“A thoughtfully observed travel memoir and history as richly detailed as it is deeply felt” (Kirkus Reviews) of South America, from Butch Cassidy to Che Guevara to cocaine king Pablo Escobar to Charles Darwin, all set in the Andes Mountains. The Andes Mountains are the world’s longest mountain chain, linking most of the countries in South America. Kim MacQuarrie takes us on a historical journey through this unique region, bringing fresh insight and contemporary connections to such fabled characters as

Charles Darwin, Che Guevara, Pablo Escobar, Butch Cassidy, Thor Heyerdahl, and others. He describes living on the floating islands of Lake Titicaca. He introduces us to a Patagonian woman who is the last living speaker of her language. We meet the woman who cared for the wounded Che Guevara just before he died, the police officer who captured cocaine king Pablo Escobar, the dancer who hid Shining Path guerrilla Abimael Guzman, and a man whose grandfather witnessed the death of Butch Cassidy.

Collectively these stories tell us something about the spirit of South America. What makes South America different from other continents—and what makes the cultures of the Andes different from other cultures found there? How did the capitalism introduced by the Spaniards change South America? Why did Shining Path leader Guzman nearly succeed in his revolutionary quest while Che Guevara in Bolivia was a complete failure in his? “MacQuarrie writes smartly and engagingly and with...enthusiasm about the variety of South America’s life and landscape” (The New York Times Book Review) in *Life and Death in the Andes*. Based on the author’s own deeply observed travels, “this is a well-written, immersive work that history aficionados, particularly those with an affinity for Latin America, will relish” (Library Journal).

America's Ocean Wilderness

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals—especially those that are endangered. His powerful message, conveyed with humor, compassion, and art— to know these animals is to save them. Sartore

intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

100 Great Archaeological Discoveries

Describing all of Colombia's birds, Steven Hilty and William Brown bring together information on one of the world's largest avifaunas-nearly 1,700 species. Over half of all the species of birds in South America are included, thus making the book useful in regions adjacent to Colombia, as well as in the country itself. The primary purpose of the work is to enable observers to identify the birds of the region, but it also provides detailed species accounts and will serve as an important handbook and reference volume. Fifty-six lavish color plates, thirteen halftone plates, and ninety-nine line drawings in the text illustrate over 85% of the species, including most of the resident birds. Notes on the facing-page of each plate, and range maps of 1,475 species, facilitate identification. Written with the field observer in mind, the text gives special attention to comparisons of similar species, transcriptions of voices, and comments on behavior, status, and habitat. It also provides ranges, breeding data, and references. Notes outline taxonomic problems and briefly describe species that eventually may be found in Colombia. Introductory chapters and photographs highlight Colombia's geography, climate, and vegetation, and discuss migration

and conservation questions, and the history of Colombian ornithology. Appendices contain a large bibliography, a section on birding locations, and coverage of two of Colombia's far-flung island territories, Isla San Andrés and Providencia. Maps depicting vegetation zones, political boundaries, national parks, and the most text localities are included.

Turn Right at Machu Picchu

2nd edition. Photography by Vance Jacobs.

National Geographic Traveler - Madrid

THE NEW YORK TIMES BESTSELLER! What happens when an unadventurous adventure writer tries to re-create the original expedition to Machu Picchu? In 1911, Hiram Bingham III climbed into the Andes Mountains of Peru and “discovered” Machu Picchu. While history has recast Bingham as a villain who stole both priceless artifacts and credit for finding the great archeological site, Mark Adams set out to retrace the explorer’s perilous path in search of the truth—except he’d written about adventure far more than he’d actually lived it. In fact, he’d never even slept in a tent. *Turn Right at Machu Picchu* is Adams’ fascinating and funny account of his journey through some of the world’s most majestic, historic, and remote landscapes guided only by a hard-as-nails Australian survivalist and one nagging question: Just what was Machu Picchu?

Bibliographic Guide to Latin American Studies 2003 V3

NAMED A NEW YORK TIMES NOTABLE BOOK OF 2017#1 New York Times and #1 Wall Street Journal bestseller! A five-hundred-year-old legend. An ancient curse. A stunning medical mystery. And a pioneering journey into the unknown heart of the world's densest jungle. Since the days of conquistador Hernán Cortés, rumors have circulated about a lost city of immense wealth hidden somewhere in the Honduran interior, called the White City or the Lost City of the Monkey God. Indigenous tribes speak of ancestors who fled there to escape the Spanish invaders, and they warn that anyone who enters this sacred city will fall ill and die. In 1940, swashbuckling journalist Theodore Morde returned from the rainforest with hundreds of artifacts and an electrifying story of having found the Lost City of the Monkey God-but then committed suicide without revealing its location. Three

quarters of a century later, bestselling author Doug Preston joined a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety, single-engine plane carrying the machine that would change everything: lidar, a highly advanced, classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains, that flight revealed the unmistakable image of a sprawling metropolis, tantalizing evidence of not just an undiscovered city but an enigmatic, lost civilization. Venturing into this raw, treacherous, but breathtakingly beautiful wilderness to confirm the discovery, Preston and the team battled torrential rains, quickmud, disease-carrying insects, jaguars, and deadly snakes. But it wasn't until they returned that tragedy struck: Preston and others found they had contracted in the ruins a horrifying, sometimes lethal-and incurable-disease. Suspenseful and shocking, filled with colorful history, hair-raising adventure, and dramatic twists of fortune, **THE LOST CITY OF THE MONKEY GOD** is the absolutely true, eyewitness account of one of the great discoveries of the twenty-first century.
