The Special Artist in American Culture

Following a life-changing accident that left him paralyzed at age 51, Arthur Ullian began to realize that not only did life in a wheelchair make him feel "different," but he had always felt like an outsider to some degree, having grown up Jewish in the elite WASP world of prep schools, cotillion classes, sailing yachts, and restricted clubs. He also came to see that over the course of his life he had, paradoxically, internalized the prevailing Christian view of the "Jewish character" and

unconsciously attempted to replicate the social and material trappings of those who excluded him. In Matthew, Mark, Luke, John . . . and Me -- a thoughtful, historically-grounded, and often humorous memoir -- he interweaves personal experience with an exploration of the roots of ethnic stereotypes and anti-Semitism, ending with reasons to hope that historic Jewish-Christian enmities will fade and brotherhood eventually prevail.

Boats and Boating in the Adirondacks

Using his Weekly Adirondack articles as a blueprint, Charles Herr presents the first general history of the Fulton Chain region in almost seventy years. Readers will learn about the beginnings of Old Forge and Inlet, Benjamin Harrison's visits, construction of the Fulton Chain Railroad and Raquette Lake Railway lines, the steamboats, mail boats and pickle boats, as well as the first major hotels of Inlet and Old Forge. Also covered is early town politics and the building of roads.

and the presence of Native people in the region was obvious but not well documented by Europeans, who did not venture into the interior between the seventeenth and early nineteenth centuries. Yet, by the late nineteenth century, historians had scarcely any record of their long-lasting and vibrant existence in the area. With *Rural Indigenoussness*, Otis shines a light on the rich history of Algonquian and Iroquoian people, offering the first comprehensive study of the relationship between Native Americans and the Adirondacks. While *Otis* focuses on the nineteenth century, she extends her analysis to periods before and after this era, revealing both the continuity and change that characterize the relationship over time. Otis argues that the landscape was much more than a mere hunting ground for Native residents; rather, it a "location of exchange," a space of interaction where the land was woven into the fabric of their lives as an essential source of refuge and survival. Drawing upon archival research, material culture, and oral histories, Otis examines the nature of Indigenous populations living in predominantly Euroamerican communities to identify the ways in which some maintained their distinct identity while also making selective adaptations exemplifying the concept of "survivance." In doing so, *Rural Indigenoussness* develops a new conversation in the field of Native American studies that expands our understanding of urban and rural indigeneity.

compilation of tools, tactics, and habits from 130+ of the world's top performers. From iconic entrepreneurs to elite athletes, from artists to billionaire investors, their short profiles can help you answer life's most challenging questions, achieve extraordinary results, and transform your life. From the author: In 2017, several of my close friends died in rapid succession. It was a very hard year, as it was for many people. It was also a stark reminder that time is our scarcest, non-renewable resource. With a renewed sense of urgency, I began asking myself many questions: Were my goals my own, or simply what I thought I should want? How much of life had I missed from underplanning or overplanning? How could I be kinder to myself? How could I better say “ no ” to the trivial many to better say “ yes ” to the critical few? How could I best reassess my priorities and my purpose in this world? To find answers, I reached out to the most impressive world-class performers in the world, ranging from wunderkinds in their 20s to icons in their 70s and 80s. No stone was left unturned. This book contains their answers—practical and tactical advice from mentors who have found solutions. Whether you want to 10x your results, get unstuck, or reinvent yourself, someone else has traveled a similar path and taken notes. This book, *Tribe of Mentors*, includes many of the people I grew up viewing as idols or demi-gods. Less than 10% have been on my podcast (*The Tim Ferriss Show*, more than 200 million downloads), making this a brand-new playbook of playbooks. No matter your challenge or opportunity, something in these pages can help. Among other things, you will learn:

- More than 50 morning routines—both for the early riser and those who struggle to get out of bed.
- How TED curator Chris Anderson realized that the best way to get things done is to let go.
- The best purchases of \$100 or less (you'll never have to think about the right gift again).
- How to overcome failure and bounce back towards success.
- Why Humans of New York creator Brandon Stanton believes that the best art will always be the riskiest.
- How to meditate and be more mindful (and not just for those that find it easy).
- Why tennis champion Maria Sharapova believe that “ losing makes you think in ways victories

This book combines practical woodworking technique with practical canoe use experience [It] covers every single aspect of canoe paddle building. -- Sawdust and Shavings Despite the growing interest in making paddles and canoes, it can be difficult to find reliable information on that craft -- except for this book. First published more than a decade ago and having sold 35,000 copies, *Canoe Paddles: A Complete Guide to Making Your Own* is the ultimate modern guide to the traditional craft for both the how-to beginner and the skilled woodworker. In *Canoe Paddles: A Complete Guide to Making Your Own*, longtime canoeist and woodworker Graham Warren provides detailed information and guidance to make a canoe paddle that will be used with confidence and cherished for generations. The book is thoroughly illustrated with photographs, line drawings and plans with measurements for: How to make a paddle having a single blade, a bent shaft, or double blades How to protect a paddle with oil or varnish What to look for when test-driving a paddle How to decorate a paddle How to care for and repair a paddle. The authors include an appreciation of the evolution of the paddle plus a special chapter by renowned canoe-building teacher David Gidmark which celebrates paddle-making in the native tradition.

This book presents the small boat designer & builder with a basic insight into the nature of fiberglass as a boat-building material, as well as a sound, yet simple, approach to analyzing fiberglass boat hull structures. The basic principles of fiberglass, including its advantages & disadvantages are outlined & thorough review is given to the characteristics of fiberglass materials & laminate design properties. In addition, valuable data is presented on basic design principles such as selection of structural loads, safety factors, deflection & vibration limitation. The level of detail presented in this book is tuned to the boat designer who recognizes the need for a sound engineering analysis of the fiberglass structures he designs, tempered with a practical, uncomplicated approach. The book is well illustrated & includes numerous step-by-step design examples to demonstrate the principles presented. List \$25; Members \$20. The lakes of the Adirondack region are explored in this superb collection of masterful images, most of which are previously unpublished. The photographs in Adirondack Lakes were taken by well-known and lesser-known photographers of the region, including Seneca Ray Stoddard, George W. Baldwin, H. T. Hull, Katherine E. McClellan, William Kolleyer, William L. Distin, and Henry M. Beach. Dating from 1858 to 1948, they are clear, focused, visually engaging, and historically significant. They show the men and women who developed the Adirondacks, from monied entrepreneurs to manual laborers, from hoteliers to roadside attendants, from vacationers to year-round residents—a cast of characters reflecting nearly a century of Adirondack activity.

The blue and gold historical markers inform travelers but only enough to pique their curiosity. In Howard Ford's *Sure Signs: Stories Behind the Historical Markers of Central New York*, he relates the exploration of the French, Dutch, English, and the rebels and their battle for control of New York. He continues with the establishment of homes and shops on the frontier; the development of roads, canals, steamboats, and railroads; the origin of the Mormons, the Oneida Community, the Code of Handsome Lake, and the Chautauqua experiment; the long plight for women's suffrage; and the abolition of slavery, among other stories of interest. Frank Hamilton Taylor represents an important, but overlooked, group of documentalists of American history - Special Artists. These were men and women who wrote and illustrated articles for the pictorial press which included "Harper's Weekly" and "Frank Leslie's." Well known Specials like Winslow Homer and Frederic Remington have received only cursory acknowledgment of the importance of their early work for these papers. However, studying the works and lives of Special Artists, like Taylor, can give unique insights into the development of American culture. His achievements give us a better understanding of the emergence of middle-class values at the turn of the century.

Casting into Mystery

The Adirondack guideboat has survived for well over a century as a unique regional classic, first as a workboat in the rugged Adirondack mountain region of New York and later as a recreational craft. It is noted for its graceful lines, elegant curves, easy and speedy rowing, and for having a very high ooh-ahh value among casual observers. It may be easily built by accomplished amateur and professional woodworkers alike. In this book, John Michne explains, in his usual excruciating detail with wisps of wit here and there, how you can replicate a guideboat exactly as if it had just rolled out of an Adirondack boat shop a century ago. Built from laminated spruce ribs and covered in narrow edge-glued strips or traditionally planked in pine, it is a woodworker's dream challenge. Making every part of the boat (except the oarlocks) is detailed in 25 chapters, with over 270 shop photos and six appendices, including 16 pages of detailed dimensioned drawings by John Gardner, courtesy of Adirondack Experience. As an additional bonus, there are 12 full-size CAD drawings included at no extra cost via download. These drawings of ribs, seats, oars, and more eliminate the need for the builder to spend many hours doing tedious manual lofting even before starting construction.

Adventures in the Wilderness, Or, Camp-life in the Adirondacks

The Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half-century. In nearly 2,000 pages and 4,000 signed entries, this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas, as a cradle of abolitionism and feminism, and as an apex of modern urban, suburban, and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world, but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi; New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate . . . and to the west. Entries by experts chronicle New York's varied areas, politics, and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads, weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures, 120 maps, and 140 tables, the Encyclopedia is key to understanding the state's past, present, and future. It is a crucial reference for students, teachers, historians, and business people, for New Yorkers of all persuasions, and for anyone interested in finding out more about New York State.

Housing and Dwelling collects the best in recent scholarly and philosophical writings that bear upon the history of domestic architecture in the nineteenth and twentieth centuries. Lane combines exemplary readings that focus on and examine the issues involved in the study of domestic architecture, taken from an innovative and informed combination of philosophy, history, social science, art, literature and architectural writings. Uniquely, the readings underline the point of view of the user of a dwelling and assess the impact of varying uses on the evolution of domestic architecture. This book is a valuable asset for students, scholars, and designers alike, exploring the extraordinary variety of methods, interpretations and source materials now available in this important field. For students, it opens windows on the many aspects of domestic architecture. For scholars, it introduces new, interdisciplinary points of view and suggests directions for further research. It acquaints practising architects in the field of housing design with history and methods and offers directions for future design possibilities.

Adirondack Wilderness

"Mohonk and the Smileys: A National Historic Landmark and the Family That Created It chronicles the history and enduring legacy of a unique resort whose aim has always been to create and sustain a peaceful, contemplative environment for the betterment of human relations and for improved relations between people and the world around them. It is a story that includes the creation of the largest privately owned nature preserve in New York State, international arbitration conventions that predated the Hague Conventions, and landmark efforts to improve the plight of American Indians and African Americans--all while dealing day by day with the logistical challenges of operating a complex private enterprise successfully over the span of 150 years of rapid technological and social change. In 1869 twin brothers Albert and Alfred Smiley purchased a rough-and-tumble ten-room inn and 280 acres of surrounding land on the shores of Lake Mohonk in the wild and isolated Shawangunk Mountains. Year by year the Smileys expanded the hotel, bought surrounding farms to feed their guests, built stables and carriage houses, a power plant and blacksmith shop, planted acres of flower gardens, and created a vast network of roads and hiking trails for guests to access the singular beauty of the Shawangunks--and all was done with the then-unusual business philosophy of careful respect for the environment. Soon the little guest house had become a grand Victorian castle seeming to rise

organically from the Shawangunk ridge on which it perched. It was the heyday of the grand hotel era in the Catskills and the "great camps" in the Adirondacks. Then, one by one nearly all of those hotels and camps either went up in flames or were abandoned, left, like the great Catskill Mountain House, to rot in the wind and rain. But not the Smiley's Lake Mohonk Mountain House. Despite two world wars, the Great Depression, the rise of automobile and airplane travel, changing demographics and cultural upheavals, steadily increasing tax burdens--events and factors that finished off most of its competitors--one hundred and fifty years later the little inn on the shores of Lake Mohonk has not only survived, but thrived and grown into a world-famous mountain resort in a spectacular setting with over 260 guest rooms, luxury amenities, and acclaimed dining--and still family-owned and operated, five generations later." -- Provided by publisher
