Shipwreck Diving

In cold, murky water, working by touch alone, they can defuse a mine powerful enough to sink a battleship. Under the burning Afghan sun, they can dismantle a Taliban roadside bomb. Welcome to the world of the Royal Australian Navy clearance divers. Bomb and mine disposal is but one of their roles. As covert swimmers they can infiltrate enemy waters. As boarding parties they are on the anti-piracy frontline. As counterterrorist special forces they are on call 24/7. They are simply one of the best diving units in the military world. Their story goes back to the Second World War, when Hitler's secret weapon - the magnetic mine - had Britain on her knees. Four extraordinary Aussies were among the brave naval volunteers who tackled Nazi mines on land and under water. The men who followed their path share the same brand of courage. From the rivers of Vietnam to the deserts of Afghanistan, navy divers have excelled under the most dire pressure, yet we know very little of their heroic deeds. Their incredible story has remained behind closed doors. Until now . . .

Competitive Diving

The book manages to combine humor, adventure, tragedy, triumph, heroism, and even some forays into the risqué ... while chronicling the careers of 20 enduring personalities that helped make diving what it is today. Some of those interviewed are retired now, one (author Peter Benchley of Jaws fame) recently passed away, and many are still making history through their ongoing work. It's quite a group. Consider that the lineup includes actress and Sea Hunt star Zale Parry who also set the depth record for women divers back in 1954. Stan Waterman provides both the book's Foreword and a revealing insider look at his seven decades in diving. Living legend Bev Morgan pioneered the first dive training programs along with revolutionizing commercial diving equipment. His image in full hardhat dress also graces the book's cover. Morgan's candor and humor set the pace for the lively montage of dialogues to follow with Australian couple Ron and Valerie Taylor who rose to fame in the iconic shark documentary film Blue Water, White Death. They are joined by others from diving's first generation including filmmaker Al Giddings (The Deep, Abyss, Titanic, etc.), retail pioneer and cameraman Chuck Nicklin (The Diving Locker), manufacturers Dick Bonin (Scubapro) and Bob Hollis (Oceanic), photography masters Ernie Brooks and Paul Humann, as well as deep ocean explorer Dr. Bob Ballard who discovered the wrecks of the Titanic, Bismarck, and PT-109. Diving's second generation of innovators includes cave explorer Wes Skiles, filmmaker Mike deGruy, wreck explorer John Chatterton (of Shadow Divers fame), IMAX film producer Greg MacGillivray, and the dynamic husband/wife team of Howard and Michele Hall who seem to dominate the realm of documentary underwater films now (Island of the Sharks, Coral Reef Adventure, Deep Sea 3D). Last but not least, Stan Waterman talked Gilliam into sitting for an interview about his own amazing career and, typically, he shares a wicked sense of humor along with some biting perspective about what it was like to champion new technologies and daring approaches to diving business when the sport's ultra-conservatives wanted to suppress nitrox, liveaboards, technical diving, diving computers, training methods, and honest journalism. Each chapter is a slice of human interest that lets the reader briefly pull back the curtain on the personal lives of diving's heroes and feel like they are part of the conversation. The full color book is lavishly illustrated with great photographs that capture each interviewee throughout their diving careers. It's a very personal journey and the reader will feel like they pulled up a chair and shared a cup of coffee around a table with each person. Gilliam enlisted help from other leading writers for some interviews he couldn't conduct himself and Fred Garth, Lina Hitchcock, Eric Hanauer, Douglas Seifert and Michel Gilbert & Danielle Alary all make significant contributions to round out the book. It's a massive volume, 8x11 inches in size, 496 pages, hard bound, and weighing in at a whopping eight pounds per copy.

Stathis G. Hatzis was the head diver among Symi's and the Dodecanese's hundreds of free divers - sponge divers in the early 20th century. In 1913, he dived to a depth of 88 meters, for 4 minutes, in his attempt to locate and tie the anchor of the Italian battleship Regina Margherita which had been lost on the ocean floor. The book is the biography of Stathis Hatzis and follows Stathi in his three day adventure to find and secure the lost anchor, making a total of 16 record free dives from 50 to 88 meters depth. Stathis Hatzis' unique accomplishment was representative of the incredible abilities of this humble sponge diver, as well as his generation's, the last free divers - sponge divers, diving with the kampanelopetra, who disappeared along with a unique in the world tradition, which had endured uninterrupted until then, since the depths of antiquity. In the pages of this book, the adventures and legendary dives of Stathis Hatzis become the reason to chronicle the entire history of free diving in Greece, from its origins in ancient times to the late 20th century. Rare photos and documents reveal the achievements of an island population consisting of thousands of free divers and their families, who, with Symi and the Dodecanese as an epicentre, achieved greatness in the Aegean for centuries, thanks to the precious sponges gathered from the depths of the Mediterranean and traded in the markets of Europe and America.

Chris and Chrissy Rouse, an experienced father-and-son scuba diving team, hoped to achieve widespread recognition for their outstanding but controversial diving skills. Obsessed and ambitious, they sought to solve the secrets of a mysterious, undocumented World War II German U-boat that lay under 230 feet of water, only a half-day's mission from New York Harbor. In doing so, they paid the ultimate price in their quest for fame. Bernie Chowdhury, himself an expert diver and a close friend of the Rouses', explores the thrill-seeking world of deep-sea diving, including its legendary figures, most celebrated triumphs, and gruesome tragedies. By examining the diver's psychology through the complex father-and-son dynamic, Chowdhury illuminates the extreme sport diver's push toward—and sometimes beyond—the limits of human endurance.
