The bestselling author of Head Strong and The Bulletproof Diet answers the question, "How can I kick more ass at life?" by culling the

wisdom of world-class thought leaders, maverick scientists, and disruptive entrepreneurs to provide proven techniques for becoming happier, healthier, and smarter. When Dave Asprey started his Bulletproof Radio podcast more than five years ago, he sought out influencers in an array of disciplines, from biochemists toiling in unknown laboratories to business leaders changing the world to mediation masters discovering inner peace. His guests were some of the top performing humans in the world, people who had changed their areas of study or even pioneered entirely new fields. Dave wanted to know: What did they have in common? What mattered most to them? What made them so successful—and what made them tick? At the end of each interview, Dave asked the same question: “What are your top three recommendations for people who want to perform better at being human?” After performing a statistical analysis of the answers, he found that the wisdom gleaned from these highly successful people could be distilled into three main objectives: finding ways to become smarter, faster, and happier. Game Changers is the culmination of Dave’s years-long immersion in these conversations, offering 46 science-backed, high performance “laws” that are a virtual playbook for how to get better at life. With anecdotes from game changers like Dr. Daniel Amen, Gabby Bernstein, Dr. David Perlmutter, Arianna Huffington, Esther Perel, and Tim Ferris as well as examples from Dave’s own life, Game Changers offers readers practical advice they can put into action to reap immediate rewards. From taming fear and anxiety to making better decisions, establishing high-performance habits, and practicing gratitude and mindfulness, Dave brings together the wisdom of today’s game-changers to help everyone kick more ass at life.

The Jackrabbit Factor

#1 New York Times bestselling author John C. Maxwell's latest book will enhance the lives of leaders, professionals, and anyone who wants to achieve success and personal growth. We often treat the word capacity as if it were a natural law of limitation. Unfortunately, most of us are much more comfortable defining what we perceive as off limits rather than what's really possible. Could it be that many of us have failed to expand our potential because we have allowed what we perceive as capacity to define us? What if our limits are not really our limits? In his newest book, John Maxwell identifies 17 core capacities. Some of these are abilities we all already possess, such as energy, creativity and leadership. Others are aspects of our lives controlled by our choices, like our attitudes, character, and intentionality. Maxwell examines each of these capacities, and provides clear and actionable advice on how you can increase your potential in each. He will guide you on how to identify, grow, and apply your critical capacities. Once you've blown the "cap" off your capacities, you'll find yourself more successful--and fulfilled--in your daily life.

ABOUT THE ORIGINAL BOOK Success is not the product of chance, much less of magic or secret formulas. Success is achieved through consistent actions that are carried out every day with the right attitude and the necessary behavior. The media strives to sell us quick solutions to any problem that obstructs our achievements, but the time has come to ignore the easy answers that are not really going to take us anywhere. Nothing is built from nothing; every goal requires sustained effort and "quick success" is harmful and unreal. The success or rather, the lack of success, is a direct consequence of our daily decisions, which give direction to our life. This book is about how to pursue our goals and overcome any kind of obstacle. The compound effect is, therefore, an action plan that anyone can take advantage of to be as successful as Arnold Schwarzenegger or Michael Phelps. This is through making small changes in everyday decisions to generate other, larger, long-term changes. Ultimately, it's about taking responsibility for our own satisfaction and happiness. INTRODUCTION The modern world is obsessed with wealth, health and eternal youth, and aims to sell us fantastic remedies backed by unreal testimonies of people who achieved success by almost miraculous means. Among all this bombardment of information, or misinformation, we have found ourselves lost in confusion, which does not allow us to see where the pillars of success really are. To start deprogramming we must be aware that this is a slow

process that will require a long period of practice. The objective is to transform this constant change into habits, that become automatic to the point where their practice no longer requires great effort. This can only be done over time. But the advantage is that the changes consist of very simple things, such as spending a greater part of the day on healthy pastimes instead of sitting in front of the television. All of the above also has the ability to determine our failure. It is almost impossible for us to achieve a radical change overnight. One day we can wake up, feel especially good and prone to a positive attitude that motivates us to face our fears and approach one more step to our goals. However, the next morning may not be so simple and we may wish to postpone the change until next week, hoping to feel better again. That is why when we aim for sudden changes, perseverance will not appear and without it, we will not be able to move forward. Therefore, the problem is not usually with our attitude nor the level of difficulty of the objectives that we set, but it is with our approach, which we must redirect from negative habits towards positive habits. This implies that our negative mentality, for example rooted in the concerns, changes towards a positive one. A small change that we can begin to make to help ourselves, is to disconnect from all those false means and start listening to motivational means, or surround ourselves with inspiring people in our environment. This will help us to make an in-depth revision of our habits, to develop an efficient plan that allows us to improve ourselves, and make the small daily decisions that will re-shape our day to day life.
