Ten Days that Shook the World

We've all gotten bad news. A job lost, failing health, loss of a loved one. How would you handle a devastating call you never wanted to receive? Olympian and WNBA star Swin Cash knows what it feels like because she's been there too. She's gotten "the call." Humble Journey: More Precious Than Gold traces her road from the fateful call in 2008, when she failed to make the U.S. Olympic team a second time, to the call in 2012. Join her on this eventful journey through her

Quadriplegics do not simply walk again - yet millions watched as Chris Norton took ten nearly impossible steps. With his fiancée, Emily, supporting at his side, those unbelievable steps became the start of an extraordinary journey for them both. The Seven Longest Yards tells the unforgettable love story of how Chris and Emily battled unbelievable odds with faithful determination to discover that life's lowest moments can be our greatest gifts. In a moment, Chris went from a talented 18-year-old college football player with a promising future to flat on his back with a broken neck and a 3% chance of ever moving or feeling anything below his neck, much less walking again. The life Chris dreamt of - including his hope for finding love - was shattered. At least, so he thought. Determined to prove the doctors wrong and to find love, Chris pushed himself through grueling, daily workouts until four years later, Chris walked across the stage to receive his college diploma, with Emily's help and the world's astonished applause. Meanwhile, Emily faced her own challenges as she sunk into a deep battle against anxiety and depression. Despite a devoted fiancé, a

fulfilling career working with youth, and a strong faith, she couldn't shake the mental darkness that clouded their promising future. Day by day, decision by decision, Chris and Emily committed themselves to taking the extra step, trusting God, and leaning on the help of others. In a story of unforgettable grit and courageous faith, this extraordinary couple's journey led them to ultimately tackle the longest seven yards together - down the wedding aisle and into a new life. And what a new life it has become: as Chris and Emily have adopted five beautiful girls and welcomed seventeen (and counting!) foster children into their home and hearts. From their private struggles to shared blessings, their moving memoir told from both of their unique perspectives is your stirring invitation to put one foot in front of the other, especially in the face of the impossible. You might just find, as they have, that God can transform our lowest points into life's greatest gifts.

daughter, Caelith, is on a quest: to distance herself from the ways of her father. On this quest she meets an outcast, a slightly younger man near her own age, who is magically prevented from going home. Together they form a union and Caelith is slowly turned back to the life, and politics and cause of her father, Daniel Gregoryson: The Prophecy. And also to securing the return of her companion, Evermon, to his homeland. But not before she is called upon to endure the trials that the Dark has in store for her friend and herself. A Kingdom in peril would fall to the youngest of three brothers, as the older Princes are off on quests of their own. The new Queen, the King's second wife, has other plans; promoting the rise of her own, foreign-born son to the Kingship. Unknown to the Queen, the Queen she replaced is being sought for secretly; as is the true identity of the new Queen. There is something not quite right about her. The Princess of Mirador, Daniel's daughter, self-exiled, seeks freedom from her impending royal responsibilities - for she is to be Queen there. Will it be exile for one Prince of Aradon, or will all three face replacement and banishment by an insanely jealous Queen? ABOUT THE SERIES: THE CHILDREN OF THE ORB A long time ago on a planet far away there lived The Race of Enchanters, beings of Light. As is ever the situation when Light is present, so, also, is Darkness. These Sorcerors, close kin to the Enchanters, seek to influence and destroy all that had been

protected and created by the Light. Other magical beings and creatures inhabit these realms and are torn and divided by this constant battle between Light and Dark; events and prophecies are ignored by the Light, The Dark, and the neutral; allegiances change and shift; power over all being the end result, for some. Then comes word of The Prophecy of Light: a being to come in the median of time to lead the Forces of Light to victory. Thus the stage is set in Colabos for Daniel Light and the Children of the Orb. STORY NOTES: The stories of Two Black Birds and The Waters Of Life (Brothers Grimm) loosely provide a basic framework on which to hang this re-imagined tale about The Children Of The Orb, which also alludes to the origin of the stories we know and love on Planet Earth as having possibly come from beyond our own Earthly experience. friendships and insights that develop as a part of the triumphs and failures in his life. Become part of "the gig" when, as Hooker describes it, "At some point in the evening the process of reciprocity begins to develop. Shared energy between the audience and the performers becomes evident. Your lover, your companion, your mistress is the music you've dedicated your life to. With the etudes, scales, the countless hours of practice, you can finally express your emancipated soul in total freedom." Music is transformative and Hooker describes from the inside out how one unknown trumpeter found healing through a life as a jazz musician.

"This book is a slice of intensified history—history as I saw it." So begins John Reed's first-hand account of the Bolshevik Revolution of 1917. Much anticipated when it was published in 1919, Reed's narrative remains as riveting today as when the events he describes were still reverberating throughout the world. Reed was hardly a disinterested observer, and his involvement in the Communist labor movement lends urgency and passion to his classic account. He vividly describes events in Petrograd in November 1917, when Vladimir Lenin and the Bolsheviks stormed the Winter Palace and seized the reins of power.

Despite Reed's personal leanings, which he made no attempt to hide, the book garnered praise from luminaries across the political spectrum. George F. Kennan, the American diplomat, and father of the policy of Soviet containment, said that "Reed's account of the events of that time rises above every other contemporary record for its literary power, its penetration, its command of detail. It will be remembered when all others are forgotten." Reed was committed to telling the story of the Russian revolution as truthfully as possible. That the book was banned by Russian premier Josef Stalin is a testament to the author's success in carrying out his mission. One hundred years after Russia and the world trembled, *Ten Days that Shook the World* brings alive the momentous events of 1917.

The Longest Journey is a bildungsroman by E. M. Forster, first published in 1907. It is the second of Forster's six published novels, following *Where Angels Fear to Tread* (1905) and preceding *A Room with a View* (1908) and *Howards End* (1910). It has a reputation for being the least known of Forster's novels, but was also the author's personal favourite and one of his most autobiographical. It is the only one of Forster's novels not to have received a film or television

Unknown Fate

"Ever since the dawn of civilization we have been driven by a desire to know--to understand the physical world and the laws of nature. But are there limits to human knowledge? This tantalizing question has inspired scientists and functioned as a spur to innovation. Now, Marcus du Sautoy invites us to join him on a journey to the outer reaches of human understanding as there are still lots of deep mysteries waiting to be solved. Are some things beyond the predictive powers of science? Or are those challenges simply the next big discovery waiting to happen?"--

difference? As humans, we have an extraordinary ability to create works of art that elevate, expand and transform what it means to be alive. Yet in many other areas, new developments in AI are shaking up the status quo, as we find out how many of the tasks humans engage in can be done equally well, if not better, by machines. But can machines be creative? Will they soon be able to learn from the art that moves us, and understand what distinguishes it from the mundane? In *The Creativity Code*, Marcus du Sautoy examines the nature of creativity, as well as providing an essential guide into how algorithms work, and the mathematical rules underpinning them. He asks how much of our emotional response to art is a product of our brains reacting to pattern and structure, and exactly what it is to be creative in mathematics, art, language and music. Marcus finds out how long it might be before machines come up with something creative, and whether they might jolt us into being more imaginative in turn. The result is a fascinating and very different exploration into both AI and the essence of what it means to be human. tly what it is to be creative in mathematics, art, language and music. A Journey in Other Worlds

Drawing on rarely examined diaries and journals, *Down the Great Unknown* is the first book to tell the full, dramatic story of the Powell expedition. On May 24, 1869 a one-armed Civil War veteran, John Wesley Powell and a ragtag band of nine mountain men embarked on the last great quest in the American West. The Grand Canyon, not explored before, was as mysterious as Atlantis—and as perilous. The ten men set out from Green River Station, Wyoming Territory down the Colorado in four wooden rowboats. Ninety-nine days later, six half-starved wretches came ashore near Callville, Arizona. Lewis and Clark opened the West in 1803, six decades later Powell and his scruffy band aimed to resolve the West's last mystery. A brilliant narrative, a thrilling journey, a cast of memorable heroes—all these mark *Down the Great Unknown*, the true story of the last epic adventure on American soil.

offering novel insights into the age-old enigmas of existence. Over 300 years ago, the human mind discovered the machine code of reality: mathematics. By utilizing abstract thought systems, humans began to decode the workings of the cosmos. From this understanding, the current scientific paradigm emerged, ultimately discovering the gift of technology. Today, however, our island of knowledge is surrounded by ever longer shores of ignorance. Science appears to have hit a dead end when confronted with the nature of reality and consciousness. In this fascinating and accessible volume, James Glattfelder explores a radical paradigm shift uncovering the ontology of reality. It is found to be information-theoretic and participatory, yielding a computational and programmable universe.

Every time we download music, take a flight across the Atlantic or talk on our cell phones, we are relying on great mathematical inventions. In *The Number Mysteries*, one of our generation's foremost mathematicians Marcus du Sautoy offers a playful and accessible examination of numbers and how, despite efforts of the greatest minds, the most fundamental puzzles of nature remain unsolved. Du Sautoy tells about the quest to predict the future—from the flight of asteroids to an impending storm, from bending a ball like Beckham to forecasting population growth. He brings to life the beauty behind five mathematical puzzles that have contributed to our understanding of the world around us and have helped develop the technology to cope with it. With loads of games to play and puzzles to solve, this is a math book for everyone.

Humble Journey

Since the dawn of time, fire has been the essence of light, protection, and destruction. As an ally and savior, it has built the mightiest of citadels, empires, and countries. As an enemy and destroyer, it has consumed everything it touches. It was prophesied in the Ancient world, that the destruction of Earth, as we know it, would come in the form of fire. But what if fire was the essence we needed to save this world? During the early 1970's, after segregation, an unlikely bond formed between an African America boy named Billy Smalls and Caucasian girl named Mariah Clover. Though segregation was over, the southern town of Stone Mountain, Georgia held on to many of their racial ideologies. Though their friendship faced many obstacles, Billy and Mariah formed a bond of undying love. At the center of Stone Mountain's economy is a nuclear power plant that is owned by a business tycoon who inherited his father's wealth. Needing to make his own mark on the world, he does whatever it takes to gain more control and power. After him and Billy's paths cross, they are effected by a nuclear disaster that changes the fate of the world as super human powers emerge and evil tries to conquer it. However, in the midst of evil, a hero is born with the power of the sun. Despite having super powers, treachery and betrayal awaits around every corner. Though

Rethinking Peace Mediation

“An engaging voyage into some of the great mysteries and wonders of our world.” --Alan Lightman, author of *Einstein’s Dream* and *The Accidental Universe* “No one is better at making the recondite accessible and exciting.” --Bill Bryson *Brain Pickings* and *Kirkus Best Science Book of the Year* Every week seems to throw up a new discovery, shaking the foundations of what we know. But are there questions we will never be able to answer—mysteries that lie beyond the predictive powers of science? In this captivating exploration of our most tantalizing unknowns, Marcus du Sautoy invites us to consider the problems in cosmology, quantum physics, mathematics, and neuroscience that continue to bedevil scientists and creative thinkers who are at the forefront of their fields. At once exhilarating, mind-bending, and compulsively readable, *The Great Unknown* challenges us to consider big questions—about the nature of consciousness, what came before the big
