Patho Phlash!

How is the task of giving a presentation accomplished? In this insightful book Johanna Rendle-Short unpacks this seemingly simple task to show the complexity that underlies it. Examining the academic presentation as a case in point, she details how seminar presenters interact with the audience and objects around them to produce a coherent whole. Through detailed examination of talk-in-interaction the book throws light on one instance of talk as situated practice, demonstrating both the ordinariness of the academic presentation, and its intricate complexity. While audience members recognize that a

seminar is underway, this book shows how this recognition comes about. The Academic Presentation will greatly interest scholars of talk and interaction analysis, situated talk, ethnomethodology and conversation analysis.

An evocative and thought-provoking collection of poetry that reveals more with each reading. Clara Joseph covers a wide range of themes and ideas whilst tying them all together under the recurring image of the face, seen from many different angles and in different guises. She seamlessly transitions between personal poems of change, transition, or personal philosophising to more public issues of justice and injustices, violation and destruction, all whilst bringing it back to the singular notion of the self and the perception of the self within the world.

In 1894, Borchgrevink shipped on board the whaler Antarctic on its way to the Ross Sea, as a deckhand and part-time scientist. He took part in the historic landing at Cape Adare, and collected the first vegetation to be found within the Antarctic Circle. He traveled to London and under the financial sponsorship of Sir George Newnes, the wealthy publisher, sailed in 1898 as commander of the "Southern Cross" expedition. Before it was over, Borchgrevink laid claim to a number of firsts: the first time dogs were used on the Antarctic continent, a furthest south record, the first sledge journey on the Ross Ice Shelf. Perhaps today he would be best remembered as having discovered the northward movement of the Ross Ice Shelf and the emperor penguin rookery at Cape Crozier.

Pharmacology can be difficult. But with the right text, understanding drugs and how they work doesn't have to be! Using easy-to-follow language and engaging learning tools - like Memory Joggers, Clinical Pitfalls, Do Not Confuse, and Drug Alerts - the second edition of *Understanding Pharmacology: Essentials for Medication Safety* helps readers really understand how drugs work. In addition to the popular critical thinking activities from the first edition, the second edition also includes more chapter review questions, updated content, and a new organization that centers on the different body systems. For students who have a limited background in the sciences and want complete preparation for licensure exams and clinical practice, there is no better choice than *Understanding Pharmacology, 2nd Edition!* Entire unit reviewing math, weights and measures, and dosage calculation minimizes readers' anxiety and promotes medication safety. Clever, easy-to-recognize margin icons help visual learners remember essential side effects of drugs. Simplified heading structure replaces intimidating terminology (i.e. pharmacokinetics) with simplified language (*How These Drugs Work*) to increase understanding of concepts. Drug Alert!, Do-Not-Confuse, and Clinical Pitfall boxes highlight important tips for safe medication administration. Memory Jogger boxes help readers remember important drug information. Get Ready for Practice sections at the end of each chapter include key points, chapter review questions, and critical thinking activities to reinforce learning. 10th grade reading level uses straightforward, everyday language to really enhance readers' understanding of pharmacology concepts. Incorporation of adult learning theory features both a simple to complex organization of material along with answers to why readers need to learn something. NEW! Body system organization helps readers better understand drugs that are specific to particular body systems. NEW! More chapter review questions have been added to the text. All review questions are now organized into one of two categories: Test Yourself on the Basics and Test Yourself on Advanced Concepts.

Pharmacology education in nursing has become increasingly important as nurses' roles in administering, prescribing and educating patients about their medications have grown. Nurses are the last barrier between any particular drug and patient. This is why it is so important to be knowledgeable when it comes to drug uses, doses, side effects, and contraindications. In addition to the obvious benefit of protecting our patients and fulfilling our oath to do no harm, it benefits all nurses to know and be well versed in the drugs they are administering in order to protect themselves and their nursing licenses.
