### Perfect Stranger

In this intimate debut thriller in the vein of Donna Tartt's *The Secret History*, an award-winning mystery writer delves into the mind of a young woman who's closer to murder than she'd like to admit. "This is about three deaths. Actually more, if you go back far enough. I say deaths but perhaps all of them were murders. It's a grey area. Murder, like beauty, is in the eye of the beholder." Within six months of her arrival at a university campus, three of Penelope Sheppard's new friends are dead. And only Pen knows why. This isn't Pen's first encounter with violence, and she's an expert at keeping secrets—especially ones as dark and dangerous as her own. Reputations have a way of haunting you—they're easy to make, hard to shake. After Pen leaves her isolated hometown to escape the judgmental stares of her neighbors and carve out a new identity for herself, she's free from the stigma of her past mistakes. At school, Pen is anonymous, surrounded by an eclectic collection of perfect strangers. But when someone begins to uncover the deadly secrets she thought she'd left behind, how far will Pen go to protect her new life? Six months later, Pen is back home, the victim of a violent trauma and a pariah once again. Now, reluctantly, she must recount her story from start to finish: to her shrink, to the police, even to herself. Because until she tells the whole truth, there will be no escaping the past. But their game turns a little darker when Ted jokes that he could kill Miranda for what she's done. Lily, without missing a beat, says calmly, “I'd like to help.” After all, some people are the kind worth killing, like a lying, stinking, cheating spouse. . . . Back in Boston, Ted and Lily's twisted bond grows stronger as they begin to plot Miranda's demise. But there are a

### The Kindness of Strangers

A sweeping psychological history of human goodness -- from the foundations of evolution to the modern political and social challenges humanity is now facing. How did humans, a species of self-centered apes, come to care about others? Since Darwin, scientists have tried to answer this question using evolutionary theory. In *The Kindness of Strangers*, psychologist Michael E. McCullough shows why they have failed and offers a new explanation instead. From the moment nomadic humans first settled down until the aftermath of the Second World War, our species has confronted repeated crises that we could only survive by changing our behavior. As McCullough argues, these choices weren't enabled by an evolved moral sense, but with moral invention -- driven not by evolution's dictates but by reason. Today's challenges -- climate change, mass migration, nationalism -- are some of humanity's greatest yet. In revealing how past crises shaped the foundations of human concern, *The Kindness of Strangers* offers clues for how we can adapt our moral thinking to survive these challenges as well.
