Complete National Parks of the United States

Created for map lovers by map lovers, this rich book explores the intriguing stories behind maps across history and illuminates how the art of cartography thrives today. In this visually stunning book, award-winning journalists Betsy Mason and Greg Miller--authors of the National Geographic cartography blog "All Over the Map"--explore the intriguing stories behind maps from a wide variety of cultures, civilizations, and time periods. Based on interviews with scores of leading cartographers, curators, historians, and scholars, this is a remarkable selection of fascinating and unusual maps. This diverse compendium includes ancient maps of dragon-filled seas, elaborate graphics picturing unseen concepts and forces from inside Earth to outer space, devious maps created by spies, and maps from pop culture such as the schematics to the Death Star and a map of Westeros from Game of Thrones. If your brain craves maps--and Mason and Miller would say it does, whether you know it or not--this eye-opening visual feast will inspire and delight.

National Geographic Secrets of the National Parks, 2nd Edition

"In this remarkable journey, Mark Woods captures the essence of our National Parks: their serenity and majesty, complexity and vitality--and their power to heal." --Ken Burns Many childhood summers, Mark Woods piled into a station wagon with his parents and two sisters and headed to America's national parks. Mark's most vivid childhood memories are set against a backdrop of mountains, woods, and fireflies in places like Redwood, Yosemite, and Grand Canyon national parks. On the eve of turning fifty and a little burned-out, Mark decided to reconnect with the great outdoors. He'd spend a year visiting the national parks. He planned to take his mother to a park she'd not yet visited and to re-create his childhood trips with his wife and their iPad-generation daughter. But then the unthinkable happened: his mother was diagnosed with cancer, given just months to live. Mark had initially intended to write a book about the future of the national parks, but *Lassoing the Sun* grew into something more: a book about family, the parks, the legacies we inherit and the ones we leave behind.

Hitler's Monsters

“A dense and scholarly book about . . . the relationship between the Nazi party and the occult . . . reveals stranger-than-fiction truths on every page.”—Daily Telegraph The Nazi fascination with the occult is legendary, yet today it is often dismissed as Himmler’s personal obsession or wildly overstated for its novelty. Preposterous though it was, however, supernatural thinking was inextricable from the Nazi project. The regime enlisted astrology and the paranormal, paganism, Indo-Aryan mythology, witchcraft, miracle weapons, and the lost kingdom of Atlantis in reimagining German politics and society and recasting German science and religion. In this eye-opening history, Eric Kurlander reveals how the Third Reich’s relationship to the supernatural was far from straightforward. Even as popular occultism and superstition were intermittently rooted out, suppressed, and outlawed, the Nazis drew upon a wide variety of occult practices and esoteric sciences to gain power, shape propaganda and policy, and pursue their dreams of racial utopia and empire. “[Kurlander] shows how swiftly irrational ideas can take hold, even in an age before social media.”—The Washington Post “Deeply researched, convincingly authenticated, this extraordinary study of the magical and supernatural at the highest levels of Nazi Germany will astonish.”—The Spectator “A trustworthy [book] on an extraordinary subject.”—The Times “A fascinating look at a little-understood aspect of fascism.”—Kirkus Reviews “Kurlander provides a careful, clear-headed, and exhaustive examination of a subject so lurid that it has probably scared away some of the serious research it merits.”—National Review
