This book provides insight into the development of effective climate policy instrumentation in two divergent and mutually exclusive directions. Examining the role of political philosophies, the book explains why current climate policy is ineffective and unable to halt rapidly rising atmospheric concentrations of CO<sub>2</sub>, and suggests strategies for ending the current stalemate in climate governance. Drawing on examples from real-world case studies and challenges, the author first sets out an instrumentation approach based on a command and control strategy which involves identifying the technologies and behavior key to meeting the required emissions reductions, such as energy efficient homes and zero-emission cars. The second strategy concerns institutional rearrangement, creating incentives and options which will allow for decentralized climate action. This approach would transform and strengthen current emission trading systems, such as the EU ETS, into a price stabilized system covering all fossil fuels, and ultimately as an emission tax, as well as creating an open electricity market. These approaches not only highlight that fundamental changes in climate policy instrumentation are now vital, but that consistent strategies such as those laid out by the author are necessary if we are to avoid costly and ineffective alternatives. Exploring key issues such as the relationship between instrumentation and broader political philosophy, as well as applying a systems oriented design methodology for effective instrumentation, this book will be of great relevance to scholars and policy makers with an interest in climate change and environmental politics.

### **Skills for the TOEFL IBT Test**

This book opens new perspectives into the Cold War ideological confrontations. Using Austria and Finland as an example, it shows how the Cold War battles for the hearts and minds of the people also influenced policies in countries that wished to stay outside the conflict. Following the model of older European neutrals, Austria and Finland sought to combine neutrality with democracy. The combination was eagerly

challenged by ideological Cold Warriors on both sides of the divide and questioned at home too. Was neutrality risking the neutrals' commitment to democracy, or did the commitment to the western type of democracy threaten their commitment to neutrality? Confronting these doubts grew into an organic part of practicing neutrality in the Cold War world. The neutrals needed to be exceptionally clear regarding the ideological foundations of their neutrality. Successful neutrality required a great deal of conceptual consistence and domestic unanimity. None of this was pre-given in Austria or Finland. However, in the model of Switzerland and Sweden, (armed) neutrality was systematically integrated with the official state ideology and promoted as a part of national identity. Legacies of these policies outlived the end of the Cold War.
