The Literary World

American Desert (The Western Garden)

This composite book contains three wonderful pieces of work by famous writers - Black Beauty by Anna Sewell, Smoky the Cowhorse by Will James and The Pacing Mustang by Ernest Thompson Seton. Love to animals, to horses in particular, unites these stories. The first book became a world bestseller. It was purchased by more than 50 million readers. In Smoky the Cowhorse an old cowboy tells about hard life of a real cowboy horse in the wide expanse of the prairie. In The Pacing Mustang, the wild black Pacing Mustang couldn't be caught by any cowboy. Only a greedy cook was able to cunningly entrap the fast horse. In the end, even the cook was left behind by the horse's tremendous speed.

Garden Life

The passion and urgency that inspired WWI and WWII Victory Gardens is needed today to meet another threat to our food supply and our environment—the steep decline of pollinators. The Pollinator Victory Garden offers practical solutions for winning the war against the demise of these essential animals. Pollinators are critical to our food supply and responsible for the pollination of the vast majority of all flowering plants on our planet. Pollinators include not just bees, but many different types of animals, including insects and mammals. Beetles, bats, birds, butterflies, moths, flies, and wasps can be pollinators. But, many pollinators are in trouble, and the reality is that most of our landscapes have little to offer them. Our residential and commercial landscapes are filled with vast green

Read PDF Smoky Garden Speak

pollinator deserts, better known as lawns. These monotonous green expanses are ecological wastelands for bees and other pollinators. With The Pollinator Victory Garden, you can give pollinators a fighting chance. Learn how to transition your landscape into a pollinator haven by creating a habitat that includes pollinator nutrition, larval host plants for butterflies and moths, and areas for egg laying, nesting, sheltering, overwintering, resting, and warming. Find a wealth of information to support pollinators while improving the environment around you:

- The importance of pollinators and the specific threats to their survival
- How to provide food for pollinators using native perennials, trees, and shrubs that bloom in succession
- Detailed profiles of the major pollinator types and how to attract and support each one
- Tips for creating and growing a Pollinator Victory Garden, including site assessment, planning, and planting goals
- Project ideas like pollinator islands, enriched landscape edges, revamped foundation plantings, meadowscapes, and other pollinator-friendly lawn alternatives

The time is right for a new gardening movement. Every yard, community garden, rooftop, porch, patio, commercial, and municipal landscape can help to win the war against pollinator decline with The Pollinator Victory Garden.
