The thrilling international bestseller from Australia's favourite novelist, author of the Scarecrow series and Jack West Jr series with new novel The Three Secret Cities out now. "Reilly hurls readers into an adrenaline-drenched thrill ride impossible to put down." Orlando Sentinel "Reilly can inspire awe. Speed demons, take note." Publishers Weekly The New York State Library. A silent sanctuary of knowledge; a 100-year-old labyrinth of towering bookcases, narrow aisles and spiralling staircases. For Doctor Stephen Swain and his eight-year-old daughter, Holly, it is the site of a nightmare. For one night, the State Library is to be the venue for a contest. A contest in which Stephen Swain is to compete - whether he likes it or not. The rules are simple: seven contestants will enter, only one will leave. With his daughter in his arms, Swain is plunged into a terrifying fight for survival. He can choose to run, to hide or to fight - but if he wants to live, he has to win. Because in a contest like this, unless you leave as the victor, you do not leave at all. Fans of Clive Cussler, Tom Clancy and Michael Crichton will love Matthew Reilly.

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

CHAPTER 1. Loomings. Call me Ishmael. Some years ago—never mind how long precisely—having little or no money in my purse, and nothing particular to interest me on shore, I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth; whenever it is a damp, drizzly November in my soul; whenever I find myself involuntarily pausing before coffin warehouses, and bringing up the rear of every funeral I meet; and especially whenever my hypos get such an upper hand of me, that it requires a strong moral principle to prevent me from deliberately stepping into the street, and methodically knocking people's hats off—then, I account it high time to get to sea as soon as I can. This is my substitute for pistol and ball. With a philosophical flourish Cato throws himself upon his sword; I quietly take to the ship. There is nothing surprising in this. If they but knew it, almost all men in their degree, some time or other, cherish very nearly the same feelings towards the ocean with me.

Unless you have unbeatable boatspeed, tactics are vital to winning sailboat races. Multi-champion, Nick Craig, shows you how to develop a strategy and what tactics to adopt on every leg and at every mark of the course. His first book, *Helming to Win*, was described as "original, thought provoking like no other that has gone before it". He now turns his highly analytical mind to the subject of tactics. He discusses the inputs into strategy, starting and the race plan (going through each leg in turn). Nick then tackles

mark tactics, covering every different type of mark, and fleet tactics on every leg of the course. He finally focusses on boat-to-boat tactics, again on every leg of the course. In each situation he covers attacking and defensive tactics, either to get ahead or make sure you stay ahead. Non-spinnaker, symmetrical spinnaker and asymmetric dinghies are all covered because Nick has won world or national championships in each of these types of boats. Having read Nick's first book many said that it had transformed the way they sailed. This book will have the same effect on your tactics and should see you moving up the leaderboard.

Brand Bible

In this remarkably illustrative and thoroughly accessible look at one of the most intriguing frontiers in science and computers, award-winning New York Times writer George Johnson reveals the fascinating world of quantum computing—the holy grail of super computers where the computing power of single atoms is harnessed to create machines capable of almost unimaginable calculations in the blink of an eye. As computer chips continue to shrink in size, scientists anticipate the end of the road: A computer in which each switch is comprised of a single atom. Such a device would operate under a different set of physical laws: The laws of quantum mechanics. Johnson gently leads the curious outsider through the surprisingly simple ideas needed to understand this dream, discussing the current state of the revolution, and ultimately assessing the awesome power these machines could have to change our world. From the Trade Paperback edition.

Helming to Win

Sir Ben Ainslie won his first two Olympic medals (silver, then gold) in the Laser Class. After winning the gold medal he wrote down the secrets that won him that medal in this book. This new edition is published to mark the 20th anniversary of that first of his four Olympic gold medals. It features a brand-new introduction by Ben reflecting on his victory 20 years ago. It is the only how-to book that the world's most successful Olympic sailor has written and so, while he and the Laser class have moved on, this is the only place where you can gain access to Ben's skills and thought process. It is an invaluable guide on how to perform at the top of the Laser class or, indeed, any single-handed sailing dinghy. From psychology, goal setting and getting the boat right to speed, fitness and training – this book illustrates how to win a championship. Brimming with photographs, it is a colourful, detailed account of how to dominate in your fleet.

Tactics Made Simple

This report, which was developed by an expert committee of the Institute of Medicine, reviews the first three services listed above. It is intended to assist policymakers by providing syntheses of the best evidence available about the effectiveness of these services and by estimating the cost to Medicare of covering them. For each service or condition examined, the committee commissioned a review of the scientific literature that was presented and discussed at a public workshop. As requested by Congress, this report includes explicit estimates only of costs to Medicare, not costs to beneficiaries, their families,

or others. It also does not include cost-effectiveness analyses. That is, the extent of the benefits relative to the costs to Medicare-or to society generally-is not evaluated for the services examined. The method for estimating Medicare costs follows the generic estimation practices of the Congressional Budget Office (CBO). The objective was to provide Congress with estimates that were based on familiar procedures and could be compared readily with earlier and later CBO estimates. For each condition or service, the estimates are intended to suggest the order of magnitude of the costs to Medicare of extending coverage, but the estimates could be considerably higher or lower than what Medicare might actually spend were coverage policies changed. The estimates cover the five-year period 2000-2004. In addition to the conclusions about specific coverage issues, the report examines some broader concerns about the processes for making coverage decisions and about the research and organizational infrastructure for these decisions. It also briefly examines the limits of coverage as a means of improving health services and outcomes and the limits of evidence as a means of resolving policy and ethical questions.

First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, "marked a real turning point . . . and proved that a war can be won by airpower alone." Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower-the members of the 40th Expeditionary Operations Group. Their descriptions-a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot-provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to capitulate.

Laser Racing is essential reading for all Laser sailors who want to win in this highly competitive class. Top US racer Ed Baird - Laser World Champion in 1980 - explains in words and pictures how to prepare your boat, practice your boat handling skills and how to sail the race itself. Ed gives invaluable advice on line and gate starts, handling the Laser upwind in waves, adjusting the vang, gybing in heavy air and all the other problems frequently raised at his Laser racing clinics. Plus insights into the psychology of winning a series - while discouraging your opponents from doing the same!

The Fingerprint

This breakthrough book on dinghy racing will help you make the transition from weekend racer to world champion. Covering everything from where to look and getting 'in the groove' to mental approaches and championship sailing, you will be working your way up the leaderboard in no time. Packed full of intelligent insight, brilliant top tips and engaging photo sequences, if your goal is to win then this is the book for you! Written by the 'Champion of Champions' Nick Craig - an amateur sailor - this book proves that, with the right tools and enough determination, anyone can succeed in the sport of sailing. In his foreword Sir Ben Ainslie writes how he himself has used a lot of the techniques that Nick describes in the book, and remarks that Nick is "one of the best. This book allows anyone to gain from his experiences."

Wind Strategy

Olympic gold medallist and multiple world champion, Paul Goodison, explains why this book is important if you want to win races. He says: "To win sailboat races you need to sail the boat fast. This comes down to hours on the water training and tuning – there are few shortcuts to hours of practising on the water. To consistently win races you need to sail fast and smart – making the right decisions to sail the best course. If you are not the fastest boat, you are still able to win races and regattas by managing risk and sailing smart. This is where good tactics come in. But, unlike boatspeed, tactics may be learnt by thinking about each leg of the course and different situations from the comfort of your own home. Jon Emmett's new book, *Tactics Made Simple*, is a great tool to help fast track this learning." This book explains simply, through hundreds of diagrams, what tactics can be applied around the race track. Individual boats in each scenario are given names so that you can easily understand what they are doing. Individual chapters take you around the race course, from before you get on the water, through the pre-start, start, different legs and manoeuvres. Each section contains detailed advice for the beginner, intermediate and advanced sailor so you can just look at the level of tactics relevant to you. Ideal for dinghy sailors, there is also a wealth of advice that will benefit yachtsmen. This is a practical way to improve your racing results, whether starting out, moving up the club circuit or competing at national level and beyond. Gold medal winning coach, Jon Emmett works with sailors and coaches around the world and is frequently asked things like: ‘What is a good exercise to improve this?’ ‘Why do we do this exercise?’ ‘How do we make the exercise more / less difficult?’ This book is the answer to those frequently asked questions. It contains training exercises for each element of a sailing race. As well as describing and illustrating the exercise, it tells you what skills you are trying to improve, why and how to make the exercise harder or easier. The book will enable coaches to deliver better, more focussed, training sessions, but it will also help sailors who don't have the benefit of a coach to practise and improve their sailing skills. The exercises are marked as to whether they are suitable for solo boats, groups of boats or those with a coach boat. As Aristotle said: “We are what we repeatedly do. Excellence then is not an act, but a habit.” Armed with this book, get out, do some training and improve your sailing skills!
