From Christina Lamb, the coauthor of the bestselling *I Am Malala* and an award-winning journalist—an essential, groundbreaking examination of how women experience war. In *Our Bodies, Their Battlefields*, longtime intrepid war correspondent Christina Lamb makes us witness to the lives of women in wartime. An award-winning war correspondent for twenty-five years (she's never had a female editor) Lamb reports two wars—the “bang-bang” war and the story of how the people behind the lines live and survive. At the same time, since men usually act as the fighters, women are rarely interviewed about their experience of wartime, other than as grieving widows and mothers, though their experience is markedly different from that of the men involved in battle. Lamb chronicles extraordinary tragedy and challenges in the lives of women in wartime. And none is more devastating than the increase of the use of rape as a weapon of war. Visiting warzones including the Congo, Rwanda, Nigeria, Bosnia, and Iraq, and spending time with the Rohingya fleeing Myanmar, she records the harrowing stories of survivors, from Yazidi girls kept as sex slaves by ISIS fighters and the beekeeper risking his life to rescue them; to the thousands of schoolgirls abducted across northern Nigeria by Boko Haram, to the Congolese gynecologist who stitches up more rape victims than anyone on earth. Told as a journey, and structured by country, *Our Bodies, Their Battlefields* gives these women voice. We have made significant progress in international women's rights, but across the

world women are victimized by wartime atrocities that are rarely recorded, much less punished. The first ever prosecution for war rape was in 1997 and there have been remarkably few convictions since, as if rape doesn't matter in the reckoning of war, only killing. Some courageous women in countries around the world are taking things in their own hands, hunting down the war criminals themselves, trying to trap them through Facebook. In this profoundly important book, Christina Lamb shines a light on some of the darkest parts of the human experience—so that we might find a new way forward. *Our Bodies, Their Battlefields* is as inspiring and empowering as it is urgent, a clarion call for necessary change.

Mainstream health science has let you down. Weight loss is not the key to health, diet and exercise are not effective weight-loss strategies and fatness is not a death sentence. You've heard it before: there's a global health crisis, and, unless we make some changes, we're in trouble. That much is true—but the epidemic is NOT obesity. The real crisis lies in the toxic stigma placed on certain bodies and the impact of living with inequality—not the numbers on a scale. In a mad dash to shrink our bodies, many of us get so caught up in searching for the perfect diet, exercise program, or surgical technique that we lose sight of our original goal: improved health and well-being. Popular methods for weight loss don't get us there and lead many people to feel like failures when they can't match unattainable body standards. It's time for a cease-fire in the war against obesity. Dr. Linda Bacon and Dr. Lucy Aphramor's *Body Respect* debunks common myths about weight, including the misconceptions that BMI can accurately measure health, that fatness necessarily leads to disease, and that dieting will improve health. They also help make sense of how poverty and oppression—such as racism, homophobia, and classism—affect life opportunity, self-worth, and even influence metabolism. Body

insecurity is rampant, and it doesn't have to be. It's time to overcome our culture's shame and distress about weight, to get real about inequalities and health, and to show every body respect.

Bill Bryson, bestselling author of *A Short History of Nearly Everything*, takes us on a head-to-toe tour of the marvel that is the human body—with a new afterword for the Vintage paperback. Bill Bryson once again proves himself to be an incomparable companion as he guides us through the human body—how it functions, its remarkable ability to heal itself, and (unfortunately) the ways it can fail. Full of extraordinary facts (your body made a million red blood cells since you started reading this) and irresistible Brysonesque anecdotes, *The Body* will lead you to a deeper understanding of the miracle that is life in general and you in particular. As Bill Bryson writes, “We pass our existence within this wobble of flesh and yet take it almost entirely for granted.” *The Body* will cure that indifference with generous doses of wondrous, compulsively readable facts and information. As addictive as it is comprehensive, this is Bryson at his very best, a must-read owner's manual for every body. ## Health at Every Size

An exploration, both personal and deeply reported, of how we learn to eat in today's toxic food culture. Food is supposed to sustain and nourish us. Eating well, any doctor will tell you, is the best way to take care of yourself. Feeding well, any human will tell you, is the most important job a mother has. But for too many of us, food now

feels dangerous. We parse every bite we eat as good or bad, and judge our own worth accordingly. When her newborn daughter stopped eating after a medical crisis, Virginia Sole-Smith spent two years teaching her how to feel safe around food again — and in the process, realized just how many of us are struggling to do the same thing. The Eating Instinct visits kitchen tables around America to tell Sole-Smith's own story, as well as the stories of women recovering from weight loss surgery, of people who eat only nine foods, of families with unlimited grocery budgets and those on food stamps. Every struggle is unique. But Sole-Smith shows how they're also all products of our modern food culture. And they're all asking the same questions: How did I learn to eat this way? Why is it so hard to feel good about food? And how can I make it better?

In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this

fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

"An indispensable resource for women of all ages, this is a guide to help us better connect to ourselves, to value ourselves, to love ourselves, and ultimately, to be ourselves." —Chelsea Clinton

Positive body image isn't believing your body looks good; it is knowing your body is good, regardless of how it looks. How do you feel about your body? Have you ever stayed home from a social activity or other opportunity because of concern about how you looked? Have you ever passed judgment on someone because of how they looked or dressed? Have you ever had difficulty concentrating on a task because you were self-conscious about your appearance? Our beauty-obsessed world perpetuates the idea that happiness, health, and ability to be loved are dependent on how we look, but authors Lindsay and Lexie Kite offer an alternative vision. With insights drawn from their extensive body image research, Lindsay and Lexie—PhDs and founders of the nonprofit Beauty Redefined (and also twin sisters!)—lay out an action plan that arms you with the skills you need to reconnect with your whole self and free yourself from the constraints of self-objectification. From

media consumption to health and fitness to self-reflection and self-compassion, Lindsay and Lexie share powerful and practical advice that goes beyond “body positivity” to help readers develop body image resilience—all while cutting through the empty promises sold by media, advertisers, and the beauty and weight-loss industries. In the process, they show how facing your feelings of body shame or embarrassment can become a catalyst for personal growth.

If you think that intelligence emanates from the mind and that reasoning necessitates the suppression of emotion, you’d better think again—or rather not “think” at all. In his provocative new book, Guy Claxton draws on the latest findings in neuroscience and psychology to reveal how our bodies—long dismissed as mere conveyances—actually constitute the core of our intelligent life. From the endocrinal means by which our organs communicate to the instantaneous decision-making prompted by external phenomena, our bodies are able to perform intelligent computations that we either overlook or wrongly attribute to our brains. Embodied intelligence is one of the most exciting areas in contemporary philosophy and neuropsychology, and Claxton shows how the privilege given to cerebral thinking has taken a toll on modern society, resulting in too much screen time, the diminishment of skilled craftsmanship, and an overvaluing of white-collar over blue-collar labor. Discussing techniques that will help us

A fresh argument for rioting and looting as our most powerful tools for dismantling white supremacy. Looting--a crowd of people publicly, openly, and directly seizing goods--is one of the more extreme actions that can take place in the midst of social unrest. Even self-identified radicals distance themselves from looters, fearing that violent tactics reflect badly on the broader movement. But Vicky Osterweil argues that stealing goods and destroying property are direct, pragmatic strategies of wealth redistribution and improving life for the working class--not to mention the brazen messages these methods send to the police and the state. All our beliefs about the innate righteousness of property and ownership, Osterweil explains, are built on the history of anti-Black, anti-Indigenous oppression. From slave revolts to labor strikes to the modern-day movements for climate change, Black lives, and police abolition, Osterweil makes a convincing case for rioting and looting as weapons that bludgeon the status quo while uplifting the poor and marginalized. *In Defense of Looting* is a history of violent protest sparking social change, a compelling reframing of revolutionary activism, and a practical vision for a dramatically restructured society.

Drs. Lindsay and Lexie Kite know firsthand how hard filtering out media influence is when it comes to self-image. Both struggled as young women to overcome the expectations of body size and shape, but were able to learn to love, appreciate, and reclaim their own bodies, eventually earning their PhDs in body image resilience. The twin sisters founded the nonprofit Beauty Redefined and have made it their mission to help other women see themselves without societal expectations distorting their self-perception. *More than a Body* is a self-help book focused on going beyond body positivity, showing how a mindset focused on appearance sets women up for insecurities and self-judgement. In this book, they offer an action plan for readers to combat that mindset, and instead learn how the body can be "an instrument, not an ornament," with practical, actionable steps to take when consuming media, exercising, practicing self-reflection and self-compassion, and finding a purpose in life.

“Belonging has been a formative struggle for me. Like most people with marginalized identities, my experience as a trans person has taught me that it’s hard to be yourself and feel like you belong in a culture that is hostile to your existence. That’s why my body of work as a scientist, author, professor, speaker, and advocate for body liberation always comes back to the impact of belonging or not belonging. *Radical Belonging* is my manifesto, helping us heal from the individual and collective trauma of injustice and support our transition from a culture of othering to one of belonging.”

—Lindo Bacon Too many of us feel alienated from our bodies. This isn’t your personal failing; it means that our culture is failing you.

“mythical norm” (white, male, cisgender, able-bodied, slender, Christian, etc.)—which is to say, most of us—are demanding our basic right: To know that who we are matters. To belong. Being “othered” and the body shame it spurs is not “just” a feeling. Being erased and devalued impacts our ability to regulate our emotions, our relationships with others, our health and longevity, our finances, our ability to realize dreams, and whether we will be accepted, loved, or even safe. Radical Belonging is not a simple self-love treatise. Focusing only on self-love ignores the important fact that we have negative experiences because our culture has targeted certain bodies and people for abuse or alienation. For marginalized people, a focus on self-love can be a spoonful of sugar that makes the oppression go down. This groundbreaking book goes further, helping us to manage the challenges that stem from oppression and moving beyond self-love and into belonging. With Lindo Bacon’s signature blend of science and storytelling, Radical Belonging addresses the political, sociological, psychological and biological underpinnings of your experiences, helping you understand that the alienation and pain you are experiencing is not personal, but human. The problem is in injustice, not you as an individual. So many of us feel wounded by a culture that has alienated us from our bodies and divided us from each other. Radical Belonging provides strategies to reckon with the trauma of injustice; reclaim yourself, body and soul; and rewire your nervous system to better cope within an unjust world. It also provides strategies to help us all provide refuge for one another and create a culture of equity and empathy, one that respects, includes, and benefits from all its diverse peoples. Whether you are transgender, queer, Black, Indigenous or a Person of Color, disabled, old, or fat—or your more closely resemble the “mythical norm”—Radical Belonging is your guidebook for creating a world where all bodies are valued and all of us belong—and for coping with this one, until we make that new world a reality.

## **Every Day**

The authors in this book ask us to consider whether the perception of beauty has been defined by our genetics and culture over the years - has it grown and changed? Do certain neural connections define our emotional reactions to beauty? Does beauty follow any rules or laws? Can the aspiration toward beauty be detrimental? Can we divorce ourselves from dictates and sink into a mindful connection with our internal beauty? Can we move from the superficial where "beauty is only skin deep" to an intense appreciation of beauty in all of its variations. The Perception of Beauty will lead to a deeper understanding and contemplation of nature, art, and the world around us.

### **Perception of Beauty**

This presentation describes various aspects of the regulation of tissue oxygenation, including the roles of the circulatory system, respiratory system, and blood, the carrier of oxygen within these components of the cardiorespiratory system. The respiratory system takes oxygen from the atmosphere and transports it by diffusion from the air in the alveoli to the blood flowing through the pulmonary capillaries. The cardiovascular system then moves the oxygenated blood from the heart to the microcirculation of the various organs by convection, where oxygen is released from hemoglobin in the red blood cells and moves to the parenchymal cells of each tissue by diffusion. Oxygen that has diffused into cells is then utilized in the mitochondria to produce adenosine triphosphate (ATP), the energy currency of all cells. The mitochondria are able to produce ATP until the oxygen tension or  $PO_2$  on the cell surface falls to a critical level of about 4–5 mm Hg. Thus, in order to meet the energetic needs of cells, it is important to maintain a continuous supply of oxygen to the mitochondria at or above the critical  $PO_2$ . In order to accomplish this desired outcome, the cardiorespiratory system, including the blood, must be capable of regulation to ensure survival of all tissues under a wide range of circumstances. The purpose of this presentation is to provide basic information about the operation and regulation of the cardiovascular and respiratory systems, as well as the properties of the blood and parenchymal cells, so that a fundamental understanding of the regulation of tissue oxygenation is achieved.

## **More Than a Body**

LOS ANGELES TIMES BESTSELLER The problem is not overpolicing, it is policing itself. Why we need to defund the police and how we get there. Recent weeks have seen an explosion of protest against police brutality and repression. Among activists, journalists and politicians, the conversation about how to respond and improve policing has focused on accountability, diversity, training, and community relations. Unfortunately, these reforms will not produce results, either alone or in combination. The core of the problem must be addressed: the nature of modern policing itself. This book attempts to spark public discussion by revealing the tainted origins of modern policing as a tool of social control. It shows how the expansion of police authority is inconsistent with community empowerment, social justice— even public safety. Drawing on groundbreaking research from across the world, and covering virtually every area in the increasingly broad range of police work, Alex Vitale demonstrates how law enforcement has come to exacerbate the very problems it is supposed to solve. In contrast, there are places where the robust implementation of policing alternatives—such as legalization, restorative justice, and harm reduction—has led to a decrease in crime, spending, and injustice. The best solution to bad policing may be an end to policing.

traditional psychotherapy. But with more than 100,000 practitioners and dozens of methods available in the United States alone, how can consumers choose the right one for themselves? Mirka Knaster's richly informative guide provides an overview of the principles and theories underlying the major Eastern and Western body therapies, or "bodyways." It shows readers how to befriend their own bodies, getting back in touch with their internal sources of health and wisdom. It also describes more than 75 individual approaches, answering such questions as: How does each therapy work? What can we expect from one session or a series? What are the reasons for selecting this method? How do we find a qualified practitioner? What, if any, are the "consumer-bewares"?
