### Journal of Dental Education

This Color Atlas of Anatomy features full-color photographs of actual cadaver dissections, with accompanying schematic drawings and diagnostic images. The photographs depict anatomic structures with a realism unmatched by illustrations in traditional atlases and show students specimens as they will appear in the dissection lab. Chapters are organized by region in order of standard dissection, with structures presented both in a systemic manner, from deep to surface, and in a regional manner. This edition has additional clinical imaging, including MRIs, CTs, and endoscopic techniques. New graphics include clinically relevant nerve and vessel varieties and antagonistic muscle functions. Many older images have been replaced with new, high-resolution images. Black-and-white dissection photographs have been replaced with color photography. A companion website will include an Image Bank, interactive software (similar to an Interactive Atlas), and full text online.

### Your Lab Partners

Since 1940, when Dr. J.C. Boileau Grant created the first lab manual based on Grant's method of dissection, Grant's Dissector has clearly established its authority and preeminence as the "gold standard" of gross anatomy dissection manuals. In the last edition, the material was streamlined to focus on more accurate, specific and clear steps, based on market conditions and feedback. This edition continues to focus on the trend of reduced lab hours yet maintains the quality and reliability of Grant's original manual. Grant's Dissector, Fourteenth Edition features over 40 new figures to provide consistent appearance and include additional details, and is cross-referenced to the leading anatomy atlases, including Grant's, Netter's, Rothen, and Clemente.

Beyond the Subjectivity Trap challenges the paradigm of the hard problem of consciousness by contesting the relevance and primacy of human thought. By tracing the evolved egocentricity of the 'I' as an entrapping limitation on our thinking the book argues that once the Subjectivity Trap is understood and escaped we can appreciate the non-existence of the mind – body divide, the pure functionality of the brain, and the limitlessness of our potential.
