Hide and Seek

'My most anticipated book of the year' - Peter F. Hamilton, Britain's no.1 science fiction writer
Children of Ruin follows Adrian Tchaikovsky's extraordinary Children of Time, winner of the Arthur C. Clarke award. It is set in the same universe, with new characters and a thrilling narrative. It has been waiting through the ages. Now it's time . . . Thousands of years ago, Earth's terraforming program took to the stars. On the world they called Nod, scientists discovered alien life - but it was their mission to overwrite it with the memory of Earth. Then humanity's great empire fell, and the program's decisions were lost to time. Aeons later, humanity and its new spider allies detected fragmentary radio signals between the stars. They dispatched an exploration vessel, hoping to find cousins from old Earth. But those ancient terraformers woke something on Nod better left undisturbed. And it's been waiting for them. 'Books like this are why we read science fiction' - Ian McDonald, author of the Luna series
All underpinned by great ideas. And it is crisply modern - but with the sensibility of classic science fiction' Stephen Baxter, author of the Long Earth series (with Terry Pratchett)

Bob Johansson has just sold his software company and is looking forward to a life of leisure. There are places to go, books to read, and movies to watch. So it's a

little unfair when he gets himself killed crossing the street. Bob wakes up a century later to find that corpsicles have been declared to be without rights, and he is now the property of the state. He has been uploaded into computer hardware and is slated to be the controlling AI in an interstellar probe looking for habitable planets. The stakes are high: no less than the first claim to entire worlds. If he declines the honor, he'll be switched off, and they'll try again with someone else. If he accepts, he becomes a prime target. There are at least three other countries trying to get their own probes launched first, and they play dirty. The safest place for Bob is in space, heading away from Earth at top speed. Or so he thinks. Because the universe is full of nasties, and trespassers make them mad - very mad.

Kill Switch

THE NEW NOVEL FROM THE BESTSELLING AUTHOR OF READY PLAYER ONE It's just another day of high school for Zack Lightman. He's daydreaming through another boring math class, with just one more month to go until graduation and freedom—if he can make it that long without getting suspended again. Then he glances out his classroom window and spots the flying saucer. At first, Zack thinks he's going crazy. A minute later, he's sure of it. Because the UFO he's staring at is straight out of the videogame he plays every night, a hugely popular online flight simulator calledArmada—in which gamers just happen to be protecting the earth from alien invaders. But what Zack's seeing is all too real. And his skills—as well as those of millions of gamers across the world—are going to be needed to save the earth from what's about to befall it. Yet even as he and his new comrades scramble to prepare for the alien onslaught, Zack can't help thinking of all the science-fiction books, TV shows, and movies he grew up reading and watching, and wonder: Doesn't something about this scenario seem a little too... familiar? Armada is at once a rollicking, surprising thriller, a classic coming of age adventure, and an alien-invasion tale like nothing you've ever read before—one whose every page is infused with author Ernest Cline's trademark pop-culture savvy.

The Singularity Trap

Bettersness: Economics for Humans is a powerful call to arms for a post-capitalist economy. Umair Haque argues that just as positive psychology revolutionized our understanding of mental health by recasting the field as more than just treating mental illness, we need to rethink our economic paradigm. Why? Because business as we know it has reached a state of diminishing returns—though we work harder and harder, we never seem to get anywhere. This has led to a diminishing of the common wealth: wage stagnation, widening economic inequality, the depletion of the natural world, and more. To get out of this trap,

we need to rethink the future of human exchange. In short, we need to get out of business and into betterness. HBR Singles provide brief yet potent business ideas, in digital form, for today's thinking professional.

Mechanical Failure

"Creating a new product and finding customers has gotten easier in the twenty-first century. This can partly be attributed to the march of technological progress. But there is another factor at play: a growing willingness to try new entrepreneurial ideas, even if they appear

silly at first. the second book by Priceconomics tells the stories of people who have capitalized on these changes to make a living in the modern world. These are people who tried new things - crowdfunding instead of bank loans, food trucks instead of restaurants, public launches instead of patents. They took big risks, learned how to do things on their own, and fought through major setbacks."--Back cover.

Like getting-arrested-for-dealing-with-pirates-and-forced-back-into-service kind of hard. It doesn't seem so bad--the military was a perpetual tiki party anyway--but when Rogers returns after only a year away, something has changed. These are soldiers--actual soldiers doing actual soldier things like preparing for a war that Rogers is sure doesn't exist. Rogers vows to put a stop to all this nonsense--even if it means doing actual work. With an experienced ear for military double-speak, Zieja has created a remarkable and sarcastic adventure.

Still stinging from getting their collective butts kicked in their first encounter with the Others, the Bobs now face the prospect of a decisive final battle to defend Earth and its colonies. Bob seeks help from wealthy UFOlogist, John Lear, who encourages Bob to take his story to award-winning investigative journalist George Knapp at KLAS-TV, a CBS affiliate. To prove he's telling the truth, Bob takes a group of people out into the desert to watch a test flight of the "flying saucer." On the way home, they are stopped by the police, who notify the base, and Bob loses his job. In a series of interviews with CBS TV, Bob Lazar then blows the lid off "Area 51," blows the whistle on the effort to conceal this craft from the American people, and blows up his career as a top physicist. Bob Lazar's reports have been the subject of intense controversy for decades. He has been interviewed numerous times and his story has been corroborated by other individuals he worked with and who were present when these events happened. But until now, Bob Lazar has never told his own story, in every detail in his own words, about those exciting days in the desert outside of Las Vegas and how the world came to learn about the experiments being conducted at Area 51.

Then everything changes when the Yellowstone supervolcano erupts in an explosion large enough to destroy civilization and kill half the planet. The team has just hours to get as many people as possible across to Outland before a lethal cloud of ash overwhelms them. Nothing has prepared the refugees for what they find—a world of few resources and unprecedented dangers. Somehow, they must learn to survive, because Outland may be not just a safe haven—it could be their new home. This 2019 edition has been substantially revised by the author.
