## Anvil of Stars

As a private banker working for the largest bank in the world (UBS), Brad Birkenfeld was an expert in Switzerland's shell-game of offshore companies and secret numbered accounts. He wined and dined ultrawealthy clients whose millions of dollars were hidden away from business partners, spouses and tax authorities. As his client list grew, Birkenfeld lived a life of money, fast cars, and beautiful women, but then he discovered that UBS was planning to betray him, so he blew the whistle to the US Government. The Department of Justice scorned Birkenfeld's unprecedented whistleblowing and attempted to silence him with a single charge of conspiracy. Yet Birkenfeld would not be intimidated. He took his secrets to the US Senate, Securities and Exchange Commission and the Internal Revenue Service, where he prevailed. His bombshell revelations helped the US Treasury recover over

\$12 billion in back taxes, fines and penalties from American tax cheats. But Birkenfeld was shocked to discover that at the same time he was cooperating with the US Government, the Department of Justice was still doggedly pursuing him. He was arrested, pled guilty, and served 31 months in federal prison. When he emerged, the Internal Revenue Service gave him a whistle-blower award for \$104 million, the largest such payout in history. A page-turning real-life thriller, "Lucifer s Banker" is a fascinating behind-the-scenes look at the secret Swiss high-net-worth banking industry and a harrowing account of our government s justice system. Readers will follow Birkenfeld as they will share his outrage with the incompetence and possible corruption at the Department of Justice, and they will cheer him on as he hammers one of the most well-known and powerful banks in the world."

“A genre-defying blend of crime writing and science fiction.”—Alexandra Alter, *The New York Times* Detective Hank Palace returns in the second in the speculative mystery trilogy set on the brink of the apocalypse and winner of the 2014 Philip K. Dick Award. There are just 77 days before a deadly asteroid collides with Earth, and Detective Palace is out of a job. With the Concord police force operating under the auspices of the U.S. Justice Department, Hank's days of solving crimes are overuntil a woman from his past begs for help finding her missing husband. Brett Cavatone disappeared without a trace—an easy feat in a world with no phones, no cars, and no way to tell whether someone's gone “bucket list” or just gone. With society falling to shambles, Hank pieces together what few clues he can, on a search that leads him from a college-campus-turned-anarchist-encampment to a crumbling coastal landscape where anti-immigrant militia fend off “impact zone” refugees. Countdown City presents another fascinating mystery set on brink of an apocalypse--and once again, Hank Palace confronts questions way beyond “whodunit.” What do we as human beings owe to one another? And what does it mean to be civilized when civilization is collapsing all around you?

Fictional accounts of the end of the world rarely explore the end of humanity; instead they present the end of what we now know and the opportunity to start over. Postapocalyptic Fiction and the Social Contract: 'We'll Not Go Home Again' contends that postapocalyptic fiction reflects one of our most basic political motivations and uses these fictional accounts to explore the move from the state of nature to civil society through a Hobbesian, a Lockean, and a Rousseauian lens.

### **Postapocalyptic Fiction and the Social Contract**

Sixty-five million years ago, a comet or asteroid larger than Mount Everest slammed into the Earth, inducing an explosion equivalent to the detonation of a hundred million hydrogen bombs. Vaporized detritus blasted through the atmosphere upon impact, falling back to Earth around the globe.

Disastrous environmental consequences ensued: a giant tsunami, continent-scale wildfires, darkness, and cold, followed by sweltering greenhouse heat. When conditions returned to normal, half the plant and animal genera on Earth had perished. This horrific chain of events is now widely accepted as the solution to a great scientific mystery: what caused the extinction of the dinosaurs? Walter Alvarez, one of the Berkeley scientists who discovered evidence of the impact, tells the story behind the development of the initially controversial theory. It is a saga of high adventure in remote locations, of arduous data collection and intellectual struggle, of long periods of frustration ended by sudden breakthroughs, of friendships made and lost, and of the exhilaration of discovery that forever altered our understanding of Earth's geological history.

Earth was stagnating from a lack of resources, from corrupt governments that stayed in power by keeping their people in ignorance and poverty, and by the established power structures that stifled the creative technologies that could solve the planet's problems. But the governments and power structures didn't yet control space, where bold new techniques could freely be applied and the vast resources of the solar system could be utilized by such courageous men and women as: \* Aneas MacKenzie—he had believed in the man he had helped to reach the office of the presidency of the United States, and had tirelessly rooted out corruption wherever he found it, until the trail led straight back to the White House. After that, no place on Earth was safe for him. \* Laurie Jo Hansen—she controlled a multi-national corporation more powerful than many governments. Unlike those governments, she wanted to see Earth's problems solved and reaching the high frontier was the only way to do that. \* Kevin Senecal—he had made the mistake of fighting back against a juvenile gang, and accidentally killing one of them while escaping. Both the gang and the law were after him, and on all of Earth there was no place to hide. \* Ellen MacMillan—a young employee of the Hansen Corporation who fascinated Kevin, she was on a secret mission, and the biggest secret was her real name.
