Fodor's Caribbean, Bahamas, and Bermuda

Even in the eyes of many of his critics, Fodor is widely regarded as the most important philosopher of psychology of his generation. With Noam Chomsky at MIT in the 1960s he mounted a strenuous attack on the behaviourism that then dominated psychology and most philosophy of mind, and since then, he has articulated and defended in considerable richness and detail a computational theory of intentional causation that is central to the emerging cognitive sciences. This theory provides a framework both for the resolution of many traditional problems in the philosophy of mind and language, and for actual psychological research and experimentation. The present volume contains 16 contributions by philosophers and cognitive scientists who have been critical of this theory, followed by replies Fodor makes to each of them. There is also a lengthy introduction that provides an overview of Fodor's views and their relation to this critical discussion.

“The Bahamas are famous for sun, sand—and swimming pigs.” —National Geographic In the middle of paradise, with billionaires and celebrities for neighbors, is an island populated only by swimming pigs. For decades, this archipelago of 365 islands would remain largely unknown to the world. It would not be a ruthless pirate, pioneering loyalists, a notorious drug kingpin, or the infamous Fyre Festival that would unveil Exuma to the world, but rather the most unlikely of creatures. Appearing in magazines, videos, newspapers, commercials, TV shows, and countless selfies, the Swimming Pigs of Exuma, in the Bahamas, have become a bucket-list sensation and have been named one of the marvels of the universe. But how did they reach this celebrity status? What made them so famous? And why, in February 2017, did so many of them die? Pigs of Paradise is an unlikely story of humble beginnings and a swift rise to stardom. With interviews from historians, world-renowned ecologists, famous pig owners, and boat captains, it thoughtfully considers what this phenomenon says about not only these animals but also about us.
