What is Translation History?

This book presents a dynamic history of the ways in which translators are trusted and distrusted. Working from this premise, the authors develop an approach to translation that speaks to historians of literature, language, culture, society, science, translation and interpreting. By examining theories of trust from sociological, philosophical, and historical studies, and with reference to interdisciplinarity, the authors outline a methodology for approaching translation history and intercultural mediation from three discrete, concurrent perspectives on trust and translation: the interpersonal, the institutional and the regime-enacted. This book will be of particular interest to students and scholars of translation studies, as well as historians working on mediation and cultural transfer.

What if you are stuck in a wheelchair with nothing to do but think about love? The life of Kobi, a cynical, pessimistic sixty-year-old retiree, turns upside down overnight due to a leg injury. He finds himself wheelchair-bound and helpless with little to do except reminisce about his life and past loves. A new neighbor, Leah, falls in love with him, and they spend hours discussing the meaning of life and love. What if your loved one suddenly disappears? Kobi tells Leah about the heart-breaking end of his relationship with Rachel, an English actress whom he had loved deeply when he had lived in London 20 years before. That intense love affair of several years ended abruptly when Rachel broke it up with a letter and then disappeared without a trace. Kobi's heart was broken, leaving him in pain to this day. Yet he never lost hope of meeting Rachel again. What if there is new hope of seeing her again? When his leg healed, he received word from a friend who had seen her recently. Will Kobi succeed in connecting with Rachel again and finally begin to grasp the meaning of love? This is a story that will keep you

On the surface, choosing the correct propeller for a particular boat seems simple. But one factor affects another, which then affects another factor, leading many boaters to believe that propeller selection depends more on black magic than logic. All the questions are answered in this complete reference, the first of its kind. This clear, easy-to-use handbook for all small boats is written not for Ph.D.s seeking the latest wrinkle in high-tech propeller design, but as a practical aid for the average mechanic, engineer, boatbuilder, fleet operator, serious yachtsman, or naval architect.

With a little planning and foresight, refrigeration is absolutely not necessary. In this book, the author discusses how to store food and make delicious meals without the use of a refrigerator. From milk and cheese to eggs and meat, the book lays out ways any boater, hiker, or camper can have home-cooked meals without artificially freezing or cooling their food. Broken down into handy categories, this reference guide gives techniques on how to properly wash, store, treat, and cook your food for maximum flavor and usability. Written by a dedicated sailor whose own skills were honed on months-long journeys, the tips in this guide can be put to use by anyone trying to avoid heavy, power-sucking refrigerators. Sailors, campers, and hikers all could benefit, and the books serves equally well for those in RVs, those with limited space, and those trying to live off the grid.
