The Complete Book of Dutch Oven Cooking

Recognizing the lack of a national standard for wilderness first aid, The Boy Scouts of America formed a Task Force consisting of wilderness medicine specialists, medical epidemiologists, legal expertise, and educators to develop a curriculum and doctrine for a 16 hour wilderness first aid (WFA) course. Buck Tilton was the lead author of this project. As author he had to amalgamate the results of the literature research performed by the Task Force and through multiple revisions until this final product was developed. The Task Force is indebted to Buck for his hours of dedication to the project. Persons taking this course will have an appreciation of how wilderness first aid differs from standard, urban fist aid. Many readers will want to learn more about this fascinating and critical skill needed by all outdoor travelers. Some will be inspired to continue their education with a wilderness first responder course. This book contains the full doctrine that the Task Force approved. It provides a portable resource for use in the field as well as a text for the WFA course. It will be your introduction to the basic skills and knowledge all wilderness travelers should possess.

handmade tools and weapons. By mastering these skills, you will be able to survive with few tools or provisions in any wilderness setting--forest, plain, desert, or tundra--in nearly any part of the world.

Wilderness First Aid Field Guide

The Wilderness First Aid Handbook is a handy, quick-reference guide easily accessible with basic wilderness first aid knowledge, but it does not require advanced degrees or experience with medicine and prehospital care. Recognizing that certain knowledge and procedures are outside the scope of a layperson's training, Dr. Grant Lipman limits the use of technical terms and advanced techniques that may be unfamiliar to some readers or beyond their comfort zone. This system-based, easy-to-follow guide assists the first aid provider when encountering most wilderness emergencies, from cold and heat concerns and blister treatments to high altitude illness and lightning injury prevention—and much more. Typically the most challenging decision in the wilderness environment is when to evacuate a sick or potentially sick person, and as such, each section has detailed decision-making steps to inform you of when to be concerned and when to get out. This guidance is based upon the recent evidence-based consensus statement published by the Wilderness Medical Society on the scope of practice of wilderness first aid. Filled with original, full-color artwork illustrating the techniques and procedures described and with internal-spiral binding and waterproof pages handy for travel into extreme environments, The Wilderness First Aid Handbook is a must-have for every back pocket or backpack.

Original.

Bushcraft First Aid

Original Boy Scout Handbook is the official handbook of the Boy Scouts of America. It is a descendant of Baden-Powell's original handbook, *Scouting for Boys*, which has been the basis for Scout handbooks

in many countries, with some variations to the text of the book depending on each country's codes and customs. The original edition of the handbook was based on Baden-Powell's work. Ernest Thompson Seton combined his Woodcraft manual, the Birch Bark Rolls, with Baden-Powell's Scouting for Boys. Subsequent works were done by other authors. William "Green Bar Bill" Hillcourt wrote the 6th, 7th, and 9th editions. Frederick L. Hines wrote the 8th, and Robert Birkby the 10th, 11th and 12th editions. The first Official Handbook, subtitled A Handbook of Woodcraft, Scouting, and Life-craft was published from July 1910 until March 1911 and appeared in eight distinct variations. It was written by Ernest Seton and drew greatly on Baden-Powell's Scouting for Boys, it included information on the organization of Scouting, signs and signaling, and camping, as well as Scouting games and a description of several Scouting honours. Notably, this book did not place emphasis on first aid, knife and axe use, or map and compass work, as later editions would. Because this edition was intended solely as a temporary guide until an authoritative handbook could be made, it is now known as the 1910 Original Edition Handbook. The Wilderness Survival Guide

É If my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles Ñ that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.
