If you skipper a sailboat, you know the inherent dangers of docking and maneuvering in a tight marina with high winds and current. Just one ding can cost hundreds of dollars and worse than that, major embarrassment. The experts at NauticEd offer a painless solution with this concise series of practice exercises using real maneuvering techniques --with clear explanations on how you can always be in full control of your boat in the marina. Once you master these exercises, you will confidently maneuver your sailboat in any marina in the world under whatever conditions are thrown at you. Grab this book, grab a friend, some (non-alcoholic) libations, and a sandwich and get out on the water for a fun enjoyable day of maneuvering practice. Here is what one of NauticEd's students had to say: "I've sailed for the last thirty-plus years and have a fifty-ton master's credential. I'm constantly learning something new or forgotten from NauticEd." Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes and sports enthusiasts, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

HANDLING STORMS AT SEA

Indian and Pacific Oceans

In a book that is sure to become a classic, internationally respected boatbuilder, yacht manager, and delivery skipper Bill Seifert shares his hard-won solutions to a host of boat design, construction, and equipment issues and seamanship dilemmas. Unlike other books on the subject, *Offshore Sailing* doesn't just tell readers what to do for safe and comfortable passage making; it shows them how to do it with clear, step-by-step instructions and nearly 200 detailed drawings and photographs.

Maneuver and Dock Your Sailboat Under Power

The first guide to design aimed at every sailor, *Yacht Design Explained* uses state-of-the-art graphics, dynamic charts and photographs, and clear explanations to show what makes hulls, keels, ballast, rudders, foils, masts, and sails work. It reveals why certain designs perform well and others fail. The authors examine a range of boats, from a 14-foot dinghy to a 40-foot cruiser, from a catamaran to an offshore singlehander. They break through the often confusing physics of yacht design to provide an understanding that sailors can use to get the most out of their time afloat.

Competent Crew

Carefully designed and crafted, here is a book worthy of its subject--the boat owner's ultimate idea book, destined to become a treasured resource. A useful coffee table book, as beautiful as it is inspirational. Over 500 full-color photographs.

Voyaging on a Small Income

The story of a young couple with no prior sailing experience who set out to circle the world. Four years later they return as circumnavigators. An inspiring look at what it takes to achieve the dream of sailing around the world, and proof that it can be done.

Offshore Sailing: 200 Essential Passagemaking Tips

This is the reassuring voice of the ocean sailing community. Your big adventure starts here. For many sailors, an ocean passage is the big dream. But many will worry that they don't have the right experience, that their boat isn't strong enough, or that it will be prohibitively expensive and difficult. Ocean Sailing will prepare you for an ocean passage by painting a picture of what ocean sailing is really like, through the experiences of others who have gone before. Topics covered range from safety to boat kit and preparations, budgeting to staying in touch with home, equipment breakdowns to health and weather. Members of three great cruising clubs –

the Royal Cruising Club, Ocean Cruising Club, and the Cruising Club of America – share their vast wealth of experience, and by focusing on the practicalities of ocean sailing, allay the anxieties and doubts of prospective ocean cruisers to ensure a deeply satisfying ocean voyage.

The Cruising Guide to Central and Southern California: Golden Gate to Ensenada, Mexico, Including the Offshore Islands

From a National Book Critics Circle Award winner, a brilliantly conceived and illuminating reconsideration of a key period in the life of Ernest Hemingway that will forever change the way he is perceived and understood. Focusing on the years 1934 to 1961—from Hemingway’s pinnacle as the reigning monarch of American letters until his suicide—Paul Hendrickson traces the writer’s exultations and despair around the one constant in his life during this time: his beloved boat, Pilar. We follow him from Key West to Paris, to New York, Africa, Cuba, and finally Idaho, as he wrestles with his best angels and worst demons. Whenever he could, he returned to his beloved fishing cruiser, to exult in the sea, to fight the biggest fish he could find, to drink, to entertain celebrities and friends and seduce women, to be with his children. But as he began to succumb to the diseases of fame, we see that Pilar was also where he cursed his critics, saw marriages and friendships dissolve, and tried, in vain, to escape his increasingly diminished capacities. Generally thought of as a great writer and an unappealing human being, Hemingway emerges here in a far more benevolent light. Drawing on previously unpublished

material, including interviews with Hemingway's sons, Hendrickson shows that for all the writer's boorishness, depression, and alcoholism, and despite his choleric anger, he was capable of remarkable generosity—to struggling writers, to lost souls, to the dying son of a friend. We see most poignantly his relationship with his youngest son, Gigi, a doctor who lived his adult life mostly as a cross-dresser, and died squalidly and alone in a Miami women's jail. He was the son Hemingway forsook the least, yet the one who disappointed him the most, as Gigi acted out for nearly his whole life so many of the tortured, ambiguous tensions his father felt. Hendrickson's bold and beautiful book strikingly makes the case that both men were braver than we know, struggling all their lives against the complicated, powerful emotions swirling around them. As Hendrickson writes, "Amid so much ruin, still the beauty." Hemingway's *Boat* is both stunningly original and deeply gripping, an invaluable contribution to our understanding of this great American writer, published fifty years after his death.

Learn how to handle a cruising sailboat in as little as seven days—even if you've never sailed before! Who says you have to be an experienced daysailor before you can think about cruising? Steve and Doris Colgate know that most of us don't have that kind of time. At the

Offshore Sailing School, the Colgates have helped more than 100,000 adults—three-quarters of whom started as beginning sailors or complete newcomers--take the helm of a midsize cruising sailboat. Now Fast Track to Cruising offers these proven instructional methods to all aspiring sailors with big dreams and little time. This is the very first guide that teaches sailing and cruising together, taking you from your first sail to independent cruising in one leap. You can make that leap in as little as seven days—as in the Colgates' "Fast Track to Cruising" course—or you can get there at a more leisurely pace. Either way, no other book will take you from your first tacking or docking maneuver to a mastery of navigation and diesel engines as efficiently as this one. "America's most experienced sailing instructors present a thorough and easy to understand look at cruising. Leisure time is precious. Safety is paramount. The Colgates will help you maximize your time on the water."--Gary Jobson, ESPN's lead sailing analyst and editor at large for Cruising World and Sailing World "Doris and Steve Colgate understand that people want to reach their sailing goals as quickly as possible and they've built the excellent Fast Track program to accomplish it."--Bernadette Bernon, former editorial director of Cruising World magazine "Together Steve and Doris Colgate have been teaching beginners to sail for over half a century. In Fast Track to Cruising they have included every concept and procedure you need to get yourself from a want-to-be sailor to one who is knowledgeable and competent to take the helm--with confidence and a smile."--Charles Mason, Executive Editor, SAIL magazine

Now in its second edition, completely revised and updated, Spurr's Boatbook remains the best single source for understanding and improving your boat. You need not live with a dark or dank cabin, insufficient space for stowage or chartwork, or sheet winches, halyards, and reefing arrangements so inconvenient that you often find yourself motoring when you'd rather be sailing. Somewhere beneath your boat's crazed gelcoat, untamed rig, patchwork electrical system, and stubborn steering lies the boat of your dreams. This book will enable you to envision that boat in detail--how its deck hardware is laid out, what the rig looks like, where its hull and decks are reinforced, and how its cabin arrangements are altered to fit your needs. And the book will help you translate that vision into reality by showing you what work should be done and in what order, which projects you can do yourself and which you should probably hire out, and how much time or money might be involved. Along the way, Dan Spurr gives step-by-step instructions, supported by Bruce Bingham's beautifully clear drawings, for many useful projects any do-it-yourselfer can tackle, including autopilot installation, deck hardware modifications, and electrical system upgrades. The gear, equipment, design, and construction standards cited in this book--often in very specific detail with brand-name recommendations--are as useful for evaluating a new boat as they are for buying a used boat or improving the boat you already own.

Voyaging Under Power, 4th Edition

A good general cruising guide covering the routes from Europe to Australia and points in between. The 'Indian Ocean Cruising Guide' covers all the usual points of interest for cruising

yachtsmen, from history to climate, weather patterns, formalities, route planning and so on. The general sections are followed by a country-by-country round-up in which key ports are described in detail with the aid of harbour plans and photographs. This second edition (2007) has been thoroughly revised and contains a lot of additional information on Malaysia and Thailand, the Seychelles and the Chagos archipelago. The introduction has been expanded and throughout there are new plans and photographs. This guide is an ideal companion to Rod Heikell and Andy O'Grady's 'Ocean Passages and Landfalls' which discusses routes across the Indian Ocean.

The Capable Cruiser

In May 1946 John Caldwell set out to sail from Panama to Sydney to reunite with his wife who he hadn't seen for more than a year. Eager to reach his destination and unable to secure any other form of transport, he had to resort to singlehanded seamanship. After an ignominious scene in the harbor, where a tangled anchor led him to take an early dip, he spent ten days learning the rudiments of navigation and sailing from a book, before embarking on the 9,000 mile journey aboard the 20-foot Pagan. Ahead lay a mission that was to reveal in him elements not only of astounding courage and determination, but also of incredible foolhardiness. Within 500 miles of Panama John Caldwell had already been shipwrecked once and had his boat's engine and cockpit destroyed by an angry shark. Indefatigable, he decided to press on towards his goal. He endured the terrors and discomforts of life on the high seas and enjoyed the triumphs of fighting and winning against the elements. This is more than an exciting tale of sea-

adventure. It is as compelling and unpredictable as a thriller. It is the story, witty and moving, of a man, motivated initially by love, and ultimately by his own fierce determination to survive.

A new classic from one of the world's most respected sailing authors More than 35 years ago, Hal Roth quit his job as a journalist and went sailing. Since then, he's logged more than 200,000 sea miles. Along the way, Roth also has authored eight voyaging classics, including the 1978 bestseller *After 50,000 Miles*. Taking that book as its starting point, this handsome new volume incorporates the new technologies and discoveries of the last quarter century along with another 150,000 miles of experience. A compendium of mature, time-tested sea wisdom from one of the world's most respected sailing writers, *How to Sail Around the World* will tell the reader: How to choose and equip a sailboat for long-distance cruising, with an emphasis on simplicity and a modest budget How to plan and conduct a voyage anywhere in the world How to master the arts of navigation, anchoring, and daily life aboard in exotic places How to cope with storms at sea--the most complete and authoritative treatise on this critical topic ever published

Blue Water

John Kretschmer is sailing's practical philosopher – as much a doer as a thinker. And that is

the overarching theme of this chronicle of a sailing life. Often amusing, sometimes poignant, occasionally terrifying but always inspiring, his deeply personal account is a welcome reminder of the good life waiting at sea. With hundreds of thousands of nautical miles under his keel, John's adventures have taken him several times around the world, with challenging crossings of the Atlantic and the Pacific, a narrow escape from a coup in Yemen, an unlikely deliverance from a coral reef off Belize as well as more serene, introspective passages where trade winds are blowing and stories are flowing. His crew has included CEOs, actors, writers, teachers, kids – in essence, everyone. John's narrative is interwoven with practical tips and advice in seamanship, but also, and just as importantly, his hard-won insights about making the most of our lives. He truly believes we find out who we really are, and what we are capable of, far from the shackles of land, when we find a place where time changes shape – days may merge into one another, but minutes are memorable. To live adventurously is to live more fully, and that is the life John Kretschmer continues to live. In this book he shares his simple profundities that will inspire those who live to sail, and those seeking something more rewarding from life.

Spurr's Guide to Upgrading Your Cruising Sailboat

The Capable Cruiser is a logical extension of the Pardeys' *The Self-Sufficient Sailor* (978-0964603677), with more emphasis on seamanship underway, including careful analysis of extreme anchoring situations and solutions for mitigating them. Underlying each and every chapter is the warmth and encouragement that spurred Herb McCormick, former editor of *Cruising World* magazine, to label Lin and Larry Pardey the enablers. This revised and expanded third edition of a cruising classic includes 10 completely new chapters with such advice as: 16 ways to encourage your lover (partner) to share your dream; strategies for turning sudden engine failure into a minor incident; choosing safety equipment and repairing rigging at sea. All of the original chapters have been updated to ensure that the information will be helpful for everyone who dreams of cruising—whether now or in the near future.

Ready for Sea!

Here's the book that can get you sailing in an afternoon and keep you sailing better through a lifetime on the water This is the first sailing book that follows a sailor's ideal learning curve. Rather than tell you all about sail trim or anchoring in a single chapter, Robby Robinson tells you what you need to know when you want to know it. From the absolute basics to the most advanced techniques, the International Marine Book of Sailing is highly accessible--and informative--at every level. More than 500 pages and 1,000 color photos and illustrations. Covers everything from high-performance and Olympic-class sailing dinghies to coastal and offshore cruising sailboats. No matter your age or the kind of sailing you'd most like to do, this book will work for you. The easy-flowing instructional text is augmented by sidebar features giving alternative approaches, definitions of terms, and boat-to-boat variations--a uniquely effective how-to combination. Includes contributions from Nigel Calder (Boatowner's Mechanical and Electrical Manual), Beth Leonard (The Voyager's Handbook), Robert Perry (Yacht Design According to Perry), Bob Sweet (The Weekend Navigator), Charlie Wing (How

Boat Things Work), and other top sailing writers. Renders sailing and seamanship more transparent and accessible than ever before. The ideal book for self-teaching.

Cruising World

The definitive guide to a critical, hotly debated topic How should a sailor cope with storms at sea? Some advocate heaving-to, others running off. Some say trail a sea anchor over the bow, others a drogue astern. The stakes in the discussion couldn't be higher, or the consensus lower. Finally, preeminent sailor/author Hal Roth offers a practical strategy that can evolve and respond as storms grow stronger.

Sailing to the Edge of Time

"I know you'll want to read more after you finish *Sailing a Serious Ocean*. And be warned, you'll very likely want to sail with John, perhaps across an ocean." -- DALLAS MURPHY, AUTHOR OF *ROUNDING THE HORN* After sailing 300,000 miles and weathering dozens of storms in all the world's oceans, John Kretschmer has plenty of stories and advice to share. John's offshore training passages sell out a year in advance and his entertaining presentations are popular at boat shows and yacht clubs all over the English speaking world. John's talent for storytelling enchants his audience as it soaks up the lessons he learned during his oftenchallenging voyages. Now you can take a seat next to John--at a lesser cost--and get the knowledge you

need to fulfill your own dream of blue-water adventure. In *Sailing a Serious Ocean*, John tells you what to expect when sailing the oceans and shows how to sail safely across them. His tales of storm encounters and other examples of extreme seamanship will help you prepare for your journey and give you confidence to handle any situation—even heavy weather. Through his personal stories, John will guide you through the whole process of choosing the right boat, outfitting with the right gear, planning your route, navigating the ocean, and understanding the nuances of life at sea. Our oceans are beautiful yet unpredictable—water that is at one moment a natural mirror for the glowing sun can turn into a foamy, raging wall of fury. John knows our oceans, and he is one of the best teachers of taming and enjoying them. Before you set off across the big blue, turn to John for his inspirational stories and hard-learned advice and discover the serious sailor in you.

The passagemaking bible updated to help you live your long-distance voyaging dreams First published in 1975, Robert Beebe's *Voyaging Under Power* revolutionized long-distance cruising, encouraging powerboaters to enjoy what was once exclusive to sailboats and their crews: crossing oceans to exotic, interesting, and beautiful places in comfort with a minimum of problems and expense. Now power-cruising couple Denis and Mary Umstot, whose interest in power voyaging was ignited by Beebe's work, have updated *Voyaging Under Power* for the twenty-first century. The much anticipated *Voyaging Under Power, Fourth Edition*, includes Beebe's original wisdom and philosophy of passagemaking, as well as his groundbreaking thoughts on vessel stability and fuel monitoring. Fourteen new chapters provide insights into a range of additional topics vital for ocean passages and passagemakers, including:

- Seaworthiness, stability, and other design concepts
- Options for stabilizing passagemakers including paravanes, active and passive fins, and antiroll tanks
- Selecting and understanding the critical systems for long-distance voyaging
- A decision process for choosing a new boat or analyzing the suitability of a used boat
- An examination of passagemaking models from Nordhavn, Kadey-Krogen, Seahorse, and Dashew, as well as the designs of Stephen Seaton, Michael Kasten, George Buehler, Dave Gerr, and others
- Highlights of successful and proven passagemakers of the past, including examples from eleven builders and designers
- First-hand accounts from passagemakers around the globe, including the Mediterranean, Black Sea, South America, South Pacific, Madagascar, and beyond
- Tips on understanding and predicting weather and waves and what to do in a storm
- Understanding offshore safety issues, including how to avoid trouble and cross oceans in comfort
- Choosing and training crew as well as communication tips for a better cruising experience
- Preparing for and resolving maintenance

problems at sea and in distant anchorages "The list of contributors shows the quality of experience in the pages of this fourth edition. Anyone wanting to join, or at least understand the elements of, the long-distance passagemaking lifestyle will find a great deal of knowledge that is realistic, useful, and timely. You'll keep *Voyaging Under Power* on your pilothouse bookshelf (or its electronic equivalent) for years to come." -- Bill Parlatore, Founder of PassageMaker Magazine "Captain Beebe applied Navy experience, technical creativity, and an open mind to his self-appointed task of inventing the long-range power cruiser. He embraced ideas that others discarded as readily as he rejected solutions others found indispensable. His path, like all innovators, was the uncommon one and his selfless sharing in *Voyaging Under Power* literally launched a thousand ships. This Fourth Edition of Beebe's classic draws on new ideas and the accumulated wisdom of today's yacht designers and experienced ocean voyagers to further Beebe's cause and liberate thousands more from the tyranny of dry land." -- Michael Jones, Ocean Traveler, Ship Design Collaborator, and Proud Parent of Google Earth
