The Highlights Book of Things to Do

## Free Reading Things To Make And Do In The Fourth Dimension A Mathematicians Journey Through Narcissistic Numbers Optimal Dating Algorithms At Least Two Kinds Of Infinity And More

Presents ideas and instructions for how to create more than three hundred craft projects, from decorating eggs to Christmas decorations.

### Things to Make and Do

A crafty girl knows: when a plain old pencil holder is bringing you down, it's time to get crafty. Crafty Girl: Cool Stuff is your muse, your jolt of creative juice, your ticket to the crafty parade. Sure, an ordinary calculator adds it up, but a crafty girl's ultra-beaded glamulator makes math look good. With over 40 fabulous ways to say "I'm crafty," Cool Stuff will have crafty girls everywhere transforming ordinary anythings into glitter and rhinestone visions of paradise.

### The Really Big Book of Amazing Things to Make and Do

The Highlights Book of Things to Do is the essential book of pure creativity and inspiration. Kids ages seven and up will find hundreds of ways to build, play, experiment, craft, cook, dream, think, and become outstanding citizens of the world. This highly visual, hands-on activity book shows kids some of the best ways to do great things--from practicing the lost arts of knot-tying, building campfires, connecting circuits, playing jump rope, drawing maps, and writing letters, to learning how to empower themselves socially, emotionally, and in their communities. The final chapter, Do Great Things, inspires kids become caring individuals, confident problem solvers, and thoughtful people who can change the world. Full List of Chapters: Things to Do Inside Things to Do Outside Science Experiments to Do Things to Build Things to

## Things for Girls to Make and Do

This book is packed with great things for boys to do. Activities include a treasure map, cowboy hat, monster hand and a castle tower.

## Crafty Girl: Slumber Parties

A book from the stand-up mathematician that makes math fun again! Math is boring, says the mathematician and comedian Matt Parker. Part of the problem may be the way the subject is taught, but it's also true that we all, to a greater or lesser extent, find math difficult and counterintuitive. This counterintuitiveness is actually part of the point, argues Parker: the extraordinary thing about math is that it allows us to access logic and ideas beyond what our brains can instinctively do—through its logical tools we are able to reach beyond our innate abilities and grasp more and more abstract concepts. In the absorbing and exhilarating Things to Make and Do in the Fourth Dimension, Parker sets out to convince his readers to revisit the very math that put them off the subject as fourteen-year-olds. Starting with the foundations of math familiar from school (numbers, geometry, and algebra), he reveals how it is possible to climb all the way up to the topology and to four-dimensional shapes, and from there to infinity—and slightly beyond. Both playful and sophisticated, Things to Make and Do in the Fourth Dimension is filled with captivating games and puzzles, a buffet of optional hands-on activities that entices us to take pleasure in math that is normally only available to those studying at a university level. Things to Make and Do in the Fourth Dimension invites us to re-learn much of

what nature has to offer, they explore the potential of diverse raw materials such as snow, leaves, and sticks and suggest how to work with them. The book demonstrates how to use nature's free, renewable resources to make anything from a clay monster to an ice lantern or flaming balloons. Making things outdoors involves creativity and imagination, as well as learning how to solve practical problems, how to work together, the need to see a process through from start to finish, and the safe use of potentially dangerous tools — all of which help children acquire the skills they need to cope with the world and develop a commonsense understanding of the way it works.

### Things for Boys to Make and Do

### 50 Fairy Things to Make and Do

## Free Reading Things To Make And Do In The Fourth Dimension A Mathematicians Journey Through Narcissistic Numbers Optimal Dating Algorithms At Least Two Kinds Of Infinity And More

Originally published in 1945 by the Popular Science Publishing Company, this book harkens back to a simpler time before cell phones and apps overwhelmed our lives and kids were able to roam freely and make their own adventurous amusements. More than 200 activities, which are quite suitable for girls as well as boys, include pastimes for both indoors and outside. Hundreds of helpful diagrams and drawings explain how to perform fascinating science experiments and magic tricks and make such do-it-yourself projects as model airplanes that really fly, unusual radios, a soap-box racer, and more. Kids can learn how to use simple tools to make gifts and get creative with common household items like paper, cardboard, and old tin cans. They ' ll also discover tips for swimming, diving, camping, and biking in addition to a wealth of puzzles and other diverting activities.

### Things to Make and Do for Christmas

100 activities for making all kinds of crafty things. Each activity is explained simply, with clear step-by-step instructions and a picture or photo of the finished project to aspire to.

### Easy Does It!

This inspiring book is full of wonderful ideas for easy craft projects.
