Here are 51 easy-to-use, classroom-tested alternatives to the "stand and deliver" teaching techniques that cause so many students to tune out or drop out. Teachers report that these techniques motivate students to participate in learning, as they build confidence and are supported by compelling and safe ways to demonstrate their knowledge and understanding of lessons. Refined through years of classroom experiences and supported by updated research, this 2nd edition delivers a dozen new techniques to engage K-12 students in active learning. The authors provide detailed descriptions of the Total Participation Techniques (TPTs) with step-by-step instructions--plus reproducible blackline masters for student response cards as well as posters to remind you to use the techniques. They also suggest how you can adapt and personalize the techniques to fit your context and content. Packed with examples from authentic classrooms, Total Participation Techniques is an essential toolkit for teachers who want to present lessons that are relevant, engaging, and cognitively challenging. Pérsida Himmele and William Himmele are professors who regularly work with preservice teachers and consult with educators in U.S. and international schools. They are also the authors of Total Literacy Techniques.

If you want to get more out of your Gartner research subscription, this book is for you! Whether you are a software buyer, a large or small vendor, or are wondering how Gartner can help you make better investment decisions, this book will give you new insights to Gartner's research. By studying the methodology behind such popular analytical tools as the Magic Quadrant, you will understand how a vendor earned its rating and whether or not the ratings are justified! Starting with the history of Gartner and how it compares to other IT analyst firms, this book gives a realistic assessment of the value of Gartner research to a company and provides ideas about other resources that could complement Gartner's analysis. You will also have the tools to level the playing field between large, medium and small vendors when using Gartner's analysis in selecting software. By reading this book, you will: Evaluate whether or not a Gartner subscription is of value to your company Adjust the Magic Quadrant to get a more realistic assessment of large and small vendors and their products Increase the value of your interactions with Gartner analysts Understand Gartner's biases and how Gartner makes money, and how this impacts its research results Appreciate the effects of cloud computing on Gartner, and why it matters to you Choose consulting services with confidence Assess the value of Gartner's other analytical products to your business

## The Shopping Revolution

This new model of human interaction has been chosen by Google to train the entire company worldwide (30,000 employees), is the #1 book for your career chosen by The Wall Street Journal's website, and is labeled "phenomenal" by Lawyers' Weekly and "brilliant" by Liza Oz of the Oprah network. Based on more than 20 years of research and practice among 30,000 people in 45 countries, Getting More concludes that finding and valuing the other party's emotions and perceptions creates far more value than the conventional wisdom of power and logic. It is intended to provide better agreements for everyone no matter what they negotiate - from jobs to kids to billion dollar deals to shopping. The book, a New York Times bestseller and #1 Wall Street Journal business best seller, is based on Professor Stuart Diamond's award-winning course at the Wharton Business School, where the course has been the most popular over 13 years. It challenges the conventional wisdom on every page, from "win-win" to BATNA

to rationality to the use of power. Companies have made billions of dollars so far using his new model and parents have gotten their 4-year-olds to willingly brush their teeth and go to bed. Prof. Diamond draws from his experience as a Pulitzer Prize winning journalist at The New York Times, Harvard-trained attorney, Wharton MBA, U.N. Consultant in many countries and manager and executive in many sectors, including technology, agriculture, medical services, finance, energy and aviation. "The ROI from reading Getting More will make it the best investment you make this year," says Rhys Dekle, the business development head of the Microsoft Games division, which produces X-Box. He added that the book was his team's best investment of the year too. The model was also used to quickly solve the 2008 Hollywood Writer's Strike. The advice is addressed through the insightful stories of more than 400 people who have used Prof. Diamond's tools with great success: A 20% savings on an item already on sale. An extra \$300 million profit in a business. A woman from India getting out of her own arranged marriage. Better relationships with the family, including teenagers. Raises at work. Better jobs. Dealing with emotional situations. Meeting one's goals. Finding better things to trade. Solving cultural and political problems, sports conflicts, and ordinary arguments. The book is intended to be used in any situation. The most common response is "life changing", beginning on page one. "The most inspirational book I have read this year" said David Simon, an attorney in San Francisco, CA. "This book can change the world," says Craig Silverman, Investment Advisor, Long Island, NY

## The War with Grandpa

## Surgery, Gynecology & Obstetrics

The unique core quadrant methodology illustrated in this guide presents a framework for improving any manager's workplace performance. The core quadrant system is built on the principles of the enneagram and further refines the core qualities that define the enneagram's nine personality types. By recognizing qualities such as determination, precision, flexibility, orderliness, and empathy in oneself and one's employees, managers can create environments that allow individuals to flourish within organizations. This system provides managers with insight into the motivations of their employees and is particularly valuable in dealing with difficult or incompatible personality types.

In her book, *Raising Kids with Cochlear Implants*, Amy Milani shares personal narratives about her experience raising a son and daughter with cochlear implants. Excerpts from a journal she wrote following her son's surgery describe exactly how he began listening and learning language with a cochlear implant. Stories pulled from daily life as expatriates in Germany reveal how her son acquires a selection of favorite words. When her daughter is also born with hearing loss, the family moves back to the U.S. to find an appropriate preschool and support system for cochlear implants and to fully embrace oral deaf education. In alternate chapters, Amy discusses broader issues affecting family life such as the challenges a young child faces wearing equipment and the social implications of hearing in a way that's unfamiliar to most people. Her narratives provide authentic evidence of the joys and struggles parents experience when helping children with cochlear implants transition into the hearing world. Speaking from thirteen years of experience, Amy addresses the commitment required by parents to help their children learn to listen and speak with cochlear implants. Her personal narratives are of a family ready to take on the responsibility for their children's hearing well beyond surgery. She explains how her son and daughter are part of a new generation of kids identified early with hearing loss who grow up with cochlear implants, relying on parents to make it all happen. She calls these children "Generation CI." In this book, she motivates new parents to get answers about their child's hearing loss and hopes to reach those who are interested in learning more about what life is like for families with young children who have cochlear implants.

## The Philadelphia Polyclinic

Near Fordyce, New Mexico in the midst of the Sonoma Desert lies the Sonoma Quadrant. No airplanes have ever disappeared in the Quadrant. Obviously, no ships have ever disappeared there either. What has disappeared there? People for hundreds of years people have gone into the Sonoma and have never returned. Public records in nearby Fordyce indicate seventy-two such disappearances dating back as far as 1874 when records were first kept. Records from the abandoned Mexican village of Sonoma Rojo indicate disappearances dating back to 1644. Indian legends dating back to the Anasazi hint at the mysterious area as a place one does not return from. But one man did emerge. In 1880, a prospector known only as Griswald was allowed to leave. Now, in 2003, Griswald is returning to the Quadrant and taking with him Tom and John Fischer. How could he still be alive? Why, after one hundred and twenty-three years would Griswald return? In this sequel to C.H. Foertmeyers *The Cats Lair* you will once again travel with the Guardians and discover things that may change forever the way in which you view the struggle between the powers of good and evil. You really haven't a clue

Radical Candor is the sweet spot between managers who are obnoxiously aggressive on the one side and ruinously empathetic on the other. It is about providing guidance, which involves a mix of praise as well as criticism, delivered to produce better results and help employees develop their skills and boundaries of success. Great bosses have a strong relationship with their employees, and Kim Scott Malone has identified three simple principles for building better relationships with your employees: make it personal, get stuff done, and understand why it matters. Radical Candor offers a guide to those bewildered or exhausted by management, written for bosses and those who manage bosses. Drawing on years of first-hand experience, and distilled clearly to give actionable lessons to the reader, Radical Candor shows how to be successful while retaining your integrity and humanity. Radical Candor is the perfect handbook for those who are looking to find meaning in their job and create an environment where people both love their work, their colleagues and are motivated to strive to ever greater success.

SILVER WINNER, IBPA BENJAMIN FRANKLIN AWARDS & FINALIST, 2018 FOREWORD INDIES BOOK OF THE YEAR Featured in The New York Times, Bloomberg, and Vox, *The Shopping Revolution* offers a "brilliant analysis of the disruptive effect that Amazon is having on the retail industry and how stores can fight back in order to survive," according to Forbes' Walter Loeb. Amazon disrupts everything it touches and upends any market it enters. In the era of its game-changing dominance, how can any company compete? We are just witnessing the start of the radical changes in retail that will revolutionize shopping in every way. As Amazon and other disruptors continue to offer ever-greater value, customers' expectations will continue to ratchet up, making winning (and keeping) those customers all the more challenging. For some retailers, the changes will push customers permanently out of their reach—and their companies out of business. In *The Shopping Revolution*, Barbara E. Kahn, a foremost retail expert and professor at The Wharton School, examines the companies that have been most successful during this wave of change, and offers fresh insights into what we can learn from their ascendance. Kahn, also the author of *Global Brand Power: Leveraging Branding for Long-Term Growth*, examines: How did Amazon become the retailer of choice for a large portion of the US population, and how can other companies work with them or compete

with them? How did Walmart beat out other grocers in the late 1990s to become the leader in food retailing, and how must they pivot to hold their leadership position today? How did Warby Parker make a dent in the once-untouchable Luxottica's lucrative eyewear business, and what can that tell start-ups about how to unseat a Goliath? How did Sephora draw customers away from once-dominant department stores to become the go-to retailers for beauty products, and what can retailers learn from their success? How are luxury and fast-fashion retailers competing in the ever-changing, fickle world of fashion? Building on these insights, Kahn offers a framework that any company can use to create a competitive strategy to survive and thrive in today's—and tomorrow's—retail environment. "A brisk and thought-provoking anatomy of shopping in the 21st century." —Kirkus Reviews "A must-read for anyone who aspires to reach customers today—and tomorrow." —Marc Lore, CEO, Walmart eCommerce US "A masterful storyteller, Barbara Kahn expertly unpacks the strategies of today's seemingly unbeatable retailers. An indispensable guide for anyone who has a product to sell." —Stuart Weitzman, Founder, Stuart Weitzman LLC

## Rocket Raccoon, Guardian of the Keystone Quadrant

A brief description of a new invented, small, yet accurate astronomical quadrant. Particularly calculated for curious observations at sea, but equally useful at land, etc

Charity is an economic act. This premise underlies a societal transformation—the merging of religious and capitalist impulses that Mona Atia calls "pious neoliberalism." Though the phenomenon spans religious lines, Atia makes the connection between Islam and capitalism to examine the surprising relations between charity and the economy, the state, and religion in the transition from Mubarak-era Egypt. Mapping the landscape of charity and development in Egypt, *Building a House in Heaven* reveals the factors that changed the nature of Egyptian charitable practices—the state's intervention in social care and religion, an Islamic revival, intensified economic pressures on the poor, and the subsequent emergence of the private sector as a critical actor in development. She shows how, when individuals from Egypt's private sector felt it necessary to address poverty, they sought to make Islamic charities work as engines of development, a practice that changed the function of charity from distributing goods to empowering the poor. Drawing on interviews with key players, Atia explores the geography of Islamic charities through multiple neighborhoods, ideologies, sources of funding, projects, and wide social networks. Her work shifts between absorbing ethnographic stories of specific organizations and reflections on the patterns that appear across the sector. An enlightening look at the simultaneous neoliberalization of Islamic charity work and Islamization of neoliberal development, the book also offers an insightful analysis of the political and socioeconomic movements leading up to the uprisings that ended Mubarak's rule and that amplified the importance of not only the Muslim Brotherhood but also the broader forces of Islamic piety and charity.

### Assessment Made Incredibly Easy!

A mother whose child has had a cochlear implant tells Laura Mauldin why enrollment in the sign language program at her daughter's school is plummeting: "The majority of parents want their kids to talk." Some parents, however, feel very differently, because "curing" deafness with cochlear implants is uncertain, difficult, and freighted with judgment about what is normal, acceptable, and right. *Made to Hear* sensitively and thoroughly considers the structure and culture of the systems we have built to make deaf children hear. Based on accounts of and interviews with families who adopt the cochlear implant for their deaf children, this book describes the experiences of mothers as they navigate the health care system, their interactions with the professionals who work with them, and the influence of neuroscience on the process. Though Mauldin explains the politics surrounding the issue, her focus is not on the controversy of whether to have a cochlear implant but on the long-term, multiyear undertaking of implantation. Her study provides a nuanced view of a social context in which science, technology, and medicine are trusted to vanquish disability—and in which mothers are expected to use these tools. *Made to Hear* reveals that implantation has the central goal of controlling the development of the deaf child's brain by boosting synapses for spoken language and inhibiting those for sign language, placing the politics of neuroscience front and center. Examining the consequences of cochlear implant technology for professionals and parents of deaf children, *Made to Hear* shows how certain neuroscientific claims about neuroplasticity, deafness, and language are deployed to encourage compliance with medical technology.
