**BASED ON THE INCREDIBLE GRADUATION SPEECH WITH OVER 14 MILLION VIEWS ON**

**YOUTUBE** If you want to change the world, start off by making your bed. On May 17, 2014, Admiral William H. McRaven addressed the graduating class of the University of Texas at Austin on their Commencement day. Taking inspiration from the university's slogan, "What starts here changes the world," he shared the ten principles he learned during Navy Seal training that helped him overcome challenges not only in his training and long Naval career, but also throughout his life; and he explained how anyone can use these basic lessons to change themselves-and the world-for the better. Admiral McRaven's original speech went viral with over 10 million views. Building on the core tenets laid out in his speech, McRaven now recounts tales from his own life and from those of people he encountered during his military service who dealt with hardship and made tough decisions with determination, compassion, honor, and courage. Told with great humility and optimism, this timeless book provides simple wisdom, practical advice, and words of encouragement that will inspire readers to achieve more, even in life's darkest moments.

## A Manual of Sail Trim

In August 1979, 303 yachts began the 600-mile Fastnet Race from the Isle of Wight off the southwest coast of England to Fastnet Rock off the Irish coast and back. It began in fine weather, then suddenly became a terrifying ordeal. A Force 10, sixty-knot storm swept across the North Atlantic with a speed that confounded forecasters, slamming into the fleet with epic fury. For twenty hours, 2,500 men and women were smashed by forty-foot breaking waves, while rescue helicopters and lifeboats struggled to save them. By the time the race was over, fifteen people had died, twenty-four crews had abandoned ship, five yachts had sunk, 136 sailors had been rescued, and only 85 boats had finished the race. John Rousmaniere was there, and he tells the tragic story of the greatest disaster in the history of yachting as only one who has sailed through the teeth of a killer storm can. With a new introduction by the author.

## Make Your Bed

Completely revised and updated to address changes in technology, this new edition is the definitive guide to the art and science of sailing. Since the publication of the widely hailed first edition in 1983, *The Annapolis Book of Seamanship* has set the standard by which other books on sailing are measured. Used throughout America as a textbook in sailing schools and Power Squadrons, *The Annapolis Book of Seamanship* thoroughly and clearly covers the fundamental and advanced skills of modern sailing. This edition of *Annapolis* is a major overhaul. Over half the book has been revised; old topics and features have been updated, and many new ones have been introduced. The design has been modernized, and many color illustrations have been added. As big and detailed as *Annapolis* is, the wealth of technical information (including dozens of step-by-step instructions) is presented here in a way that is uniquely readable; it's both useful and easy to use. This is because John Rousmaniere and artist Mark Smith bring to *Annapolis* decades of experience both as sailors and as professional communicators. *Annapolis* emphasizes the standard skills and proven methods that eliminate error and confusion, ensure security in emergencies, and

allow every sailor more time for enjoyment on the water. Much has changed on the water since 1983 when this book was originally published. Black buoys are now green, the Global Positioning Satellite navigation system (GPS) is almost universally used, new types of anchors and sails have appeared, safety skills and gear are vastly improved, many more women are commanding boats, and catamarans and trimarans are common where only monohulls used to sail. But for all these modern developments, the basic skills and spirit of sailing have not changed at all. Sail trimming, keeping up steerageway, maintaining the dead reckoning plot, heaving-to -- these fundamentals are as important now as ever and receive much attention here. Among the innovations in this edition are: \* Basic skills in early chapters: Fundamental sailing and boat-handling skills and gear, which are introduced in chapters 1, 2, and 3. \* "Hands On" segments: Three dozen special sections, each devoted to a particular seamanship problem and an expert solution. \* More how-to tips: Additional rules of thumb that guide a crew quickly and successfully through seamanship problems. \* New coverage of multihulls: Advice on evaluating, anchoring, and handling catamarans and trimarans under sail (including in storms). \* More on emergencies: New material on emergencies, safety, and heavy-weather sailing, including a section on preparing a docked boat for a hurricane. \* Equipment updates: Expanded coverage of the use and care of modern gear and hardware, including radar, GPS, rescue devices, and asymmetrical spinnakers. \* Terminology: Full definition and illustration of major terms when they're first introduced, with alternative language provided in parentheses. \* Gender: The use of feminine personal pronouns, which reflect the fact that more women are captaining and sailing boats than ever before. From navigation and seamanship to boat and gear maintenance, from pleasure cruising to heavy-weather sailing, here is the definitive, state-of-the-art guide that provides systematic step-by-step techniques to see you through every situation on deck and in the cockpit.

## Let's Go Sailing

"Sailing is Fun - A Beginners Manual for Young Sailors" is written for kids. This book introduces basic terms, concepts and procedures which all new sailors need to understand, but does so in a "kid friendly" manner. The book also stresses water safety. It is the author's hope that once a child is properly introduced to the joys and thrills of sailing, a life-long passion will develop. In this modern 21st century world, there is a lot of "bad stuff" out there for kids to get into. Sailing is a great alternative. It's fast (or can be), it's fun, and it's green, totally green.
