"Acclaimed home-grown photographer, Jodi Bieber has created an open-ended essay which is a celebration and a portrait of life in Soweto today. The importance of Soweto in the collective consciousness is hard to overstate. It registers as a place born of resistance, perhaps even embodying the South African struggle for freedom. But the birth of Kwaito is attributed to Soweto too. And beyond the grand narratives, there is and always was a proliferation of dancing, art and fashion in this place defined by its energy and cosmopolitan nature. Labelling and un-labelling, claiming and discarding, Sowetans have created Soweto anew - a phenomenon that is celebrated in this photographic publication which contemplates daily lived realities where here, as elsewhere, South Africans are continually reinventing themselves and their urban space."--Publisher's website.

From Sonoma wine country in the north to sundrenched La Jolla in the south, and from Malibu's seaside enclaves to Palm Springs nestled in the desert, California's distinctive regions are home to many of the world's most stunning swimming pools. Soon after the pool arrived in America in the

nineteenth century, California became a mecca for pool owners, where many advances in pool design have been made over the last century. Reflections on the Pool presents 40 perfect pools in 100 brilliant color photographs. These include the vibrant, Mexican-style architectural design of Ricardo Legorreta and the avant-garde, sensational creations of John Lautner, and illustrate the theories of the renowned landscape designers Thomas Church and Isabelle Greene. Each section of the book features a type of pool, or an element of pool design. Pools imitating nature, lap pools, architectural or highly ornamented pools are discussed in detail, as well as historic pools such as Hearst's Neptune Pool at San Simeon or Thomas Church's vanguard kidney-bean-shaped design of 1948, and other early California examples that set precedents for the pools of today. The introduction outlines technical aspects of design, and gives a brief history of the pool, including the influence of Hollywood on its popularity. Whether you own a pool or wish for one, and wherever you live, Reflections on the Pool is a color-infused, fresh, and inspirational display of the boundless possibilities in pool design.

### **In the Deep End**

"The Swimming Pool" is a new photographic essay from California-based street photographer Deanna Templeton (born 1969) that departs from her usual style to offer an expressive, intimate view of the human form underwater. The series was born after an impromptu nude swimming-pool shoot of husband and artist Ed Templeton, which spurred an eight-year journey in the study of light, expression and the enigma of water. Shooting entirely on color and black-and-white film and Polaroid, Templeton sent friends into the pool to be photographed in their truest form. Unlike her street photography, in which subjects were often strangers, Templeton found that creating these portraits required more intimacy and connection—a feeling that is apparent throughout every image in the series, which show strong, liberated individuals, confident and at ease in their most beautiful and vulnerable moments. As Ed Templeton writes in his afterword to this volume, "the nude swimmer is floating in a void of quiet solitude, the gentle pressure of being underwater enclosing her form like a baby in a womb and nothing exists outside of this world. A lone figure amidst a sea of blues and greys and frenetic sunlight performing a solitary dance for the photographer above, choosing movements and directions, twisting and swooping, contorting and expelling breaths painting a picture of form and light together." "The Swimming Pool" offers a deep and inspiring view of the human form.

A celebration of outdoor swimming – looking at the history, design and social aspect of pools. Few experiences can beat diving into a pool in the fresh air, swimming with blue skies above you. Whether it's a dip into a busy and bustling city pool on a sweltering summer day, or taking the plunge in icy waters, the lido provides a place of peace in a frenetic world. The book begins with a history of outdoor pools – their grand beginnings after the buttoned-up Victorian era, their falling popularity in the 20th century, and the newfound appreciation for the outdoor pool, or lido, and outdoor swimming in the 21st century. Journalist and architectural historian Christopher Beanland picks the very best of the outdoor pools around the world, including the Icebergs Pool on Bondi Beach, Australia; the 137m seawater pool in Vancouver, Canada; Siza's concrete sea pools in Porto, Portugal; the restored art deco pool in Saltdean, UK, and the pool at the Zollverein Coal Mines in Essen, Germany. The book also features lost lidos and the fascinating history behind the architecture of the pools, along with essays on swimming pools in art, and the importance of pools in Australia. In *The Deep End*, Damion Berger makes use of photography's ability to de-contextualize the familiar and create visual narratives, evoking a fusion of dreamlike memories and sense of childhood regression The clear, warm water of the swimming pool represents an intersection between the cultural and social pursuit of leisure, the natural element of water, and man-made space. The pool provides a place of temporary detachment from life's everyday routine, people seem liberated and at once removed from any social reference as they float, dive, sink or swim through the water. Smuggling a camera into public pools where photography is of course prohibited. Berger was able to work without the knowledge or complicity of his subjects as he attempted to produce photographs that simultaneously rekindle memories of childhood and the joys of summer times past. Berer also wanted to subvert certain waterborne fears that often stem from childhood. Basic Critical Theory for Photographers generates discussion, thought and practical assignments around key debates in photography. Ashley la Grange avoids the trap of an elitist and purely academic approach to critical theory, taking a dual theoretical and practical approach when considering the issues. Key critical theory texts (such as Sontag's 'On Photography' and Barthes' 'Camera Lucida') are clarified and shortened. La Grange avoids editorilising, letting the arguments develop as the writers had intended; it is the assignments which call into question each writer's approach and promote debate. This is the ideal book if you want to understand key debates in photography and have a ready-made structure within which to discuss and explore these fascinating issues. It is accessible to students, from high school to university level, but will also be of interest to the general reader and to those photographers whose training and work is concerned with the practical aspects of photography. Also includes invaluable glossary of terms and a substantial index that incorporates the classic texts, helping you to navigate your way through these un-indexed works. The book also contains useful information on photo-mechanical processes, explaining how a photograph can appear very differently, and as a result be interpreted in a range of ways, in a variety of books.

Each vibrant and colorful underwater image shows off the wild and sublime range of emotions of puppies, cute and irresistible to the very last.
