It's a book for sailors who want the satisfaction and hard-cash savings of stepping their own masts, inspecting and maintaining their own rigs, and turning their own tailspllices and wire eyespllices. It is for boatowners who want to replace an entire gang of rigging themselves--measuring, choosing appropriate wire, turning soft eyes, leathering, and serving. It is for bluewater voyagers who want to feel secure in the knowledge that, should a shroud carry away far at sea, they will be able to repair it. The Complete Rigger's Apprentice is also a free-roaming collection of useful ideas and tips on everything from supplementing winches with block and tackle, to rigging snubbers at anchor, to using pantyhose for an emergency fanbelt. In short, it's the definitive book on the art of rigging, written by its most entertaining practitioner.

The time when every vessel going to sea made use of 3-strand rope has gone. Splicing that type of rope and cord is relatively straightforward. Nowadays the most common type of rope used on board yachts, dinghies, motorboats, working boats and ferries is braided rope. Few people have the knowledge to splice it, or even where to start. Splicing Modern Ropes is the first guide to this essential skill. It explains why splices are better – and stronger – than knots or shackles for joining or shortening rope, and how to go about it. With this skill, yachtsmen can customise their ropes, optimise their deck layout, taper their sheets for ease of handling, and splice an extra cover on their ropes to give better grip, avoid chafe and make them last longer. Using clear, step-by-step photography and detailed instructions, this book will guide readers through all the stages required to make strong, reliable splices.

Make your modern sailboat look (and work) like a salty classic. The Golden Age of Sail is long past, sadly, and much of its lore is nearly extinct. Sailboats now almost uniformly use the Bermudan sloop rig—a triangular jib and a triangular mainsail. But that rig evolved mainly to meet esoteric yacht-racing measurement rules. It is not necessarily the most efficient or effective rig. This book lets sailors rediscover the practical advantages—and the aesthetic delights—of such configurations as the sprit sail, the gaff sail, the lug sail, and the gunter rig. It also includes valuable information on marlinspike work like rope-whipping and eye-splicing; and tips on converting your modern sailboat to a traditional rig. _____ Some reviews: “This will become the classic book on traditional rigs for small boats. . . . the kind that not only look better but work better on small boats than their modern counterparts.” —Gary Blankenship, Duckworks Magazine “The ‘traditional’ rigs here are the kind you’ll find on the clinker plywood designs of Iain Oughtred and the like; rigs with polyester sails and running rigging. Tufnol blocks and stainless steel shackles. ‘Modern traditional boats’, if you’ll forgive the phrase. Similarly, there’s a nice mix of old and new the manner the material is presented: old in the cleanliness of the page design; new in the extensive use of colour close-up photographs to illustrate details of the rigs. Highly recommended.” —Water Craft Magazine “Mr. Nichols does an excellent job of explaining the fundamentals in terms that are useful to old salts looking to tweak their rigs, builders trying to figure out what's next, and admirers of traditional design.” —Good Old Boat

This book relates the current, insidious plight facing the human race as a direct result of a grand deception that has been imposed upon it for tens of thousands of years if not longer. This has been perpetrated by the systematic, ongoing falsification of history in much the same way as perpetrated by the powers that be in the suspiciously prophetic novel '1984', by George Orwell. We have all been deceived on a monumental scale by a tiny clique of people who by their own birthright and bloodlines absolutely believe that they have the divine right to rule over us by whatever method best suits their purposes. In order to achieve this they have lied, deceived, murdered and even committed genocide down the millennia in an attempt to bring their ultimate goal to fruition. Find out about the use of drugs, vaccinations, micro-chipping, mind control, trans-humanism and 24/7 distractions such as non-stop sports, entertainments and the invasive 'celebrity culture' that attempts to pervade our whole lives.
