Steven Magee received a biologically toxic electromagnetic radiation exposure in 2009. This led to the realization that he had been displaying the symptoms of low level radiation sickness for many years. This book documents his journey into the radiation sickness condition of Electromagnetic Hypersensitivity and the many steps that he took to cure it.

surrounded by electromagnetic fields. As the Digital Age rushes forward, we need to be aware of the increased exposure we are enduring every day and the sneaky consequences this exposure can cause to us and all living organisms. In this full-color pocket guide to using crystals for EMF protection, Barbara Newerla explains what electromagnetic pollution is, including the potential effects of 5G technology, and how nature and humans alike are affected on different levels. Describing the symptoms of electromagnetic stress and how we can help reduce it, she explains what crystals can do to protect us, what they can't do, and how to use them safely, debunking many misunderstandings in this area. She explores in depth the use of 5 essential anti-electromagnetic pollution crystals: tektite, smoky quartz, clear quartz, rose quartz, and black tourmaline, while also providing a directory of 35 healing crystals that can help support our bodies and minds when we're experiencing electromagnetic stress. This small yet practical guide is the perfect first step to combatting the unique stresses of our technologically complex world.

magic of electric light, heat, and power; in the process, though, he inadvertently opened a Pandora's Box of unimaginable illness and death. *Dirty Electricity* tells the story of Dr. Samuel Milham, the scientist who first alerted the world about the frightening link between occupational exposure to electromagnetic fields and human disease. Milham takes readers through his early years and education, following the twisting path that led to his discovery that most of the twentieth century diseases of civilization, including cancer, cardiovascular disease, diabetes, and suicide, are caused by electromagnetic field exposure. In the second edition, he explains how electrical exposure does its damage, and how electricity is causing our current epidemics of asthma, diabetes and obesity. Dr. Milham warns that because of the recent proliferation of radio frequency radiation from cell phones and towers, terrestrial antennas, Wi-Fi and Wi-max systems, broadband internet over power lines, and personal electronic equipment, we may be facing a looming epidemic of morbidity and mortality. In *Dirty Electricity*, he reveals the steps we must take, personally and as a society, to coexist with this marvelous but dangerous technology.

Nuclear engineering could be viewed as the engineering field that ensures optimum and sustainable technological applications of natural and induced radioactive materials in different industrial sectors. This book presents some advanced applications in radiation effects, thermal hydraulics, and radionuclide migration in the environment. These scientific contributions from esteemed experts introduce some nuclear safety principals, current knowledge about radiation types, sources and applications, thermal properties of heat transfer media, and the role of sorption in retarding radionuclide migration in the environment. This book also covers the advances in identifying radiation effects in dense gas-metal systems, application of dense granular materials as high power targets in accelerator driven systems and irradiation facilities, evaluation of boiling heat transfer in narrow channels, and application of fluorescence quenching techniques to monitor uranium migration.

An Eye-Opening Guide for Anyone Who's Plugged In Are we going to give up our cell phones, laptops, and other electronics? Absolutely not. But emerging scientific evidence reveals that the very innovations that have changed our lives are also exposing us to an unprecedented number of electromagnetic fields—and that it's crucial we make important changes to our home and work environments. Now, Ann Louise Gittleman has created the first step-by-step manual for fortifying your body, detoxifying your home, and protecting yourself and your family from electronic pollution (and her powerful fixes are easier than you might think!). Zapped is an empowering guide to living safely with the gadgets we can't live without.

The definitive guide on the contribution of electromagnetic fields to cancer formation. Review the science (over 60 academic references) and learn how test for EMFs, the best meters to buy, and strategies to shield, mitigate, or avoid harmful exposure. “Brandon LaGreca has done an extraordinary job of articulating the science underlying the EMF health effects issue, the different types of EMFs that are ubiquitous in our world, and the many steps that we can take to begin cleaning up our electromagnetic environment.” –Charles Keen, EMF Services, LLC

Bonus afterword content: Find out what questions to ask when hiring an EMF inspector, which providers to avoid, and how to select the best meter for testing a home or office yourself. Cancer and EMF Radiation details the science showing DNA damage from nonionizing EMFs, mechanisms of action leading to cancer formation from EMF exposure, and practical strategies to protect you and your family. Four corroborating lines of evidence suggest EMFs are a far more significant risk factor for the development of a number of cancers than previously thought: 1. Experimental research showing DNA damage from EMF exposure 2. Long-term epidemiological studies on cancer development from EMF exposure 3. Mechanistic research on the effects of EMFs on melatonin and calcium channels 4. Research from the U.S.

Level 7 is the diary of Officer X-127, who is assigned to stand guard at the "Push Buttons," a machine devised to activate the atomic destruction of the enemy, in the country's deepest bomb shelter. Four thousand feet underground, Level 7 has been built to withstand the most devastating attack and to be self-sufficient for five hundred years. Selected according to a psychological profile that assures their willingness to destroy all life on Earth, those who are sent down may never return. Originally published in 1959, and with over 400,000 copies sold, this powerful dystopian novel remains a horrific vision of where the nuclear arms race may lead, and is an affirmation of human life and love. Level 7 merits comparison to Huxley's A Brave New World and Orwell's 1984 and should be considered a must-read by all science fiction fans.

All EMF*d Up (*Electromagnetic Fields): My Journey Through Wireless Radiation Poisoning Plus How You Can Protect Yourself

A NEW YORK TIMES NOTABLE BOOK OF 2020 New York Times bestselling author Lesley M.M. Blume reveals how one courageous American reporter uncovered one of the deadliest cover-ups of the 20th century—the true effects of the atom bomb—potentially saving millions of lives. Just days after the United States decimated Hiroshima and Nagasaki with nuclear bombs, the Japanese surrendered unconditionally. But even before the surrender, the US government and military had begun a secret propaganda and information suppression campaign to hide the devastating nature of these experimental weapons. The cover-up intensified as Occupation forces closed the atomic cities to Allied reporters, preventing leaks about the horrific long-term effects of radiation which would kill thousands during the months after the blast. For nearly a year the cover-up worked—until New Yorker journalist John Hersey got into Hiroshima and managed to report the truth to the world. As Hersey and his editors prepared his article for publication, they kept the story secret—even from most of their New Yorker colleagues. When the magazine published “Hiroshima” in August

1946, it became an instant global sensation, and inspired pervasive horror about the hellish new threat that America had unleashed. Since 1945, no nuclear weapons have ever been deployed in war partly because Hersey alerted the world to their true, devastating impact. This knowledge has remained among the greatest deterrents to using them since the end of World War II. Released on the 75th anniversary of the Hiroshima bombing, *Fallout* is an engrossing detective story, as well as an important piece of hidden history that shows how one heroic scoop saved—and can still save—the world.

Battlefield Earth

This book is the seventh in a series of titles from the National Research Council that addresses the effects of exposure to low dose LET (Linear Energy Transfer) ionizing radiation and human health. Updating information previously presented in the 1990 publication, *Health Effects of Exposure to Low Levels of Ionizing Radiation: BEIR V*, this book draws upon new data in both epidemiologic and

experimental research. Ionizing radiation arises from both natural and man-made sources and at very high doses can produce damaging effects in human tissue that can be evident within days after exposure. However, it is the low-dose exposures that are the focus of this book. So-called "late" effects, such as cancer, are produced many years after the initial exposure. This book is among the first of its kind to include detailed risk estimates for cancer incidence in addition to cancer mortality. BEIR VII offers a full review of the available biological, biophysical, and epidemiological literature since the last BEIR report on the subject and develops the most up-to-date and comprehensive risk estimates for cancer and other health effects from exposure to low-level ionizing radiation.

PEMF - The Fifth Element of Health

One of Bloomberg's Best Books of the Year The master geopolitical forecaster and New York Times bestselling author of *The Next 100 Years* focuses on the United States, predicting how the 2020s will bring dramatic upheaval and reshaping of American government, foreign policy, economics, and culture. In his riveting new book, noted forecaster and bestselling author George Friedman turns to the future of the United States. Examining the clear cycles through which the

United States has developed, upheaved, matured, and solidified, Friedman breaks down the coming years and decades in thrilling detail. American history must be viewed in cycles--particularly, an eighty-year "institutional cycle" that has defined us (there are three such examples--the Revolutionary War/founding, the Civil War, and World War II), and a fifty-year "socio-economic cycle" that has seen the formation of the industrial classes, baby boomers, and the middle classes. These two major cycles are both converging on the late 2020s--a time in which many of these foundations will change. The United States will have to endure upheaval and possible conflict, but also, ultimately, increased strength, stability, and power in the world. Friedman's analysis is detailed and fascinating, and covers issues such as the size and scope of the federal government, the future of marriage and the social contract, shifts in corporate structures, and new cultural trends that will react to longer life expectancies. This new book is both provocative and entertaining.

In 1961, reacting to U.S. government plans to survey, design, and build fallout shelters, the president of the American Institute of Architects, Philip Will, told the organization's members that "all practicing architects should prepare themselves to render this vital service to the nation and to their clients." In an era of nuclear weapons, he argued, architectural expertise could "preserve us from decimation." In *Fallout Shelter*, David Monteyne traces the partnership that developed between architects and civil defense authorities during the 1950s and 1960s. Officials in the federal government tasked with protecting American citizens and communities in the event of a nuclear attack relied on architects and urban planners to demonstrate the importance and efficacy of both purpose-built and ad hoc fallout shelters. For architects who participated in this federal effort, their involvement in the national security apparatus granted them

expert status in the Cold War. Neither the civil defense bureaucracy nor the architectural profession was monolithic, however, and Monteyne shows that architecture for civil defense was a contested and often inconsistent project, reflecting specific assumptions about race, gender, class, and power. Despite official rhetoric, civil defense planning in the United States was, ultimately, a failure due to a lack of federal funding, contradictions and ambiguities in fallout shelter design, and growing resistance to its political and cultural implications. Yet the partnership between architecture and civil defense, Monteyne argues, helped guide professional design practice and influenced the perception and use of urban and suburban spaces. One result was a much-maligned bunker architecture, which was not so much a particular style as a philosophy of building and urbanism that shifted focus from nuclear annihilation to urban unrest.

latest medical discoveries and most authoritative research, Blaylock reveals why essential natural compounds—vitamins, minerals, and phytochemicals—can halt the spread of cancer. With the right combination of diet and nutrition, patients can develop their built-in immune mechanisms to stop the growth of cancer cells and protect their bodies from the debilitating, sometimes lethal effects of chemotherapy. In this new edition, you'll discover:

- *The remarkable role plant extracts play in killing and controlling cancer cells, reducing the side effects of treatment, and relieving treatment-related depression, anxiety, and stress
- *The vitamins, fruits, and over-the-counter special plant extracts that protect the heart and brain against toxic effects of chemotherapy
- *The powerful mushroom extract that stimulates anti-cancer immune cells selectively
- *Which commonly used cooking oils can battle cancer and those that stimulate cancer growth and spread
- *The truth about glutamine/glutamate and cancer
- *Natural compounds that protect cells, tissues, and organs from radiation damage and improve energy

Plus: Why cancer becomes resistant to some therapies • How a ketogenic diet starves cancer cells • How to protect the heart against cardiac toxicity • How Vitamin C promotes the beneficial effects of chemotherapy • How to transform cancer stem cells back into regular stem cells • How flavonoids protect healthy cells • Cancer's link to diabetes, hypertension, and heart disease . .

radium-dial factories. The glittering chemical covers their bodies from head to toe; they light up the night like industrious fireflies. With such a coveted job, these "shining girls" are the luckiest alive – until they begin to fall mysteriously ill. And, until they begin to come forward. As the women start to speak out on the corruption, the factories that once offered golden opportunities ignore all claims of the gruesome side effects. And as the fatal poison of the radium takes hold, the brave shining girls find themselves embroiled in one of the biggest scandals of America's early 20th century, and in a groundbreaking battle for workers' rights that will echo for centuries to come. A timely story of corporate greed and the brave figures that stood up to fight for their lives, these women and their voices will shine for years to come. Written with a sparkling voice and breakneck pace, *The Radium Girls* fully illuminates the inspiring young women exposed to the "wonder" substance of radium, and their awe-inspiring strength in the face of almost impossible circumstances. Their courage and tenacity led to life-changing regulations, research into nuclear bombing, and ultimately saved hundreds of thousands of lives

Learn easy, step-by-step solutions for managing EMF exposure and creating a healthy environment for you and your family! When it comes to managing our health, most of us think of regular exercise, healthy eating, limiting the toxins in our water and food supply. What we haven't been trained to consider is our exposure to invisible electromagnetic fields (EMFs) created by the myriad of electronic devices that surround us every day. There is a growing body of evidence that EMF fields create numerous downstream health effects. It was this discovery, along with her own personal EMF sensitivity and experience working with clients around the world, that led Risa Suzuki to write her book, *What the EMF? How to Protect Your Home from EMF Exposure, Improve Sleep, Reduce Anxiety, and Live a Happier, Healthier Life!* Risa uses her training and experience as a certified Building Biology Environmental Consultant to test and clear EMFs and toxins to create healthier homes and workspaces. In addition to sharing foundational knowledge of the different types of fields to consider, Risa provides you with an easy, step-by-step framework to guide you through all aspects of clearing EMFs in your home. Don't worry, you don't need to have extensive technical knowledge, Risa shares all of her secrets, practical tips and instructions for each room of the

home, showing you how to best manage your EMF exposure—that only her private clients have been privy to until now! This behind-the-scenes view shows you how to avoid the mistakes and EMF "gotchas" most people make, and how to understand EMFs in a way that makes sense. No matter where you are on your EMF journey, this is the perfect resource to have—helping answer any questions that come up along the way. In this book you'll discover: What EMFs are, how they affect your health and the different types of fields found in your home and where they typically fall off. How to identify and avoid the most common mistakes made by DIYers. How to manage EMF exposure outside of the home. Methods for recognizing and managing the early stages of EMF symptoms and sensitivities. Nutritional and holistic practices that help combat the downstream effects of EMFs. Room-by-room checklists for managing EMF exposure and creating a safe space for you and your family. and much more! EMFs represent a legitimate concern in our technology-infused world. However, by making thoughtful and simple adjustments to our environment, such concerns can be mitigated. Join Risa as she takes the confusion and frustration out of navigating EMFs and walks you through the same simple and straightforward approach she uses with her clients. Ready to begin your journey? The Effects of Nuclear War

A field-tested guide to surviving a nuclear attack, written by a revered civil defense expert. This edition of Cresson H. Kearny's iconic Nuclear War Survival Skills (originally published in 1979), updated by Kearny himself in 1987 and again in 2001, offers expert advice for ensuring your family's safety should the worst come to pass. Chock-full of practical instructions and preventative measures, Nuclear War Survival Skills is based on years of meticulous scientific research conducted by Oak Ridge National Laboratory. Featuring a new introduction by ex-Navy SEAL Don Mann, this book also includes: instructions for six different fallout shelters, myths and facts about the dangers of nuclear weapons, tips for maintaining an adequate food and water supply, a foreword by "the father of the hydrogen bomb," physicist Dr. Edward Teller, and an "About the Author" note by Eugene P. Wigner, physicist and Nobel Laureate. Written at a time when global tensions were at their peak, Nuclear War Survival Skills remains relevant in the dangerous age in which we now live.

Vulnerabilities abound in U.S. society. The openness and efficiency of our key infrastructures — transportation, information and telecommunications systems, health systems, the electric power grid, emergency response units, food and water supplies, and others — make them susceptible to terrorist attacks. Making the Nation Safer discusses technical approaches to mitigating these vulnerabilities. A broad range of topics are covered in this book, including: Nuclear and radiological threats, such as improvised nuclear devices and "dirty bombs;" Bioterrorism, medical research, agricultural systems and public health; Toxic chemicals and explosive materials; Information technology, such as communications systems, data management, cyber attacks, and identification and authentication systems; Energy systems, such as the electrical power grid and oil and natural gas systems; Transportation systems; Cities and fixed infrastructures, such as buildings, emergency operations centers, and tunnels; The response of people to terrorism, such as how quality of life and morale of the population can be a target of terrorists and how people respond to terrorist attacks; and Linked infrastructures, i.e. the vulnerabilities that result from the interdependencies of key systems; In each of these areas, there are recommendations on how to immediately apply existing knowledge and technology to make the nation safer and on starting research and development programs that could

produce innovations that will strengthen key systems and protect us against future threats. The book also discusses issues affecting the government's ability to carry out the necessary science and engineering programs and the important role of industry, universities, and states, counties, and cities in homeland security efforts. A long term commitment to homeland security is necessary to make the nation safer, and this book lays out a roadmap of how science and engineering can assist in countering terrorism.

You probably know that food, water, sunlight, and oxygen are required for life, but there is a fifth element of health that is equally vital and often overlooked: The Earth's magnetic field and its corresponding PEMFs (pulsed electromagnetic fields). The two main components of Earth's PEMFs, the Schumann and Geomagnetic frequencies, are so essential that NASA and the Russian space program equip their spacecrafts with devices that replicate these frequencies. These frequencies are absolutely necessary for the human body's circadian rhythms, energy production, and even keeping the body free from pain. The Radium Girls

Electromagnetic fields and radiation are everywhere - near power lines, computers, radio and television signals, microwave ovens, toasters, alarm clocks and everyday electrical appliances. The media are warning of the possible hazards of EMFs and EMR and recent studies suggest that they cause leukaemia in children and breast and brain cancer in adults. This book gives facts about the dangers, revealing that most of us are exposed to radiation and electromagnetic fields everyday. It advises which levels to worry about, and how to minimize the risks. It is also a sourcebook for citizens seeking action from utility companies, employers, manufacturers and governmental agencies.

emerging and future threats of Artificial Intelligence with Big Tech, including technology that can be used for assassination or to control humanities ability to have free formed thoughts without AI Bio-Digital Social Programming. The book will cover Cyborgs, Super Intelligence and how it can form, and in what ways it can travel undetected through The AI Global Network as it connects with the internet and the Human Bio-Digital Network. This book takes you in a simple way to understand what is Artificial Intelligence, and step by step, it takes the average reader through a process to understand very difficult concepts in a simplistic way. Every human being has the same brain, and same capacity to access abilities to think deep, and have insights that can better our world, in a safe way. The AI Organization hopes, the common person understands the coming age of AI, Robotics and 5G, and the dangers it poses as well as the positives. We also hope, scientists and big tech take one step back and think to innovate AI, in a more responsible fashion using an algorithm that takes every possible angle into consideration, to safeguard life. We will discuss what type of risk management and the components of this algorithm in the book, as well as the cultural aspects of AI. This AI book is meant to safeguard humanities interest, and we hope it receives acceptance from all people, may you be liberal, conservative, religious, atheist, the government, media or just a scientist doing what you cherish.

IN THE NEWS Podcast – Building the H Bomb: A Personal History Hosted by Milt Rosenberg (1590 WCGO), 25 June 2015 Building the H-Bomb: The Big Idea APS News, June 2015 (Volume 24, Number 6) Behind the Making of a Super Bomb The Washington Post, 22 May 2015 Hydrogen Bomb Physicist's Book Runs Afoul of Energy Department The New York Times, 23 March 2015 More In this engaging scientific memoir, Kenneth Ford recounts the time when, in his mid-twenties, he was a member of the team that designed and built the first hydrogen bomb. He worked with – and relaxed with – scientific giants of that time such as Edward Teller, Enrico Fermi, Stan Ulam, John von Neumann, and John Wheeler, and here offers illuminating insights into the personalities, the strengths, and the quirks of these men. Well known for his ability to explain physics to nonspecialists, Ford also brings to life the physics of fission and fusion and provides a brief history of nuclear science from the discovery of radioactivity in 1896 to the ten-megaton explosion of “Mike” that obliterated a Pacific Island in 1952. Ford worked at both Los Alamos and Princeton's Project Matterhorn, and brings out Matterhorn's major, but previously unheralded contribution to the development of the H bomb. Outside the lab, he drove a battered Chevrolet around New Mexico, a bantam motorcycle across the country,

and a British roadster around New Jersey. Part of the charm of Ford's book is the way in which he leavens his well-researched descriptions of the scientific work with brief tales of his life away from weapons. It is these personal recollections and descriptions; the fact that it is a personal and first-hand account of a unique time in history and a remarkable scientific and technical achievement that made this book so enthralling. This is an engaging account of a young scientist involved in a remarkable project." P

Andrew Karam The Ohio State University "Ford's book is a valuable resource for anyone interested in the history of the H bomb and its role in the Cold War, and in how that work affected the life and career of an individual involved." Physics Today "Personal memories are the book's greatest strength. Ford doesn't glorify, or apologize for, his work on the H-bomb. He simply tells it as it was. As a result, this is an engagingly human glimpse into the world of physics in the US in the early 1950s." Physics World

finding is explored in this volume about the children of atomic bomb survivors in Hiroshima and Nagasaki--the population that can provide the greatest insight into this critical issue. Assembled here for the first time are papers representing more than 40 years of research. These documents reveal key results related to radiation's effects on pregnancy termination, sex ratio, congenital defects, and early mortality of children. Edited by two of the principal architects of the studies, J. V. Neel and W. J. Schull, the volume also offers an important comparison with studies of the genetic effects of radiation on mice. The wealth of technical details will be immediately useful to geneticists and other specialists. Policymakers will be interested in the overall conclusions and discussion of future studies.

Cancer and EMF Radiation

The many manifestations of migraine can vary dramatically from one patient to another, even within the same patient at different times. Among the most compelling and perplexing of these symptoms are the strange visual hallucinations and distortions of space, time, and body image which migraineurs sometimes experience. Portrayals of these uncanny states have found their way into many works of art, from the heavenly visions of Hildegard von Bingen to Alice in Wonderland. Dr.

Creating the next YouTube blockbuster is easier than you think! Includes more than 100 QR Codes linking to successful viral videos! "These guys are the viral experts, and they show you the way in clear, concise language. This is the first recipe for virality that I buy." -- KENT NICHOLS, cocreator of viral phenomenon AskANinja.com One Saturday morning in 2006, Stephen Voltz and Fritz Grobe dropped 500 Mentos mints into 100 bottles of Coke in front of a video camera. Their video went viral in a matter of hours, and before they knew it, David Letterman, Conan O'Brien, and NPR were calling. Since then, more than 100 million people have watched The Extreme Diet Coke & Mentos Experiments. Why? Because Voltz and Grobe did everything right. Now, in The Viral Video Manifesto, they explain how you can make a video guaranteed to pack a major punch by applying four core principles: Be True . . . Don't fake it. Make it real. Don't Waste My Time . . . Get down to business right away. Be Unforgettable . . . Show us something we've never seen before. It's All About Humanity . . . An emotional

Children's health has clearly improved over the past several decades. Significant and positive gains have been made in lowering rates of infant mortality and morbidity from infectious diseases and accidental causes, improved access to health care, and reduction in the effects of environmental contaminants such as lead. Yet major questions still remain about how to assess the status of children's health, what factors should be monitored, and the appropriate measurement tools that should be used. Children's Health, the Nation's Wealth: Assessing and Improving Child Health provides a detailed examination of the information about children's health that is needed to help policy makers and program providers at the federal, state, and local levels. In order to improve children's health -- and, thus, the health of future generations -- it is critical to have data that can be used to assess both current conditions and possible future threats to children's health. This compelling book describes what is known about the health of children and what is needed to expand the knowledge. By strategically improving the health of children, we ensure healthier future generations to come.

EVERYONE KNOWS MOBILE PHONES ARE SAFE. IF THEY WEREN'T, WE'D ALREADY KNOW ABOUT IT, RIGHT? That is perhaps the greatest disconnect of our age. As research scientists are now demonstrating, mobile-phone radiation can damage the human body's cells - leading to memory loss, and increased risk of cancer, reduced sperm counts, and neurological diseases such as Alzheimer's and possibly even autism. Mobile phones, it seems, are not as safe as we had supposed. In this riveting expose, Dr Devra Davis, respected epidemiologist and founding director of the toxicology and environmental studies board at the United States National Academy of Sciences, clearly outlines the dangers posed by mobile-phone radiation - particularly to children, whose growing brains are especially vulnerable. Drawing on interviews with key players within the trillion-dollar mobile-phone industry and presenting a range of recent and long-suppressed research, Dr Davis makes a compelling case for changing the way we make and use mobile phones. For the close to five billion mobile-phone users worldwide, this truly is essential reading. 'A critically important book that is a must-read for parents and policy makers. A surprising, well-documented, and compelling call for action.' - Phil Lee, MD, former United States assistant secretary of health 'An amazing and important

The Medical Implications of Nuclear War

An Invisible Danger on the Rise You eat organic and non-GMO food. You only drink purified water. You take care of yourself and your family's health. But could there be a silent, invisible danger causing potential harm to you and your loved ones? There could. And it's called electromagnetic frequency (EMF) radiation and it's one of fastest growing health issues facing our society. EMF radiation produced by modern technology such as cell phones, tablets, laptops, Wi-Fi, and smart meters is an emerging health threat, and we are all guinea pigs in a giant experiment with many unknown consequences. But Aren't These Technologies Regulated and Safe? Surely the government and other regulatory agencies make sure these technologies are completely safe before they are approved for wide-spread use, right? Think again. Ninety-five percent of American adults use cell phones

regularly. Most households have Wi-Fi. And even schools are increasingly becoming dependent on wireless devices. And yet none of these technologies have been proven safe to humans for long-term exposure. In fact, science confirms that the EMF emitted from common electronic devices can cause definite biological changes in the body, and mounting research has already shown it can lead to a long list of health concerns - some of which can be pretty serious. The explosive use of mobile devices only occurred over the last twenty years, yet we have only scratched the surface of what technology is yet to come. Children born today will be exposed to much higher doses of EMF radiation than those born just ten years ago. What are the ramifications and what can we do now to minimize the fallout? Is There a Solution? Fortunately, there are simple and effective steps you can take to minimize the risks of dirty electricity. Education is key. With a foreword by Bulletproof's Dave Asprey, Radiation Nation is info-packed with all the essential education you need to make smart choices to stay safe when it comes to technology. In Radiation Nation, you will learn: » The most practical precautions to protect yourself and your loved ones from EMF radiation » What EMF radiation is and how it affects the body biologically » The major health risks including fertility issues for both men and women, DNA damage, cell mutation, cancer and other serious health risks » The EMF sources of greatest

the truth. Cell phones, WiFi systems, electrical SMART meters, cell towers, and microwave relay transmission stations are all having a cumulative affect on the our health. Dr. Plourde has pulled together the studies that prove the cells of the body act as antennas and are impacted by the constant bombardment of radio frequencies. Consumers have embraced these technologies worldwide, as there are now 7 billion wireless devices in operation. The more sensitive are already feeling the effects and eventually everyone will be impacted. How many are developing headaches, migraines, and skin rashes that doctors are unable to determine the cause? Health issues will become more and more common for people as radiation has a cumulative effect.
