air, and the jet-black sky.

The commercial and sport fisheries of Raritan Bay, bordering on the northern coast of New Jersey and the southern coast of Staten Island, have a long and interesting history. Little has been written about the Bay, however, despite its important to the region. Clyde MacKenzie's book is about the formation and characteristics of Raritan Bay--and the gear, fishing methods, and working lives of the fishermen who have caught its shellfish and finfish over the past 300 or more years. Although it is about one-thirtieth the size of Chesapeake Bay, Raritan Bay has nearly the same large variety of fisheries. It is a productive and important region whose primary market, New York City, is only twenty miles from the principal Raritan Bay port of Belford. This proximity ensured fresh fish in the city markets. New York City was also important to residents of the bayshore in other ways. Unfortunately, the city has also polluted the Bay, seriously endangering the fisheries. The author chronicles the development of the various Bay fisheries historically, beginning with the Lenapes and early colonists and coming up to the present. He describes the commercial fishing techniques used in various periods to catch the different varieties of fish and shellfish, basing much of his discussion on primary materials, including illustrations, and interviews with fishermen who have worked in the Bay. He also describes the development of sportfishing, an important industry in itself, especially as the commercial fisheries have declined. The book is full of detailed and useful information on traditional fishing techniques woven into a narrative that is interesting in its own right. Mackenzie concludes his book with descriptions of trips he has taken with contemporary fishermen in which he vividly relates the daily lives of the people who still pursue their livelihood on the water. He spent time on eel, pound net, purse seine, sport fish, blue crab, and lobster boats. Unfortunately, the Bay, like

many such areas, is threatened by pollution. This informative book serves as a potent reminder of what will be lost if Raritan Bay and other fisheries are allowed to decline.

Ask any saltwater fisherman on the Atlantic coast which fish he's looking for, and the answer will nearly always be one of the saltwater "big four": stripped bass, weakfish, bluefish and fluke. Here a seasoned fisherman presents the tackle, techniques, lures, baits and strategies to be successful at catching all the big four, from the surf, in bays, and on ocean-going boats. Beginning with a practical discussion of the natural history and habits of these species, the book offers in-depth coverage of proven fish-catching methods such as trolling, jigging, and drift-fishing from boats, using artificials and natural baits from shore, and fishing from bridges and piers. A host of highly effective rigs are all described and illustrated in detail, as are useful fishing knots. Chapters on saltwater fly-fishing, cleaning and preparing the catch, and delicious recipes round out this essential guide for any saltwater fisherman.

From the quiet back bays to the pounding surf, fishing writer and videographer, John Skinner, takes the reader along on a relentless pursuit of striped bass from the shore. With his trademark writing style that makes readers feel as though they're standing at the water's edge, Skinner cuts through the complexity of choosing and presenting the various lure styles while processing the interaction of weather and water conditions that impact baitfish movements and game fish behavior. In portions of the book focused on hunting the largest stripers, Skinner goes beyond the artificials arsenal to take an in-depth look at fishing with live and rigged eels. Chapters are dedicated to fluke and false albacore fishing as well. The book is enhanced by videos organized by chapter on the book's companion website, [StriperPursuit.com](http://StriperPursuit.com).
