The sun has gone down, but that doesn't mean that family fun has to come to an end. On A Starry Night is an inspiring collection of 52 things to do, make and play when there's very little or no natural light, and the evenings feel long and empty. There's something incredibly alluring about playing after dark for kids - it feels grown-up, exciting, and a little bit scary. This will include ideas for indoor and outdoor fun, things to do in all seasons, and ideas that will work whether you live in a city, town or country. It will inspire parents to go beyond sitting their kids in front of the TV, and to take back the night and be creative with their evenings as a family. Fun, light, but with plenty of practical information, this book will include checklists, box-outs and spaces to make notes and scribble. It'll be aimed at families, but simple enough for older children to read and enjoy.

### **Make a Masterpiece -- Van Gogh's Starry Night**

A famous rock star, a family secret and a boy with a great smile make for one unforgettable summer. It's 1962, and thirteen-year-old Reenie Starr comes alive the minute guests begin to arrive at her family's summer resort. She dreams of the day she can run Sandy Shores, and she spends her time helping out at the resort, swimming, climbing trees, and singing under the stars. One day, Reenie's mother announces that she thinks the resort could use some entertainment. She invites Gwen, her best friend's almost-grown daughter, to come and teach a dance class. Although Gwen seems sad and remote, Reenie's thrilled to have her there. As Reenie starts to learn more about the world beyond Sandy Shores, she comes up with a plan that could really put it on the map. She also finds herself caught between the simpler world of her childhood and all of the wonderful new discoveries (boys) and heartaches (boys) that growing up can bring. Reenie thought she wanted Sandy Shores to never change, but after this summer nothing will ever be the same again. With the same humour and insight that she brought to the acclaimed Words That Start With B, Vikki VanSickle expertly captures those

lazy, hazy, crazy days of the last summer before high school. Though set in a different time, Summer Days, Starry Nights is sure to resonate with all young readers on the verge of adolescence.

## **Starry Nights**

Today we are all familiar with the iconic pictures of the nebulae produced by the Hubble Space Telescope's digital cameras. But there was a time, before the successful application of photography to the heavens, in which scientists had to rely on handmade drawings of these mysterious phenomena. Observing by Hand sheds entirely new light on the ways in which the production and reception of handdrawn images of the nebulae in the nineteenth century contributed to astronomical observation. Omar W. Nasim investigates hundreds of unpublished observing books and paper records from six nineteenth-century observers of the nebulae: Sir John Herschel; William Parsons, the third Earl of Rosse; William Lassell; Ebenezer Porter Mason; Ernst Wilhelm Leberecht Tempel; and George Phillips Bond. Nasim focuses on the ways in which these observers created and employed their drawings in data-driven procedures, from their choices of artistic materials and techniques to their practices and scientific observation. He examines the ways in which the act of drawing complemented the acts of seeing and knowing, as well as the ways that making pictures was connected to the production of scientific knowledge. An impeccably researched, carefully crafted, and beautifully illustrated piece of historical work, Observing by Hand will delight historians of science, art, and the book, as well as astronomers and philosophers.

*Starry Nights: Critical Structural Realism in Anthropology* offers nothing less than a reinventing of the discipline of anthropology. In these six essays – four published here for the first time – Stephen Reyna critiques the postmodern tenets of anthropology, while devising a new strategy for conducting research. Combative and clear, *Starry Nights* provides an important critique of mainstream anthropology as represented by Geertz and the postmodern legacy, and envisions a mode of anthropological research that addresses social, cultural and biological questions with techniques that are theoretically rigorous and practically useful.

## **The Starry Night**

This richly illustrated volume explores mystical themes in European, Scandinavian, and North American landscape paintings from the late 1800s to the early 1900s. This book features works by Emily Carr, Marc Chagall, Arthur Dove, Paul Gauguin, Lawren Harris, Wassily Kandinsky, Gustav Klimt, Piet Mondrian, Claude Monet, Edvard Munch, Georgia O'Keeffe, Vincent van Gogh and James McNeill Whistler, among others. Common to their work is the expression of the spiritual crisis that arose in society and the arts in reaction to the disillusionments of the modern age, and against the malaise that resulted in the Great War. Many artists turned their backs on institutional religion, searching for truth in universal spiritual philosophies. This book includes essays investigating mystical landscape genres and their migration from Scandinavia to North America, with a focus upon the Group of Seven and their Canadian and American counterparts. Accompanying an exhibition at the Art Gallery of Ontario and the Musée d'Orsay, this book offers a penetrating look at the Symbolist influence on the landscape genre.

## **The Wraparound Universe**

Two masterful artists—Gauguin and van Gogh—come alive in a vibrant drama about friendship, art, and madness. Two painters—Paul Gauguin and Vincent van Gogh—are living together in the sleepy town of Arles in 1888. Soon, Gauguin,

frustrated by van Gogh's refusal to acknowledge his increasingly troubled mind, will depart for Paris. In two years, van Gogh will be dead by his own hand. In the meantime, the friends discuss their craft; they frequent a local café that van Gogh will soon immortalize; they become acquainted with a young prostitute, Lotte, who becomes Gauguin's lover; they argue; they paint. In Derek Walcott's new historical play, *O Starry Starry Night*, two world-renowned artists come to life as they wrestle both with grand themes—friendship, loyalty, fame—and with more mundane concerns, money primary among them. The scenes Walcott sketches summon several of van Gogh's most famous paintings: *Sunflowers*, *The Night Café*, *The Bedroom at Arles*. His manipulation of language—van Gogh's eloquent monologues giving way to more abstract speeches—evokes the painter's descent into madness. Over the action hangs the threat of violence, of death, which lends the play a potent urgency; for at least one of the characters, time is quickly running out. *O Starry Starry Night* is powerfully wrought, and demonstrates once again the sharpness of Walcott's eye: as a painter, as a poet, as a writer, and, above all, as an observer of human follies, foibles, failings, and aspirations.

## **Observing by Hand**

What shape is the universe? Is it curved and closed in on itself? Is it expanding?

Where is it headed? Could space be wrapped around itself, such that it produces ghost images of faraway galaxies? Such are the questions posed by Jean-Pierre Luminet in *The Wraparound Universe*, which he then addresses in clear and accessible language. An expert in black holes and the big bang, he leads us on a voyage through the surprising byways of space-time, where possible topologies of the universe, explorations of the infinite, and cosmic mirages combine their mysterious traits and unlock the imagination. *The Wraparound Universe* is a general-audience book about the overall topology or shape of the universe. The central question addressed is whether it is possible that the universe is wrapped around in an interesting way, and what impact this would have on astronomical observations and our understanding of cosmology. Along the way many of the general features and much of the history of the modern picture of cosmology are discussed.

*Starry Night* is a fully illustrated account of Van Gogh's time at the asylum in Saint-Remy. He wrote very little about the asylum in letters to his brother Theo, so this book sets out to give an impression of daily life behind the walls of the asylum of Saint-Paul-de-Mausole and looks at Van Gogh through fresh eyes, with newly discovered material.

## **Van Gogh Notebook**

From the time he was a little boy, Vincent van Gogh often lay awake at night. He used that time to imagine swirls of color and starlight shapes, to draw—and to explore the rich, dark life of midnight outdoors. He grew into a young man who wandered cities and country villages, painting the world as he saw it—even when no one else saw it the same way. Van Gogh never achieved success in his lifetime, but he also never veered from his passion for art. He would go on to become one of the most beloved painters of all time. *Vincent Can't Sleep* is a celebration of creativity, individuality, and the power of sticking with something that you love, from the acclaimed team behind the Caldecott Honor Book *The Noisy Paint Box*.

## **Starry Nights**

The Marvell family is on the move, driving from their Wisconsin farm to visit the children's grandmother in Virginia. The night before their departure, Mr. Marvell talks to Roger, Heather, and the twins about the wonders of the night sky and explains the zodiac — a beautiful trail traveled by the sun in the daytime and by the moon and planets at night. The pathway's 12 sections, called the "signs" of the zodiac, contain clusters of stars. Long ago shepherds and sailors identified the clusters with characters from mythology, and so the heavens became filled with gods and heroes, hunters, ploughmen, and archers as well as birds, bears, farm animals, and monsters. Upon the family's arrival in Virginia, Mr. Marvell sets up his telescope but he can't find the Crab —it has disappeared from the sky! Meanwhile, back in Wisconsin, a strange light emanates from the Marvells' house, illuminating every board, windowpane, shingle, brick, and stone. What could be causing it? A Newbery Honor book of 1947, this extraordinary tale by a noted American author is gloriously illustrated with woodcut-style scratchboard graphics.
