30 books Atlantis has held a perennial place in the collective imagination of humanity from ancient Greece onward. Many of the great minds of the occult and esoteric world wrote at length on their theories of Atlantis--about its high culture, its possible location, its ultimate demise, and their predictions of a return to Atlantean enlightenment or the downfall of modern society. Beginning with a review of the rationalist writings on Atlantis--those that use geographic and geologic data to validate their theories--renowned scholar Joscelyn Godwin then analyzes and compares writings on Atlantis from many of the great occultists and esotericists of the 19th and 20th centuries, including Fabre d'Olivet, G. I. Gurdjieff, Guido von List, Julius Evola, Edgar Cayce, Dion Fortune, and René Guénon, whose writings often stem from deeper, metaphysical sources, such as sacred texts, prophecy, or paranormal communication. Seeking to unravel and explain the histories and interpretations of Atlantis and its kindred myths of Lemuria and Mu, the author shows how these different views go hand-in-hand with the concept of cyclical history, such as the Vedic system of the four Yugas, the Mayan calendar with its 2012 end-date, the theosophical system of root races, and the precession of the equinoxes. Venturing broader and deeper than any other book on Atlantis, this study also covers reincarnation, human evolution or devolution, the origins of race, and catastrophe theory.

It is not at all surprising that insects behave like insects, birds behave like birds, and mammals behave like mammals. They execute most of their intricate behavior in a predetermined, instinctive manner. But how do they know when and how they should act? Where did the intelligence that is manifested in

nature come from? Can the current view be true, that inert matter (lacking consciousness) somehow acquired intelligence over the course of a vast span of time? Darwin's theory of evolution is widely accepted as the explanation for the varieties of life. Evolutionists attempt to explain the origin of behavioral patterns by gradual modifications of more simple behavior forms. But when we try to explain complex animal behavior this way, it becomes impossible! Nature's IQ invites the reader to investigate an alternative explanation. Is it possible that our world reflects, in many different ways, a supernatural intelligence that has applied its own infinitely ingenious solutions to create the living world?

Taking cues from Walter Benjamin's fragmentary writings on literary-historical method, Late Colonial Sublime reconstellates the dialectic of Enlightenment across a wide imperial geography, with special focus on the fashioning of neo-epics in Hindi and Urdu literary cultures in British India. Working through the limits of both Marxism and postcolonial critique, this book forges an innovative approach to the question of late romanticism and grounds categories such as the sublime within the dynamic of commodification. S. Sahota takes canonical European critics such as Theodor Adorno and Max Horkheimer to the outskirts of empire, he reads Indian writers such as Muhammad Iqbal and Jayashankar Prasad in light of the expansion of instrumental rationality and the neotraditional critiques of the West it spurred at the onset of decolonization. By bringing together distinct literary canons—both metropolitan and colonial, hegemonic and subaltern, Western and Eastern, all of which took shape upon the common realities of imperial capitalism—Late Colonial Sublime takes an original dialectical approach. It experiments with fragments, parallaxes, and constellational form to explore the aporias of modernity as well as the possible futures they may signal in our midst. A bold intervention into contemporary debates that synthesizes a wealth of sources, this book will interest readers and scholars in world literature, critical theory, postcolonial criticism, and South Asian studies.

Argon Desaki, a graduate student undertaking field research for a dissertation on the evolution of intelligent life, finds himself marooned on a planet whose inhabitants' intelligence impresses him less than their arrogance. Problems proliferate on this planet. Disruptive technologies are rapidly advancing. Greenhouse gas emissions, already dangerously high, are growing. Government is ineffective. Apathy is widespread. There are shortages of time and wisdom. And Argon's partner, Snilya, has disappeared. Exploring this problematic reality, wandering through a bewildering wilderness of facts mingled with fiction, Argon finds an ideal path toward solution of the planet's problems and his own: a revolutionary Silicon Valley startup that turns dreams into reality. Note: This is a preview edition, intended for reviewers and for those who wish to learn about the startup this book introduces without waiting for the fully polished report. Readers of this version are encouraged to post their comments here and/or email them to Argon, whose address is in the book.

This book is a collection of twenty-four papers that Michael A. Cremo, who is not a professional scientist, presented at scientific and academic conferences. Versions of some of these papers have appeared in peer-reviewed academic publications. In these papers, Cremo explores the relationship between science and religion, in terms of his specific scientific and religious commitments. Many of the papers in this book deal with archeological evidence for extreme human antiquity, consistent with the Puranic histories. Other papers explore the history of archeology in India. In his book *Human Devolution*, Cremo presented a Vedic alternative to the current theory of human origins. Some of the papers in *My Science, My Religion* are related to this topic. This collection will be of interest to theologians, scientists, historians of science, philosophers of science, and scholars of science and religion.

complex societies. Case studies from Mesoamerica, Asia, Africa, and Europe examine the relationship between political structures and economic configurations of ancient chiefdoms and states through a framework of comparative archaeology. A group of highly distinguished scholars takes up important issues, theories, and methods stemming from the nascent body of research on comparative archaeology to showcase and apply important theories of households, power, and how the development of complex societies can be extended and refined. Drawing on the archaeological, ethnohistorical, and ethnographic records, the chapters in this volume contain critical investigations on the role of collective action, economics, and corporate cognitive codes in structuring complex societies. *Alternative Pathways to Complexity* is an important addition to theoretical development and empirical research on Mesoamerica, the Old World, and cross-cultural studies. The theoretical implications addressed in the chapters will have broad appeal for scholars grappling with alternative pathways to complexity in other regions as well as those addressing diverse cross-cultural research.

He found clues to the healing process in the long-discarded theory that electricity is vital to life. But as exciting as Becker's discoveries are, pointing to the day when human limbs, spinal cords, and organs may be regenerated after they have been damaged, equally fascinating is the story of Becker's struggle to do such original work. The Body Electric explores new pathways in our understanding of evolution, acupuncture, psychic phenomena, and healing.

The Forbidden Archeologist

What is life for? What may give it meaning? Does it have any meaning at all? A sage in ancient Israel brooded over these questions. In ancient India, too, such questions drove a despairing warrior to seek answers from his divine friend Krishna. The thoughts of the sage became the wisdom book Ecclesiastes; those of Krishna, the Bhagavad-gītā. Their wisdom speaks to our deepest concerns. In Vanity Karma, wisdom meets wisdom as these two perennial classics come together, both offering us profound understanding. And a deep and authentic spiritual understanding, we may find, can infuse our lives with meaning and with joy. Vanity Karma brings you on a journey through the full text of Ecclesiastes, a journey illuminated by traditional biblical scholarship, insights from the Bhagavad-gītā, a dash of autobiography, and a steady spiritual focus.

Alternative Pathways to Complexity

Here is the book jazz lovers have eagerly awaited, the

second volume of Gunther Schuller's monumental *The History of Jazz*. When the first volume, *Early Jazz*, appeared two decades ago, it immediately established itself as one of the seminal works on American music. Nat Hentoff called it "a remarkable breakthrough in musical analysis of jazz," and Frank Conroy, in *The New York Times Book Review*, praised it as "definitive. A remarkable book by any standard unparalleled in the literature of jazz." It has been universally recognized as the basic musical analysis of jazz from its beginnings until 1933. The *Swing Era* focuses on that extraordinary period in American musical history--1933 to 1945--when jazz was synonymous with America's popular music, its social dances and musical entertainment. The book's thorough scholarship, critical perceptions, and great love and respect for jazz puts this well-remembered era of American music into new and revealing perspective. It examines how the arrangements of Fletcher Henderson and Eddie Sauter--whom Schuller equates with Richard Strauss as "a master of harmonic modulation"--contributed to Benny Goodman's finest work how Duke Ellington used the highly individualistic trombone trio of Joe "Tricky Sam" Nanton, Juan Tizol, and Lawrence Brown to enrich his elegant compositions how Billie Holiday developed her horn-like instrumental approach to singing and how the seminal compositions and arrangements of the long-forgotten John Nesbitt helped shape Swing Era styles through their influence on Gene Gifford and the famous Casa Loma Orchestra. Schuller also provides serious reappraisals of such often neglected jazz figures as Cab Calloway, Henry "Red" Allen, Horace Henderson, Pee Wee Russell, and Joe Mooney. Much of the book's focus is on the famous swing bands of the time, which were the essence of the Swing Era. There are the great black bands--Duke Ellington, Count Basie, Jimmie Lunceford, Earl Hines, Andy Kirk, and the often superb but

little known "territory bands"--and popular white bands like Benny Goodman, Tommy Dorsie, Artie Shaw, and Woody Herman, plus the first serious critical assessment of that most famous of Swing Era bandleaders, Glenn Miller. There are incisive portraits of the great musical soloists--such as Art Tatum, Teddy Wilson, Coleman Hawkins, Lester Young, Bunny Berigan, and Jack Teagarden--and such singers as Billie Holiday, Frank Sinatra, Peggy Lee, and Helen Forest.

The solution of the mystery of the pyramids of Egypt has been a problem which has not only puzzled mankind in general during the ages of the past, but which has as well mystified the minds of scholars and thinkers even to this our present day. In *Irish Wisdom Preserved in Bible and Pyramids*, which was first published in 1923, author Conor MacDari begins with the origin of the Great Pyramid and continues to explain the reasons for its existence, its message and significance. He then traces history from the time of the ancient Phoenicians through the Roman era, illustrating the part the Irish race took in these important times.

This book brings together scenarios of an India that is politically and socially egalitarian, radically democratic, economically sustainable and equitable, and socio-culturally diverse and harmonious. *Alternative Futures: India Unshackled* covers a wide range of issues, organized under four sections. It explores ecological futures including environmental governance, biodiversity conservation, water and energy. Next, it envisions political futures including those of democracy and power, law, ideology, and India's role in the globe. A number of essays then look at economic futures, including agriculture,

pastoralism, industry, crafts, villages and cities, localization, markets, transportation and technology. Finally, it explores socio-cultural futures, encompassing languages, learning and education, knowledge, health, sexuality and gender, and marginalized sections like dalits, adivasis, and religious minorities. Introductory and concluding essays tie these diverse visions together. Most essays include both futuristic scenarios and present initiatives that demonstrate the possibility of such futures. At a time when India faces increasing polarization along parochial, physical and mental boundaries, these essays provide a breath of fresh air and hope in the grounded possibilities for an alternative, decentralized, eco-culturally centred future. The essays range from the dreamy-eyed to the hard-headed, from the provocative to the gently persuasive. This book would hold appeal for a wide range of readers - youth, academics, development professionals, policy makers, government officials, activists, people's movements, media persons, business persons - concerned about the current state of India and the world, and willing to engage critically in the collective search for a better future.

Why are you the person you are? What is that invisible hand behind who you are? Man, it is often said, is not born but made. makeup and psychological disposition, also comes into the picture. But society and our biological make up are not perfect, and can never fashion a perfect nature. And herein lies the roots of the imperfections and woes that afflict human societies. Wherefore in the circumstances, is the respite for humanity? This novel dwells on this subtle subject and advances the view that we, as individuals, must re-invent our nature. We should be fashioned after the divine nature and not by society, or be held captives of our biological nature. For indeed, it is not the circumstances of man that need to be salvaged; it is the soul of man that needs salvation. In this story set in a fictitious society - Guajava - the author uses an environmental crisis raised by a genius but unconventional Professor of environmental psychology to bring out the limitations of human nature. Key personalities in Guajava respond to the crisis in radically divergent ways underpinned by their peculiar personality types, ultimately ruining their country. In the events that rapidly unfold, leaving in their fast trail a wave of fire, rubble, dust and ash, the author uses suspense to maximum effect. In a departure from the traditional literary style of African writers, the author has employed a dramatic fast-paced and action-packed style that grips the reader from beginning to the end.

while the Egyptian Book of the Dead refers to the Soul becoming one with the ever-renewing phoenix. Yet what is the phoenix but a symbol of our own Angelic Twin who resides in the highest realms, the essence of our Soul? In this book, Tricia McCannon explains how to discover the angelic realms where the highest parts of yourself reside and become the catalyst for your own path of ascension. Exploring the Soul's angelic origins, the Nine Orders of Angels, and the multi-dimensional landscapes of Heaven, McCannon takes you on the journey each Soul makes as it descends from the higher vibrational realms to arrive in the world of form. Drawing from the perennial wisdom of the Gnostics, Tibetans, Egyptians, Buddhists, Hindus, Hebrew mystics, and the ancient Mystery traditions, she looks at what our ancient ancestors have to say about the nature and history of the Soul. She reveals how, once embodied, the Soul loses its ability to vibrate with the highest celestial levels causing it to forget its purpose. She addresses how our illusion of separation from Divine Oneness arises, causing us to move away from the Light and become wrapped up in the Shadow of fear and suffering. She explains the six stages of Soul Evolution we must pass through to heal the wounds of separation, reawaken to higher vibrations, and remember our Soul's purpose, the reason your Soul chose this incarnation. McCannon shares stories from those who have returned from the Otherside, tales of revelation, temples of learning, and crystal cities of light. Presenting the great Course Curriculum of the Soul, the lessons we must master to complete our missions on Earth, the author shows that by remembering our divine essence we can move beyond conflict and struggle to embrace the love and joy that reside eternally at the core of our being.

Science Education in India

The ancient Chinese were profoundly influenced by the Sun, Moon and stars, making persistent efforts to mirror astral phenomena in shaping their civilization. In this pioneering text, David W. Pankenier introduces readers to a seriously understudied field, illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art, architecture, calendrical science, myth, technology, and political and military decision-making. As elsewhere in the ancient world, there was no positive distinction between astronomy and astrology in ancient China, and so astrology, or more precisely, astral omenology, is a principal focus of the book. Drawing on a broad range of sources, including archaeological discoveries, classical texts, inscriptions and paleography, this thought-provoking book documents the role of astronomical phenomena in the development of the 'Celestial Empire' from the late Neolithic through the late imperial period.

The Mists of Rāmañña

This is the first volume exclusively dedicated to planning education, with a focus on India and learning from global experiences for India. Prior to the 1990s, planning education in India was largely confined to national and local economic concerns. Within a globalized scenario, such pedagogies and theories have become outmoded. With new concerns emerging in planning, new pedagogical tools and theorizations need to be developed within planning curricula to provide today's planners with the wherewithal to adapt to changing and globalizing cities and regions in India. Therefore, the eminent contributors to this volume deal exclusively and comprehensively with planning education in a globalized context. Divided into four thematic sections, this volume provides a comprehensive view of planning education in India, with focus on: □ The trajectory of planning education in India. □ The kinds of knowledge used for teaching in Indian planning schools, and whether some sort of integration of diverse knowledges is achieved. □ The ethical foundations of

The book should be of special interest to researchers, school administrators, curriculum designers and policymakers. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors.
