Inside the Mind of Joseph Smith

"We need books like this one." --Steven Pinker At last, stupidity explained! And by some of the world's smartest people, among them Daniel Kahneman, Dan Ariely, Alison Gopnik, Howard Gardner, Antonio Damasio, Aaron James, and Ryan Holiday. And so I proclaim, o idiots of every stripe and morons of all kinds, this is your moment of glory: this book speaks only to you. But you will not recognize yourselves Stupidity is all around us, from the coworker who won't stop hitting "reply all" to the former high school classmate posting conspiracy theories on Facebook. But in order to vanquish it, we must first understand it. In *The Psychology of Stupidity*, some of the world's leading psychologists and thinkers--including a Nobel Prize winner and bestselling authors--will show you

- why smart people sometimes believe in utter nonsense;
- how our lazy brains cause us to make the wrong decisions;
- why trying to debate fools is a trap;
- how media manipulation and Internet overstimulation make us dumber;
- why the stupidest people don't think they're stupid.

The wisdom and wit of these experts are a balm for our aggrieved souls and a beacon of hope in a world of morons.

The Murder Book

The International Sensation It begins in a Stockholm city park where the abused body of a young boy is discovered. Detective Superintendent Jeanette Kihlberg heads the investigation, battling an apathetic prosecutor and a bureaucratic police force unwilling to devote resources to solving the murder of an immigrant child. But with the discovery of the mutilated corpses of two more children, it becomes clear that a serial killer is at large. Superintendent Kihlberg turns to therapist Sofia Zetterlund for her expertise in the psychopathology of those who kill, and the lives of the two women

become quickly intertwined—professionally and personally. As they draw closer to each other and to the truth about the killings, what surfaces is the undeniable fact that these murders are only the most obvious evidence of an insidious evil woven deep into Swedish society. From the Hardcover edition.

The Psychology of False Confessions

In 1909, as a sadistic killer stalks Manhattan's wealthiest heiresses, Sigmund Freud is called in by American analyst Dr. Stratham Younger to assist him in interviewing Nora Acton, a hysterical survivor of the killer who can recall nothing about the attack. A first novel. Reader's Guide included. Reprint. 100,000 first printing.

Usually when we're bored, we try to distract ourselves. But soon enough, boredom returns. James Danckert and John Eastwood argue that we can learn to handle boredom more effectively by recognizing what research shows: boredom indicates unmet psychological needs. Boredom, therefore, can motivate us to change what isn't working in our lives.

The Psychology of Stupidity

The Seven Deadly Sins of Psychology

The study of human cognitive processes provides insight into why we act or react and can help us predict future behaviors. In *Cognition*, authors Thomas Farmer and Margaret Matlin present an engaging and highly relatable examination of how these processes work, and how they are responsible for the way we

perceive and interpret the world around us. Broad in scope without sacrificing depth of detail, this text emphasizes the link between conceptual cognitive psychology and real-world experience; case studies, current trends, and historical perspectives merge to provide a comprehensive understanding of core principles and theories. This new Tenth Edition has been updated to reflect the latest research, technology, and thinking, with more in-depth coverage of topics rising to prominence in the field ' s current knowledge base. Expanded explanations balance classical and contemporary approaches to specific topics, while additional experiments and an emphasis on methodology and experimental design are included to facilitate a greater appreciation of the field ' s rigorous research.

The Great Pretender

A leather-covered scrapbook containing carefully mounted photographs of murder victims arrives on Alex Delaware's doorstep. Alex summons the help of his best friend, LAPD detective Milo Sturgis. Each will soon be forced to confront their own personal demons.

The Confidence Game

"One of America's most courageous young journalists" and the author of the #1 New York Times bestselling memoir *Brain on Fire* investigates the shocking mystery behind the dramatic experiment that revolutionized modern medicine (NPR). Doctors have struggled for centuries to define insanity--how do you diagnose it, how do you treat it, how do you even know what it is? In search of an answer, in the 1970s a Stanford psychologist named David Rosenhan and seven other people--sane, healthy, well-adjusted members of society--went undercover into asylums around America to test the legitimacy of psychiatry's labels. Forced to remain inside until they'd

"proven" themselves sane, all eight emerged with alarming diagnoses and even more troubling stories of their treatment. Rosenhan's watershed study broke open the field of psychiatry, closing down institutions and changing mental health diagnosis forever. But, as Cahalan's explosive new research shows in this real-life detective story, very little in this saga is exactly as it seems. What really happened behind those closed asylum doors?

Stumbling on Happiness

A troubled childhood. A difficult adolescence. How might these have affected the adult character of church founder Joseph Smith? Psychiatrist Robert D. Anderson explores the impact on young Joseph of his family's ten moves in sixteen years, their dire poverty, especially after his father's Chinese export venture failed, and his father's drinking. It is equally significant, writes Anderson, that Joseph's mother suffered bouts of depression. For instance, "for months" she "did not feel as though life was worth seeking" after two sisters died of tuberculosis and later when she buried two sons, Ephraim and Alvin. A typhoid epidemic nearly claimed her daughter Sophronia, and the same affliction left Joseph with a crippled leg, after which he was sent to live on the coast with an uncle. Such factors and others produced emotional wounds that emerged later in the prophet's life and writings, in particular, according to Anderson, in the Book of Mormon.

The Museum of Desire

A second-rate actor is found mutilated in a car trunk. Then a psychologist at a Los Angeles hospital for the criminally insane is murdered in a similar grisly fashion. Suddenly the incoherent ramblings of an inmate at the presumably secure institution begin to make chilling sense—they are, in fact, horrifying predictions. Yet how can a barely functional psychotic locked behind asylum walls possibly know such vivid details of crimes committed in the outside world? Drawn into a labyrinth of secrets, revenge, sex, and manipulation, Dr. Alex Delaware and Detective Milo Sturgis set out to unlock this enigma and put an end to the brutal killings—before the madman predicts their own demise. . . .

A smart and funny book by a prominent Harvard psychologist, which uses groundbreaking research and (often hilarious) anecdotes to show us why we 're so lousy at predicting what will make us happy – and what we can do about it. Most of us spend our lives steering ourselves toward the best of all possible futures, only to find that tomorrow rarely turns out as we had expected. Why? As Harvard psychologist Daniel Gilbert explains, when people try to imagine what the future will hold, they make some basic and consistent mistakes. Just as memory plays tricks on us when we try to look backward in time, so does imagination play tricks when we try to look forward. Using cutting-edge research, much of it original, Gilbert shakes, cajoles, persuades, tricks and jokes us into accepting the fact that happiness is not really what or where we thought it was. Among the unexpected questions he poses: Why are conjoined twins no less happy than the general population? When you go out to eat, is it better to order your favourite dish every time, or to try something new? If Ingrid Bergman hadn 't gotten on the plane at the end of Casablanca, would she and Bogey have been better off? Smart, witty, accessible and laugh-out-loud funny, *Stumbling on Happiness* brilliantly describes all that science has to tell us about the uniquely human ability to envision the future, and how likely we are to enjoy it when we get there. From the Hardcover edition.

world's first time machine. But just as they are about to debut their creation, one of them suffers a breakdown, putting the whole project—and future of time travel—in jeopardy. To protect their invention, one member is exiled from the team—erasing her contributions from history. Fifty years later, time travel is a big business. Twenty-something Ruby Rebello knows her beloved grandmother, Granny Bee, was one of the pioneers, though no one will tell her more. But when Bee receives a mysterious newspaper clipping from the future reporting the murder of an unidentified woman, Ruby becomes obsessed: could it be Bee? Who would want her dead? And most importantly of all: can her murder be stopped? Traversing the decades and told from alternating perspectives, *The Psychology of Time Travel* introduces a fabulous new voice in fiction and a new must-read for fans of speculative fiction and women's fiction alike.

"It's a startling and disconcerting read that should make you think twice every time a friend of a friend offers you the opportunity of a lifetime." —Erik Larson, #1 New York Times bestselling author of *Dead Wake* and bestselling author of *Devil in the White City* Think you can't get conned? Think again. The New York Times bestselling author of *Mastermind: How to Think Like Sherlock Holmes* explains how to spot the con before they spot you. "[An] excellent study of Con Artists, stories & the human need to believe" —Neil Gaiman, via Twitter A compelling investigation into the minds, motives, and methods of con artists—and the people who fall for their cons over and over again. While cheats and swindlers may be a dime a dozen, true conmen—the Bernie Madoffs, the Jim Bakkers, the Lance Armstrongs—are elegant, outsized personalities, artists of persuasion and exploiters of trust. How do they do it? Why are they successful? And what keeps us falling for it, over and over again? These are the questions that journalist and psychologist Maria Konnikova tackles in her mesmerizing new book. From multimillion-dollar Ponzi schemes to small-time frauds, Konnikova pulls together a selection of fascinating stories to demonstrate what all cons share in common, drawing on scientific, dramatic, and psychological perspectives. Insightful and gripping, the book brings readers into the world of the con, examining the relationship between artist and victim. *The Confidence Game* asks not only why we believe con artists, but also examines the very act of believing and how our sense of truth can be manipulated by those around us. From the Hardcover edition.

changed since then due in part to the diligent work done by Gisli H. Gudjonsson. This eye-opening book by the Icelandic/British clinical forensic psychologist, who in the mid 1970s had worked as detective in Reykjavik, offers a complete and current analysis of how the study of the psychology of false confessions came about, including the relevant theories and empirical/experimental evidence base. It also provides a reflective review of the gradual development of the science and how it can be applied to real life cases. Based on Gudjonsson ' s personal account of the biggest murder investigations in Iceland ' s history, as well as other landmark cases, *The Psychology of False Confessions: Forty Years of Science and Practice* takes readers inside the minds of those who sit on both sides of the interrogation table to examine why confessions to crimes occur even when the confessor is innocent. Presented in three parts, the book covers how the science of studying false confessions emerged and grew to become a regular field of practice. It then goes deep into the investigation of the mid-1970s assumed murders of two men in Iceland and the people held responsible for them. It finishes with an in-depth psychological analysis of the confessions of the six people convicted. Written by an expert extensively involved in the development of the science and its application to real life cases *Covers the most sensational murder cases in Iceland ' s history Deep analysis of the ' Reykjavik Confessions ' adds crucial evidence to understanding how and why coerced-internalized false confessions occur, and their detrimental and lasting effects on memory* *The Psychology of False Confessions: Forty Years of Science and Practice* is an important source book for students, academics, criminologists, and clinical, forensic, and social psychologists and psychiatrists.

This important book examines the motives that drive family historians and explores whether those who research their ancestral pedigrees have distinct personalities, demographics or family characteristics. It describes genealogists' experiences as they chart their family trees including their insights, dilemmas and the fascinating, sometimes disturbing and often surprising, outcomes of their searches. Drawing on theory and research from psychology and other humanities disciplines, as well as from the authors' extensive survey data collected from over 800 amateur genealogists, the authors present the experiences of family historians, including personal insights, relationship changes, mental health benefits and ethical dilemmas. The book emphasises the motivation behind this exploration, including the need to acknowledge and tell ancestral stories, the spiritual and health-related aspects of genealogical research, the addictiveness of the detective work, the lifelong learning opportunities and the passionate desire to find lost relatives. With its focus on the role of family history in shaping personal identity and contemporary culture, this is fascinating reading for anyone studying genealogy and family history, professional genealogists and those researching their own history.

Natasha Mayston wasn't expecting anyone to knock on her door so late at night. And she has no idea that the face staring back at her is the last one she'll ever see As Detective Dan Lockhart is called to a wealthy London street to investigate Natasha's death, he's startled by the similarity to a previous case. Noticing the cable-tie restraints and the tiny scratches on Natasha's wedding finger, Dan already knows what he will find if he looks in her mouth - the metal ball which choked her to death. He knows Natasha isn't the killer's first victim and is certain that he will strike again. Months earlier, Kim Hardy was found in the same position in a run-down hotel across the city - an identical silver ball in her throat. But Kim's murderer was caught and sent to prison - did they arrest the wrong man? And what connects the two victims? Fearing that he's dealing with a psychopathic serial killer, Dan calls in psychologist Dr Lexi Green to help him to get into the perpetrator's mind. Tough and smart, Lexi will stop at nothing to hunt down the man responsible for the deaths. Then, another body is discovered, just as Lexi finds a clue online leading to the killer. Dan's team aren't convinced, but in

The Interpretation of Murder

Why psychology is in peril as a scientific discipline—and how to save it Psychological science has made extraordinary discoveries about the human mind, but can we trust everything its practitioners are telling us? In recent years, it has become increasingly apparent that a lot of research in psychology is based on weak evidence, questionable practices, and sometimes even fraud. The Seven Deadly Sins of Psychology diagnoses the ills besetting the discipline today and proposes sensible, practical solutions to ensure that it remains a legitimate and reliable science in the years ahead. In this unflinchingly candid manifesto, Chris Chambers shows how

practitioners are vulnerable to powerful biases that undercut the scientific method, how they routinely torture data until it produces outcomes that can be published in prestigious journals, and how studies are much less reliable than advertised. Left unchecked, these and other problems threaten the very future of psychology as a science—but help is here.

The New York Times bestselling guide to thinking like literature's greatest detective. "Steven Pinker meets Sir Arthur Conan Doyle" (Boston Globe), by the author of *The Confidence Game*. No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes. But is his extraordinary intellect merely a gift of fiction, or can we learn to cultivate these abilities ourselves, to improve our lives at work and at home? We can, says psychologist and journalist Maria Konnikova, and in *Mastermind* she shows us how. Beginning with the "brain attic"—Holmes's metaphor for how we store information and organize knowledge—Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights. Drawing on twenty-first-century neuroscience and psychology, *Mastermind* explores Holmes's unique methods of ever-present mindfulness, astute observation, and logical deduction. In doing so, it shows how each of us, with some self-awareness and a little practice, can employ these same methods to sharpen our perceptions, solve difficult problems, and enhance our creative powers. For Holmes aficionados and casual readers alike, Konnikova reveals how the world's most keen-eyed detective can serve as an unparalleled guide to upgrading the mind.

NEW YORK TIMES BESTSELLER • Psychologist Alex Delaware and detective Milo Sturgis struggle to make sense of a seemingly inexplicable massacre in this electrifying psychological thriller from the #1 New York Times bestselling master of suspense. LAPD Lieutenant Milo Sturgis has solved a lot of murder cases. On many of them—the ones he calls “different”—he taps the brain of brilliant psychologist Dr. Alex Delaware. But neither Alex nor Milo are prepared for what they find on an early morning call to a deserted mansion in Bel Air. This one’s beyond different. This is predation, premeditation, and cruelty on a whole new level. Four people have been slaughtered and left displayed bizarrely and horrifically in a stretch limousine. Confounding the investigation, none of the victims seems to have any connection to any other, and a variety of methods have been used to dispatch them. As Alex and Milo make their way through blind alleys and mazes baited with misdirection, they encounter a crime so vicious that it stretches the definitions of evil.
