The Nursing Assistant

Workbook for body systems based textbook to train nursing assistants to work in long-term care

Who Will Care For Us?

Textbook of Nursing Foundations

The Nursing Assistant: Essentials of Holistic Care teaches the knowledge and skills you need to become a nursing assistant. With a sharp focus on holistic care, this text will guide you in performing the procedures required of nursing assistants while integrating and considering patients' and residents' bodies, minds, and spirits. Through rich and visual, step-by-step procedures, you will learn the techniques necessary to work in a variety of healthcare settings, including long-term and acute care. Holistic care is at the center of this book's approach to nursing assisting. This innovative approach is illustrated in the Providing Holistic Care Framework, which embodies the meaning of holistic care and communicates the importance of meeting the needs of the whole

person--body, mind, and spirit. Comprehensive procedures outline techniques for properly executing the responsibilities of a nursing assistant. With easy-to-follow instructions, professional photographs, and detailed illustrations, these procedures provide important information for the certification competency examination. Practice test questions, similar to those found on the certification competency examination, can be completed at the end of each chapter. These questions are accompanied by numerous reinforcement, critical thinking, and application activities and provide an opportunity to prepare for the certification competency examination. Practice questions are also available in the Study Guide and instructors presentations for PowerPoint. Each chapter is divided into sections, making it easy to review content in manageable chunks for maximum understanding. Review questions at the end of each section help reinforce the material to solidify your learning. Professional videos demonstrating procedures are available on EduHub. After viewing these videos, you will be better able to visualize the procedural steps you must master for the certification competency examination.

Foundations and Adult Health Nursing

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

The Complete Guide to Successful Nursing Assistant Care

Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

Health care is a team effort, so why keep training for solo sprints? Introducing Foundations of Interprofessional Collaborative Practice in Health Care - a unique new textbook that will equip you to become an effective member of interprofessional healthcare teams. This completely new textbook is the first on the market to introduce the Interprofessional Education Collaborative (IPEC, 2011, 2016) Core Competencies for Interprofessional Collaborative Practice and to provide practice in applying these competencies to everyday practice. Expertly written by an interprofessional team for a wide variety of health professions students, this textbook provides a solid foundation in the four Core Competencies: Values and Ethics for Interprofessional Practice, Roles and Responsibilities, Interprofessional Communication, and Teams and Teamwork. It then elaborates each Core Competency by defining and describing each Sub-Competency. With a variety of interactive Case Studies, Caselets, and Exemplar Case Studies, it then illustrates the contributions and interconnectedness of each provider's role to demonstrate how Core Competencies would be applied and put into action for improved patient outcomes. UNIQUE! Three-part units each addressing one of the four IPEC Core Competencies to help you to understand the core competencies and learn how to apply them in your own profession. UNIQUE! Detailed explorations of each Sub-Competency for all four IPEC Core Competencies thoroughly present the essential elements of each Core Competency for deep understanding of how to collaborate with other professions. UNIQUE! Case Studies, "Caselets," and Exemplar Case Studies illustrate each competency and provide opportunities for you to apply your understanding of the material. A variety of Active Learning activities driven by core content are integrated into each chapter. UNIQUE! Global Perspectives boxes and additional international resources highlight the important work being done internationally in interprofessional education and interprofessional collaborative practice. Research Highlights help you to understand the reasoning and knowledge behind the Core Competencies. Learning Outcomes and Key Points outline and review the main takeaways from each chapter.

Workbook and Competency Evaluation Review for Mosby's Textbook for Nursing Assistants - E-Book

The number of elderly and disabled adults who require assistance with day-to-day activities is expected to double over the next twenty-five years. As a result, direct care workers such as home care aides and certified nursing assistants (CNAs) will become essential to many more families. Yet these workers tend to be low-paid, poorly trained, and receive little respect. Is such a workforce capable of addressing the needs of our aging population? In Who Will

Care for Us? economist Paul Osterman assesses the challenges facing the long-term care industry. He presents an innovative policy agenda that reconceives direct care workers' work roles and would improve both the quality of their jobs and the quality of elder care. Using national surveys, administrative data, and nearly 120 original interviews with workers, employers, advocates, and policymakers, Osterman finds that direct care workers are marginalized and often invisible in the health care system. While doctors and families alike agree that good home care aides and CNAs are crucial to the well-being of their patients, the workers report poverty-level wages, erratic schedules, exclusion from care teams, and frequent incidences of physical injury on the job. Direct care workers are also highly constrained by policies that specify what they are allowed to do on the job, and in some states are even prevented from simple tasks such as administering eye drops. Osterman concludes that broadening the scope of care workers' duties will simultaneously boost the quality of care for patients and lead to better jobs and higher wages. He proposes integrating home care aides and CNAs into larger medical teams and training them as "health coaches" who educate patients on concerns such as managing chronic conditions and transitioning out of hospitals. Osterman shows that restructuring direct care workers' jobs, and providing the appropriate training, could lower health spending in the long term by reducing unnecessary emergency room and hospital visits, limiting the use of nursing homes, and lowering the rate of turnover among care workers. As the Baby Boom generation ages, *Who Will Care for Us?* demonstrates the importance of restructuring the long-term care industry and establishing a new relationship between direct care workers, patients, and the medical system.

Common Foundation Studies in Nursing

Social and behavioral science has for decades studied and recognized leadership as a social exchange between leaders and followers. But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial settings and in nonprofit organizations.
