What if you could reboot your health, tap into your creative self, reclaim your wild nature, lead from your heart—and still feel well rested? As modern women, we're taught that we can do it all, have it all, and be it all. While this freedom is beautiful, it's also exhausting. Being a "worn-out woman" is now so common that we think feeling tired all the time is normal. According to Karen Brody, feeling this exhausted is not normal—and it's holding us back. In *Daring to Rest*, Brody comes to the rescue with a 40-day program to help you reclaim rest and access your most powerful, authentic self through yoga nidra, a meditative practice that guides you into one of the deepest states of relaxation imaginable. It's time to lie down and begin the journey to waking up. Though it comes from the yogic tradition, yoga nidra doesn't look like a typical yoga class—the entire practice is done lying down. As you listen to a guided meditation, you're gently taken into complete inner stillness, effortlessly releasing into a healing state that works on both cellular and subtle body levels. With *Daring to Rest*, Brody presents a comprehensive yoga nidra program that unfolds in three phases: rest for physical exhaustion, release for mental and emotional exhaustion, and rise for tuning in to the "life purpose exhaustion" that can come when we're not in our full power. Each phase includes a downloadable yoga nidra guided meditation and supportive practices. "By directly accessing your subconscious mind, yoga nidra helps shift the long-held patterns that prevent you from stepping fully into your purpose and power," writes Brody. "Now is the time to break the cycle of fatigue and return to your truest self—the woman you are when you're not constantly exhausted."

wondered why feeling guilty after eating our favorite foods, or any food, is even an optional response? When did you last use a workout as punishment, perhaps for overindulging or missing several workouts? Have you ever done a workout to "earn" the right to eat a favorite treat or to "atone" for "blowing your diet"? Have you ever attached your self-worth to the number you saw on the bathroom scale, or had your day ruined by it? A better question is, why do we do these unhelpful things? Why do we value ourselves by some arbitrary number? Why do we follow rigid diets that can create a fear of food? Why do we allow health and fitness, something that is supposed to make us feel great about ourselves and improve our quality of life, be a continuous source of frustration that leaves us feeling less than? Enough is enough. It's time for you to reclaim health and fitness, and make it the empowering lifestyle it's supposed to be. And that is what you'll do with *The 100-Day Reclaim*. The book contains 100 daily readings. Bite-sized lessons that you'll practice or be mindful of throughout the day. Readings range from topics about food, fitness, mindset, and other helpful lessons. Our moral wastes, and how to reclaim them

OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? **WE HAVE FORGOTTEN HOW TO FLOAT.** The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. *Hustle and Float* explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

In his mid-twenties, Dave Asprey was a successful Silicon Valley multimillionaire. He also weighed 300 pounds, despite the fact that he was doing what doctors recommended: eating 1,800 calories a day and working out 90 minutes a day, six times a week. When his excess fat started causing brain fog and food cravings sapped his energy and willpower, Asprey turned to the same hacking techniques that made his fortune to "hack" his own biology, investing more than \$300,000 and 15 years to uncover what was hindering his energy, performance, appearance, and happiness. From private brain EEG facilities to remote monasteries in Tibet, through radioactive brain scans, blood chemistry work, nervous system

testing, and more, he explored traditional and alternative technologies to reach his physical and mental prime. The result? The Bulletproof Diet, an anti-inflammatory program for hunger-free, rapid weight loss and peak performance. The Bulletproof Diet will challenge—and change—the way you think about weight loss and wellness. You will skip breakfast, stop counting calories, eat high levels of healthy saturated fat, work out and sleep less, and add smart supplements. In doing so, you'll gain energy, build lean muscle, and watch the pounds melt off. By ditching traditional "diet" thinking, Asprey went from being overweight and sick in his twenties to maintaining a 100-pound weight loss, increasing his IQ, and feeling better than ever in his forties. The Bulletproof Diet is your blueprint to a better life.

"A new epidemic is sweeping the country. Some people call it "ADHD," "scatter brain," or "brain fog." And some people simply say they "just don't feel like themselves"—and haven't for a long time. People are thinking and feeling worse than ever. Why? Because our brains are not getting the support they need to produce the essential brain chemicals that keep us energized, calm, focused, and inspired. In fact, if you look at the way that most of us live, it's almost as though we had chosen a lifestyle deliberately intended to undermine our brain chemistry. Fortunately, there is a solution. *The Brain Fog Fix* is a three-week program designed to help you naturally restore three of your brain's most crucial chemicals: serotonin, dopamine, and cortisol. Rebalancing these three brain chemicals will, in turn, enable the rest

of your brain's chemistry to reach optimal levels. You will find yourself thinking more clearly, remembering more accurately, learning more quickly, and unleashing the floodgates of your creativity. You will also find yourself feeling more optimistic, calm, energized, connected, and inspired. The good news is that this is easier than you think. Instead of trying to ambitiously overhaul one aspect of your life entirely with some difficult-to-maintain resolution, begin by making small and achievable changes in many different areas of your life. “I have long thought that what the Buddha taught can be seen as a highly developed science of mind which, if made more accessible to a lay audience, could benefit many people. I believe that Dr. Weiss’s book, in combining such insights with science and good business practice, offers an effective mindfulness based program that many will find helpful.” --His Holiness, the Dalai Lama A practical guide to bringing our whole selves to our professional work, based on the author’s overwhelmingly popular course at the Stanford Graduate School of Business. In today’s workplace, the traditional boundaries between "work" and "personal" are neither realistic nor relevant. From millennials seeking employment in the sharing economy to Gen Xers telecommuting to Baby Boomers creating a meaningful second act, the line that separates who we are from the work we do is blurrier than ever. The truth is, we don’t show up for our jobs as a portion of ourselves—by necessity, we bring both our hearts and our minds to everything we do. In *How We Work*, mindfulness expert and creator of the perennially-waitlisted Stanford Business School course "Leading with Mindfulness and Compassion" Dr. Leah Weiss explains why this false dichotomy can be destructive to both our mental health and our professional success. The bad news, says Weiss, is that nothing provides more opportunities for negative emotions—*anxiety, anger, envy, fear, and paranoia*, to name a few—than the dynamics of the workplace. But the good news is that these feelings matter. How we feel at and about work matters—to ourselves, to the quality of our work, and ultimately to the success of the organizations for which we work. The path to productivity and success, says Weiss, is not to change jobs, to compartmentalize our feelings, or to create a false "professional" identity—but rather to listen to the wisdom our feelings offer. Using mindfulness techniques, we can learn how to attend to difficult feelings without becoming subsumed by

them; we can develop an awareness of our bigger picture goals that orients us and allows us to see purpose in even the most menial tasks. In *How We Work*, Weiss offers a set of practical, evidence-based strategies for practicing mindfulness in the real world, showing readers not just how to survive another day, but how to use ancient wisdom traditions to sharpen their abilities, enhance their leadership and interpersonal skills, and improve their satisfaction.

“A welcome antidote to our toxic hustle culture of burnout.” Arianna Huffington “This book is so important and could truly save lives.” Elizabeth Gilbert “A clarion call to work smarter [and] accomplish more by doing less.” Adam Grant We work feverishly to make ourselves happy. So why are we so miserable? Despite our constant search for new ways to optimize our bodies and minds for peak performance, human beings are working more instead of less, living harder not smarter, and becoming more lonely and anxious. We strive for the absolute best in every aspect of our lives, ignoring what we do well naturally and reaching for a bar that keeps rising higher and higher. Why do we measure our time in terms of efficiency instead of meaning? Why can't we just take a break? In *Do Nothing*, award-winning journalist Celeste Headlee illuminates a new path ahead, seeking to institute a global shift in our thinking so we can stop sabotaging our well-being, put work aside, and start living instead of doing. As it turns out, we're searching for external solutions to an internal problem. We won't find what we're searching for in punishing diets, productivity apps, or the latest self-improvement schemes. Yet all is not lost—we just need to learn how to take time for ourselves, without agenda or profit, and redefine what is truly worthwhile. Pulling together threads from history, neuroscience, social science, and even paleontology, Headlee examines long-held assumptions about time use, idleness, hard work, and even our ultimate goals. Her research reveals that the habits we cling to are doing us harm; they developed recently in human history, which means they are habits that can, and must, be broken. It's time to reverse the trend that's making us all sadder, sicker, and less productive, and return to a way of life that allows us to thrive.

Unfrazzle

From the New York Times bestselling author of *The Last Castle* and *The Girls of Atomic City* comes a new way to look at American history through the story of giving thanks. From Ancient Rome through 21st-century America, bestselling author Denise Kiernan brings us a biography of an idea: gratitude, as a compelling human instinct and a global concept, more than just a mere holiday. Spanning centuries, *We Gather Together* is anchored amid the strife of the Civil War, and driven by the fascinating story of Sarah Josepha Hale, a widowed mother with no formal schooling who became one of the 19th century's most influential tastemakers and who campaigned for decades to make real an annual day of thanks. Populated by an enthralling supporting cast of characters including Frederick Douglass, Abraham Lincoln, Sojourner Truth, Walt Whitman, Norman Rockwell, and others, *We Gather Together* is ultimately a story of tenacity and dedication, an inspiring tale of how imperfect people in challenging times can create powerful legacies. Working at the helm of one of the most widely read magazines in the nation, Hale published Edgar Allan Poe, Nathaniel Hawthorne, Harriet Beecher Stowe, and others, while introducing American readers to such newfangled concepts as “domestic science,” white wedding gowns, and the Christmas tree. A prolific writer, Hale penned novels, recipe books, essays and more, including the ubiquitous children's poem, “Mary Had a Little Lamb.” And Hale herself never stopped pushing the leaders of her time, in pursuit of her goal. The man who finally granted her wish about a national “thanksgiving” was Lincoln, the president of the war-torn nation in which Hale would never

have the right to vote. Illuminating, wildly discussable, part myth-busting, part call to action, *We Gather Together* is full of unexpected delights and uneasy truths. The stories of indigenous peoples, immigrant communities, women's rights activists, abolitionists, and more, will inspire readers to rethink and reclaim what it means to give thanks in this day and age. The book's message of gratitude—especially when embraced during the hardest of times—makes it one to read and share, over and over, at any time of year.

This Is the Day

The Book of Awakening, a cult favorite since its original publication in 2000, catapulted to fame in 2010 after it was chosen as one of Oprah Winfrey's favorite things. This gift edition with sewn binding and a ribbon marker reflects the book's odyssey as a well-beloved daily companion. Mark Nepo wrote the book more than a decade ago, in response to his journey through cancer a decade before that. That experience led him to create a day book not only for people going through life-threatening situations but for everyone. Nepo calls it, "a book to help people meet their days and inhabit their lives. I had a commitment to create a book that could serve up inner food, that could be turned to as a spiritual first aid kit." That this book continued to find its readers affirms its quality as a life affirming companion. Again, in Nepo's words, "I think it confirms the yearning of people everywhere for meaningful and humble work that invites readers on a journey together. The premise of the book is that people everywhere have a wisdom of their own and the book is there to guide them to their own wisdom." *The Book of Awakening* is a modern classic, speaking to the hearts of hundreds of thousands of readers. It's a daily guide for living in hard times and good times, all the time reminding us that the life we're living is the life we have. Lived authentically it can and does become the life we want. This hardcover edition features a ribbon marker and a subject index that allows the reader to search for quotes and inspiration pertinent to his or her life not only by day but by category.
