Advocated (and attacked) by commentators across the political spectrum, paying every citizen a basic income regardless of their circumstances sounds utopian. However, as our economies are transformed and welfare states feel the strain, it has become a hotly debated issue. In this compelling book, Louise Haagh, one of the world's leading experts on basic income, argues that Universal Basic Income is essential to freedom, human development and democracy in the twenty-first century. She shows that, far from being a silver bullet that will transform or replace capitalism, or a sticking plaster that will extend it, it is a crucial element in a much broader task of constructing a democratic society that will promote social equality and humanist justice. She uses her unrivalled knowledge of the existing research to unearth key issues in design and implementation in a range of different contexts across the globe, highlighting the potential and pitfalls at a time of crisis in governing and public austerity. This book will be essential reading for anyone who wants to get beyond the hype and properly understand one of the most important issues facing politics, economics and social policy today.

Power Plants: Effects on Fish and Shellfish Behavior reviews the effects of power plant construction, operation, and maintenance on the behavior of fish and important shellfish populations such as blue crabs, crayfish, lobsters, penaeid shrimp, and bivalve molluscs. The emphasis is on the link between power plant design and fish aggregation phenomena. The effects of biocides and temperature on fish behavior are also examined. This book is comprised of 13 chapters and begins with a discussion on the economic relevance of power plants and their environmental impact on fish and shellfish populations. The potential of power generating facilities to act as a physical stimulus for fish aggregation is then considered. The effect of parameters associated with power plants, such as temperature and biocides, on fish behavior is the subject of subsequent chapters. The ecological and behavioral characteristics influencing entrainment of fish eggs and young at cooling water intakes are analyzed. This monograph is oriented to those involved in assessment of power plants on aquatic communities, including consultants, state and federal regulators, and electrical utility personnel, as well as researchers in physiology,

ecology, and ethology.

Although cardiac surgery has made an enormous progress during the last decades, the discipline has to cope with essential changes: Patients are increasingly cared for by cardiologists and therefore referred to the surgeon in a later stage of disease. Consequently, they are more often in an increasingly serious state or in advanced age with significant comorbidities. In order to meet the requirements of these different patient groups, cardiosurgical treatments require special protectional strategies for the heart in order to perform the planned operations safely. This book presents the latest knowledge of modern techniques of myocardial protection taking into consideration the different patient groups and current scientific strategies. Furthermore, it discusses present and future scientific approaches in myocardial protection and preservation.

Only the best prepared are chosen to start the highly competitive multimillion-dollar training programs that transform aspiring candidates into U.S. military aviators. This fully updated edition of Barron's Military Flight Aptitude Tests provides would-be aviators in all five U.S. armed services with the competitive edge they will need to score their best and maximize their chances of being selected! This book is an effective, full-spectrum resource for officer candidates, ROTC cadets from all services, and current military members. Six full-length practice tests (two per service) with answers and explanations for every question get readers ready for the Air Force Officer Qualifying Test (AFOQT), the Selection Instrument for Flight Training (SIFT), and the Navy/Marine Corps/Coast Guard Aviation Selection Test Battery (ASTB-E). Test overviews and detailed review sections give potential pilots the boost they need to rise to the top of the selection list, and most of the review subjects apply to all three tests. Successful aviation applicants strongly recommend working through every valuable review section, and the other services' tests are great for extra practice to reinforce your learning. Written by a veteran, joint qualified military officer and instructor, this book's review sections cover language skills, reading comprehension, math knowledge, arithmetic reasoning, mechanical comprehension, aviation and nautical technical information, science, and specific mental skills such as block counting, finding hidden figures, and spatial apperception. The author also coaches readers on effective study techniques, provides expanded information resources, and gives pilot candidates a thorough preview of how each test is structured and conducted.

Here is the second revised and updated edition of probably the most practical sourcebook on similarity methods and modeling techniques available. Written by leading authorities who incorporate many of the latest advances in the field, this new work maps out techniques for modeling as well as instrumentation and data analysis for an extremely wide array of problems in engineering dynamics. This practical reference uses experimental test data on various engineering problems demonstrating exactly how and why these similarity methods work. The problems involve spread of oil slicks, explosive cratering, car crashes, space vehicle heat exchange, explosive forming, and more. The spectrum of topics covered and number of examples are far greater than in other texts. Of particular importance are the dissimilar material modeling techniques which bring new versatility and freedom to the modeler in structural dynamics. The book also contains a clear, in-depth discussion of the theory underlying modeling and includes alternate methods for developing model laws. The work will undoubtedly prove invaluable to every professional involved in testing or design of dynamic experiments.

New Solutions for the Heart

Oxford Preparation Course for the TOEFL iBT Exam is a communicative, theme-based approach to learning the skills needed to take the TOEFL Internet-based Test (iBT). Activities incorporate thorough explanation and practice of the four skills tested on the TOEFL. This multimedia program integrates the student book, audio CD, DVD, and interactive website. Within each thematic chapter, there is a selection of academic topics from the four TOEFL-tested subject areas of Life Science, Physical Science, Social Science and Arts. With this multi-disciplinary approach, students sample the range of topics addressed on the exam and yet feel a sense of cohesion in their study. Skills introduced in each chapter are reinforced through varied and engaging readings, audio recordings, and videos. The academic-skills approach combined with high-interest, thematic academic content allows for better retention of information and makes for a better classroom text that keeps students interested. As well, the approach to skill testing in the book is in-line with the Educational Testing Service's (ETS) pedagogical approach to the TOEFL, with a heavy focus on the Academic Word List. In order to increase students' comprehension of tested material and improve their test scores, Oxford Preparation Course for the TOEFL iBT Exam includes a complete answer key that explains the reasons why each answer is correct or incorrect. Two complete practice tests are available on the book's companion website. The Oxford Preparation Course for the TOEFL iBT Exam DVD contains lectures and authentic content to enliven the classroom and make instructors' jobs easier.

Britain in the early eighteenth century: an introduction that is both informative and imaginative, reliable and entertaining. To the tradition of travel writing Daniel Defoe brings a lifetime's experience as a businessman, soldier, economic journalist and spy, and his Tour (1724-6) is an invaluable source of social and economic history. But this book is far more than a beautifully written guide to Britain just before the industrial revolution, for Defoe possessed a wild, inventive streak that endows his work with astonishing energy and tension, and the Tour is his deeply imaginative response to a brave new economic world. By employing his skills as a chronicler, a polemicist and a creative writer keenly sensitive to the depredations of time, Defoe more than achieves his aim of rendering 'the present state' of Britain.

Eugene Grasset (1845-1917), the Swiss painter, sculptor, and illustrator, was a pioneer in Art Nouveau design, and the original book from which these color plates are taken is still acknowledged as a major source of Art Nouveau patterns and motifs. Grasset illustrated each plant in the manner of a botanical watercolor and then developed the natural structure and tones in different pattern and color combinations. All the plates included here give a true flavor of Grasset's original volume, and form an invaluable compendium of decorative motifs and color schemes that will inspire illustrators, designers, and everyone who appreciates Art Nouveau.

Increase your TOEFL iBT score by increasing your speaking and writing scores. How? By using the strategy called argument mapping. Why argument mapping? Because the TOEFL iBT speaking and writing sections are all argument-based tasks. That means if you want high speaking and writing scores, you must know how to map out (develop and deliver) spoken and written arguments, quickly and proficiently. With argument mapping, you will be able to do just that. Best of all, you can apply argument mapping to all six speaking tasks and both writing tasks. That means you will spend less time reading about strategies and more time practicing them. You Will Also Learn: * Essential rhetorical strategies and opinion development strategies * Step-by-step basic responses for all speaking and writing tasks * Step-by-step advanced responses for all speaking and writing tasks * Step-by-step emergency responses for all speaking and writing tasks * How to revise your spoken and written responses to maximize scoring * How to rate spoken and written responses quickly and proficiently ARGUMENT DEVELOPMENT Learn basic and advanced argument development strategies to maximize your speaking and writing scores. By doing so, you can increase your TOEFL score. ARGUMENT MAPPING Learn test-proven speaking and writing strategies quickly and proficiently using the graphics-based strategy called argument mapping. SCORING STRATEGIES Learn how to think like a TOEFL rater so you know exactly what to say and write to maximize scoring.

The Postal Exam Preparation Book

Why does this book speak of the girl child and not of the child, whether boy or girl? The girl child is the endangered sex in our society. She remains entrapped in a complex social process that 'naturalises' her deprivation. Her place is within the family which traditionally has been viewed as a specially nurturing and protecting institution for her. Critically examining this view, the authors raise vital questions on gender-based discrimination within the family. Thirteen case studies poignantly reveal the way discrimination occurs. The authors have used the data for West Bengal compiled by the School of Women's Studies, Jadavpur University, as part of the national project on the girl child that was sponsored by the Indian government and carried out in twenty two women's studies centres. The book surveys 600 sample households, covering girls aged 7-18 years in selected rural and urban areas. It offers detailed analysis of the girl child's mother and her perceptions of her children; her daughters in particular.

This text provides an overall research design strategy by emphasizing how research hypotheses relate to treatment design. The author provides as realistic a setting as possible for conducting an actual research project. Examples, often based on actual research studies, describe the research venue and establish a specific problem; then the corresponding research hypothesis is identified with a treatment design that addresses it. The examples provide practical pointers relating the treatment design to the experiment design.

Longman Preparation Series for the TOEIC Test

Franchising is big business. Annually the UK franchising industry is worth over £9.5billion, employs 326,000 people and introduces around 3,000 new small businesses into the UK. Last year 95% of all franchisees reported profitability making it one of the safest ways to start up a business. Given these statistics, it is not surprising that franchising continues to expand, both in popularity and economic terms as individuals are able to enter the market with a proven brand and business formula to follow. The Franchising Handbook is a comprehensive and accessible guide for both franchisees and franchisors. It offers advice on the best way to choose a franchise, and is illustrated throughout with real-life case-studies plus an A-Z directory of franchises arranged by each major market. Key topics covered include: The Franchising Boom: success stories, size and scope of the UK franchising sector, how franchising works and the pros and cons How to Choose a Franchise: Self-assessment, preparing yourself, using an expert, the franchise contract, raising finance, what to expect next How to Franchise Your Business: Expanding your business, research, sources of franchise revenue, services provided by the franchisor, training and operating manuals Prospects for the future
