### **High Stakes Game**

Birders in Central America have long known that Nicaragua is one of the best birding locations in the world, and with tourism to the country on the upswing, birders from the rest of the world are now coming to the same conclusion. The largest country in Central America, Nicaragua is home to 763 resident and passage birds, by latest count. Because of its unique topography—the country is relatively flat compared to its mountainous neighbors to the north and south—it forms a geographical barrier of sorts, which means that many birds that originate in North America reach their southernmost point in Nicaragua, while many birds from South America reach their northernmost point in the country. There are few places in the world where you can find both a Roadrunner and a Scarlet Macaw. Birds of Nicaragua features descriptions and illustrations of all 763 species currently identified in the country, along with information about 44 additional species that are likely to appear in the coming years. Range maps, based on years of field research, are color-coded. Other features include a richly illustrated

Founders of the phenomenally successful publishing company Lonely Planet, Tony and Maureen Wheeler have produced travel guides to just about every corner of the globe. Lonely Planet Publications was born in 1973 when the Wheelers self-published a quirky travel guide, Across Asia on the Cheap. This was quickly followed by what soon became the backpackers' bible, South-East Asia on a Shoestring. Going boldly where no other travel publisher had ventured, they catered to a new generation of independent, budget-conscious travelers long before the advent of mass tourism. Unlikely Destinations: The Lonely Planet Story is a unique mix of autobiography, business history and travel book. It traces Tony and Maureen Wheeler's

personal story as well as the often bumpy evolution of their travel guide business into the world's largest independent travel publishing company. Not surprisingly, after thirty years in the business the Wheelers have an unrivalled set of anecdotes which they share in *Unlikely Destinations: The Lonely Planet Story*. They have been hassled by customs, cheated by accountants, let down by writers, banned in Malawi, berated for their Burma guide and had books pirated in Vietnam. Tony has been gored by a cow in Benares, declared dead around the world in an assortment of gruesome and greatly exaggerated accounts and their company has been accused of the "Lonely Planetization" of the world. Through it all, from the heady days of discovery in the '70s to the rocky patch after the September 11th terrorist attacks, the Wheelers' passion for the planet and traveling certainly hasn't diminished, and comes shining through in this enthralling travelogue. But above all, their memoir reveals the spirit of adventure that has made them, according to the *New York Daily News*, "the specialists in guiding weird folks to weird places."

Pete Jordan, author of the wildly popular *Dishwasher: One Man's Quest to Wash Dishes in All Fifty States*, is back with a memoir that tells the story of his love affair with Amsterdam, the city of bikes, all the while unfolding an unknown history of the city's cycling, from the craze of the 1890s, through the Nazi occupation, to the bike-centric culture adored by the world today. Pete never planned to stay long in Amsterdam, just a semester. But he quickly falls in love with the city and soon his wife, Amy Joy, joins him. Together they explore every inch of their new home on two wheels, their rides a respite from the struggles that come with starting a new life in a new country. Weaving together personal anecdotes and details of the role that cycling has played throughout Dutch history, Pete Jordan's *In the City of Bikes: The Story of the Amsterdam Cyclist* is a poignant and entertaining read.

Neither the tourism industry nor the tourist has responded convincingly to calls for more responsibility in tourism. Ethical consumption places pressure on travellers to manage a large number of decisions at a time when hedonic motivations threaten to override other priorities. Unsurprisingly, tensions occur and compromises are made. This book offers new insight into the motivations that influence tourists and their decision-making. It explores how consumers navigate the responsible tourism market place and provide a rich understanding of the challenges facing those seeking to encourage travellers to become responsible. Not only will the book provide an improved interpretation of the complexity of ethical consumption in tourism, but it will also offer a variety of stakeholders a deeper understanding of: the key challenges facing stakeholders in the production and consumption of responsible tourism how ethical consumers can be influenced to consume ethically the gaps in consumer knowledge and how to broaden the appeal for individuals to make more informed ethical decisions how tour operators can respond to this emerging market by innovative product development how to design informative marketing communications to encourage a greater uptake for responsible holidays how destinations can tailor their products to the ethical consumer market how destination communities and management organisations can target responsible tourists through the provision of sustainable alternatives to mass-market holiday products.
